- 9.3. **No advice towards investment or on transaction:** Our Valuation report should not be construed as advice for the transaction. Specifically, we do not express any opinion on the suitability or otherwise of entering the proposed transaction as stated in the purpose of engagement. - 9.7. **Range of Value Estimate:** The valuation of companies and assets is made based on the available facts and circumstances and the conclusions arrived at in many cases will be subjective and dependent on the exercise of individual judgment. Although every scientific method has been employed in systematically arriving at the value, there is no indisputable single value, and the estimate of the value is normally expressed as falling within a likely range. We have provided a single value for the overall Value of equity shares of the transferee and transferor companies, derived based on appropriate approaches. Whilst we consider the valuation to be both reasonable and defensible based on the information available, others may place a different value.
- 9.8. **No Responsibility to the Actual Price of the subject asset:** The actual market price achieved may be higher or lower than our estimate of value depending upon the circumstances of the transaction (for example the competitive bidding environment), the nature of the business (for example the purchaser's perception of potential synergies). The knowledge, negotiating ability and motivation of the buyers and sellers and the applicability of a discount or premium will also affect actual market price achieved. Accordingly, our valuation conclusion will not necessarily be the price at which actual transaction will take place. The final transaction price is something on which the parties themselves have to agree. We also emphasize that our opinion is not the only factor that should be considered by the parties in agreeing the transaction price or swap ratio.
- 9.9. **Reliance on the representations of the management and other third parties:** During the valuation, we were provided with both written and verbal information. We have however, evaluated the information provided to us by the Company through broad inquiry, analysis and review but have not carried out a due diligence or audit of the information provided for the purpose of this engagement. We have relied upon the representations of the management and other third parties concerning the financial data, operational data except as specifically stated to the contrary in the report. We shall not be liable for any loss, damages, cost, or expenses arising from

fraudulent acts, misrepresentations, or wilful default on part of the companies, their directors, employee, or agents.

- 9.10. **No procedure performed to corroborate information taken from reliable external Sources:** We have relied on data from external sources also to conclude the valuation. These sources are believed to be reliable and therefore, we assume no liability for the truth or accuracy of any data, opinions or estimates furnished by others that have been used in this analysis. Where we have relied on data, opinions or estimates from external sources, reasonable care has been taken to ensure that such data has been correctly extracted from those sources and /or reproduced in its proper form and context.
- 9.11. **Compliance with relevant laws:** The report assumes that the company/business/asset complies fully with relevant laws and regulations applicable in its area of operations and usage unless otherwise stated, and that the companies/business/assets will be managed in a competent and responsible manner. This Report does not look into the business/commercial reasons behind the transaction nor the likely benefits arising out of the same. In addition, we express no opinion or recommendation, and the stakeholders are expected to exercise their own discretion. Further, unless specifically stated to the contrary, this report has given no consideration to matters of a legal nature, including issues of legal title and compliance with local laws, and litigations and other contingent liabilities that are not recorded/reflected in the balance sheet/fixed assets register provided to us.
- 9.12. **Multiple factors affecting the Valuation Report:** The valuation report is tempered by the exercise of judicious discretion by us, considering the relevant factors. There will always be several factors, e.g., management capability, present and prospective competition, yield on comparable securities, market sentiment, etc. which may not be apparent from the Balance Sheet but could strongly influence the value.

11.0 Valuation

The valuation exercise is aimed at the assessment of the Fair Value. We are required to arrive at the above valuations based on internationally accepted valuation practices. As per **RICS appraisal Manual**, as well as **Ind AS 113** and **IFRS 13**, the **Fair Value (FV)** is defined as *'The price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date.'*

11.1 Valuation approach and methodologies

Valuation is dependent on various factors such as specific nature of business, economic life cycle in which the industry and company is operating, past financial performance of the business, future growth potential of the business, business model, management of the company, relevance of technology in the business model, liquidity of equity and much more. The results of the valuation exercise may vary significantly depending on the basis used, the specific circumstances and the judgement of the valuer. In respect of going concerns, certain valuation techniques have evolved over time and are commonly in vogue.

International Valuation Standard (IVS) 103 issued by International Valuation Standards Council (IVSC) requires the valuer to consider and select the most relevant and appropriate valuation approaches for the valuation of the asset and/or liability based on its intended use(s). As per IVS 103, the principal approaches to valuation are:

Market Approach: The market approach provides an indication of value by comparing the asset with identical or comparable (that is similar) assets for which price information is available.

Cost Approach: The cost approach provides an indication of value using the economic principle that a buyer will pay no more for an asset than the cost to obtain an asset of equal utility, whether by purchase or by construction, unless undue time, inconvenience, risk or other factors are involved. The approach provides an indication of value by calculating the current replacement or reproduction cost of an asset and making deductions for physical deterioration and all other relevant forms of obsolescence.

Income Approach: The income approach provides an indication of value by converting future cash flow to a single current value. Under the income approach, the value of an asset is determined by reference to the value of income, cash flow or cost savings generated by the asset.

11.2 Rationale for Valuation

Cost Approach:

As per IVS 103, The cost approach should be applied and afforded significant weight under the following circumstances:

- participants would be able to recreate an asset with substantially the same utility as the subject asset, without regulatory or legal restrictions, and the asset could be recreated quickly enough that a participant would not be willing to pay a significant premium for the ability to use the subject asset immediately,
- the asset is not directly income-generating and the unique nature of the asset makes using an income approach or market approach unfeasible,
- the basis of value being used is fundamentally based on replacement cost, and/or
- the asset was recently created or issued and sold to market participants, such that there is a high degree of reliability in the assumptions used in the cost approach.

Under the Cost Approach, we have considered Net Asset Value (NAV) which is representative of the replacement cost of the net assets of the company. We have arrived at the Net Asset Value by deducting all book value of liabilities from book value of assets. Further, we have adjusted the Book Values of various investments held by the companies to arrive at the fair value of equity shares.

Market Approach: As per IVS 103, The market approach should be applied and afforded significant weight under the following circumstances:

- the subject asset has recently been sold in a transaction appropriate for consideration under the basis of value,
- the subject asset or substantially similar assets are actively publicly traded, and/or
- there are frequent and/or recent observable transactions in substantially similar assets.

The equity shares of SLL (the transferee company) are listed and publicly traded on recognized stock exchanges. Accordingly, the Market Approach has been considered based on the quoted price of the equity shares of SLL. As 31st March 2026 was a non-trading day, the NSE closing price of INR 124.95 per share as on 30th March 2026 has been considered for determining the fair market value of SLL.

Income Approach: As per IVS 103, A fundamental basis for the income approach is that investors expect to receive a return on their investments and that such a return should reflect the perceived level of risk in the investment.

The income approach should be applied and afforded significant weight under the following circumstances:

- the income-producing ability of the asset is the critical element affecting value from a participant perspective, and/or

- reasonable projections of the amount and timing of future income are available for the subject asset, but there are few, if any, relevant market Comparables.

Based on our assessment and discussion with the management, the future cash flows cannot be ascertained with reasonable certainty. So, application of Income approach was not considered appropriate. Therefore, we have not used the Income approach for valuation of shares of this company.

The share exchange ratio has been determined based on the shareholding pattern and facts prevailing as on the Valuation Date. However, subsequent to the Valuation Date and prior to the issuance of this report, as informed by the management, the entire shareholding of Shrasta has been acquired by SRL, resulting in SRL becoming a wholly owned subsidiary of Shrasta.

In the present case, the Transferor Companies and the step-down Transferor Companies are wholly owned subsidiaries of the Transferee Company.
