PRESS RELEASE

Sundaram Multi Pap Limited Announces AI-Powered Upgrade to its Digital Education Platform to Transform Learning Across Maharashtra

Mumbai, July 28, 2026: Sundaram Multi Pap Limited (BSE: 533166 | NSE: SUNDARAM), through its Digital Education division, is pleased to announce the launch of the next generation of its AI-powered Digital Learning Platform, marking a significant step forward in the Company's mission to make quality education more accessible, engaging, and effective for students, teachers, and schools.

The enhanced platform integrates Artificial Intelligence (AI) to assist in the creation and delivery of educational content, enabling a smarter, faster, and more personalized digital learning experience. The platform has been designed to support schools across Maharashtra while strengthening the Company's long-term vision of providing technology-driven education solutions across India.

Key AI Features

The upgraded platform introduces intelligent tools designed to improve both teaching and learning, including:

- AI-assisted educational content generation.
- AI-assisted generation of question banks, assessments and practice tests.
- Mind maps and visual learning resources generated instantly.
- Personalized learning recommendations for students.

The platform continues to provide curriculum-aligned digital classroom content while significantly expanding the capabilities available to educators and learners through Artificial Intelligence.

Supporting Maharashtra's Education Ecosystem

Sundaram Multi Pap Limited has been serving the education sector for over a decade through its Digital Education initiatives. The Company's solutions have been implemented across government, aided and private educational institutions, with a focus on improving classroom engagement, digital accessibility and learning outcomes.

The AI-powered platform is expected to further strengthen teaching efficiency while enabling students to access richer educational resources in an intuitive and interactive manner.

Designed for India's Schools

Recognizing the unique challenges of Indian classrooms, particularly in semi-urban and rural regions, the platform has been developed with features that support:

- Low bandwidth and offline operation.
- Regional language learning.
- Easy classroom deployment.
- Teacher-friendly interface.
- Curriculum-aligned digital content.
- AI-assisted content enhancement, subject to academic review.

This approach enables schools with limited digital infrastructure to benefit from modern educational technology without dependence on continuous internet connectivity.

Message from Mr. Hardik Shah, Chief Executive Officer

Education is one of the most powerful tools for transforming lives, and technology has become the bridge that can bring quality learning to every child, irrespective of geography.

At Sundaram, we have always believed that digital education should not be limited to urban schools with high-speed internet. India's future lies equally in its villages, tribal regions, and smaller towns. This belief has driven us to develop robust offline digital classroom solutions that work effectively even in areas where internet connectivity remains a challenge.

The integration of Artificial Intelligence into our platform represents the next phase of this journey. Artificial Intelligence is designed to assist teachers rather than replacing them. By reducing the time spent on creating educational resources and enabling personalized learning experiences, teachers can focus more on inspiring students and building strong conceptual understanding.

We are especially committed to providing high-quality educational resources in local and regional languages because true digital inclusion can only happen when students learn in the language they understand best.

Maharashtra has always been at the forefront of educational innovation, and we are proud that our AI-powered platform will continue supporting students, teachers and schools across the state.

Our vision remains clear—to make quality digital education accessible, affordable and available to every classroom, while continuing to innovate responsibly using emerging technologies.

About Sundaram Multi Pap Limited:

Sundaram Multi Pap Limited (BSE: 533166, NSE: SUNDARAM), established in 1995, is a leading stationery brand with a strong presence across India, particularly in states of Maharashtra and Gujarat. The Company offers a premium range of products including notebooks, drawing books, scrapbooks, and office supplies, reflecting its commitment to superior paper quality, durable binding, and innovative designs. At Sundaram, every product is thoughtfully crafted to inspire students, professionals, and creators to start fresh, think boldly, and embrace endless possibilities. Sundaram is also actively engaged in digital education, and is empowering digital classrooms across the state of Maharashtra.
