Sterling Gtake Rebrands as Sterling E-Mobility Solutions Limited

New Delhi, India – October 14, 2025: Sterling Tools Limited (BSE: 530759, NSE: STERTOOLS), one of India's leading automotive component manufacturers, today announced that its subsidiary Sterling Gtake, India's leading motor controller company, has been rebranded as Sterling E-Mobility Solutions Limited, marking a significant milestone in its journey to become a comprehensive provider of electric vehicle (EV) technologies.

The strategic name change reflects the company's expanding portfolio and its commitment to delivering integrated solutions for EV powertrains and power electronics. Over the years, Sterling has built a reputation for excellence and innovation, and this transformation underscores its vision to lead India's transition to sustainable mobility.

Anil Aggarwal, Chairman, Sterling Tools Limited, said: *"We are proud to begin this new chapter as Sterling E-Mobility Solutions Limited. This rebranding reflects our commitment to delivering integrated EV solutions powered by global innovation and local expertise. Our exclusive partnership with Gtake remains strong, and we're excited to explore new collaborations that strengthen our leadership in the EV ecosystem. We thank our partners and customers for their continued trust and support as we work together to shape India's e-mobility future."*

In May 2025, Sterling entered into a technology licensing agreement with Advanced Electric Machines (AEM), UK, to manufacture magnet-free motors in India. In Sep 2025, the company announced another key partnership with Landworld Technology Co. Ltd., China, for their range of on-board chargers and DC/DC converters.

These collaborations are a part of Sterling's broader strategy to offer localized, high-performance solutions tailored to the Indian EV market. The company continues to explore partnerships with global leaders to enhance its offerings and support the evolving needs of its customers.

Importantly, Sterling's exclusive relationship with Jiangsu Gtake Electric Co., Ltd. for the Indian market remains strong and unchanged. This partnership continues to flourish, with multiple products being developed by Gtake and localized by Sterling to meet domestic requirements.

Sterling's product nameplates will now reflect its diverse technology collaborations, including those with Gtake, AEM, and Landworld, reinforcing its commitment to transparency and innovation.

About Sterling Tools Limited

Incorporated in 1979, Sterling Tools Limited (STL) manufactures high-tensile, cold-forged automotive fasteners catering to the passenger vehicle, two-wheeler, commercial vehicle, agri-equipment, and construction equipment segments. Its subsidiary, Sterling E-Mobility Solutions Limited (formerly Sterling Gtake E-Mobility) focuses on providing EV powertrain and power electronics solutions, while another subsidiary, Sterling Tech-Mobility Ltd. (STML) has successfully ventured into emerging sectors such as electric vehicle components, ensuring robust value creation for stakeholders. Sterling E-Mobility Solutions also continues to manufacture motor control units under license from Jiangsu Gtake Electric Co Ltd. STL and its subsidiaries cater to leading incumbent and start-up OEMs.
