AMID WEST ASIA CRISIS

Wholesale Inflation Hits 38-Month High of 3.9% in March on Crude, Energy Prices

Supply disruptions raised input costs across items; economists expect inflation to rise further

Our Bureau

New Delhi: India's wholesale inflation hit a 38-month high of 3.9% in March, up from 2.1% in February, driven by higher prices of crude oil, energy and manufactured goods amid the West Asia war, showed official data released on Wednesday.

Economists expect the Wholesale Price Index (WPI)-based inflation to rise further as tensions in the region persist. In March last year, the reading stood at 2.3%. "Looking ahead, the adverse impact of the surge in global energy prices, along with elevated shipping, freight and input prices, is expected to continue to weigh on the landed cost of imports, thereby exerting upward pressure on the WPI print for April," said Rahul Agrawal, senior economist at ICRA. ICRA expects WPI inflation to increase to about 4.8% in April, while India Ratings and Research estimates 4.7%.

Upward Trend

Driven by higher crude oil, energy, and manufactured goods prices, crude petroleum prices surged 51.6%.

Economists expect inflation to rise further

Note: Figures for last two months are provisional

Source: Ministry of Commerce & Industry

crude oil prices surged 51.6%, reversing a 1.3% decline the month before.

Agrawal highlighted that crude petroleum and natural gas, and the fuel and power groups together accounted for 150 basis points of the 175 basis point increase in the headline print in March relative to February. A basis point is a hundredth of a percentage point. Refineries increased diesel prices by more than 25% in March during the West Asia crisis. At the same time, domestic gas cylinder prices increased 40%, while commercial cylinders went up by a total of Rs 30. On average, WPI inflation stood at 0.7% in 2022-26, lower than 2.5% in the preceding financial year. Core WPI (non-food manufactured items) inflation rose to a 41-month high of 3.7% in March from 3.3% in February.

On average, Wholesale Price Index inflation stood at 0.7% in 2022-26, lower than 2.5% in the preceding financial year.

MANUFACTURING, FOOD Manufactured products, which account for 64.2% of the WPI basket, saw inflation increase to 3.4% in March from 2.9% in February. Food, which accounts for around a quarter of the WPI basket, increased 1.85% during the month.

In urban areas, labour force participation rate fell marginally to 50.3% in March from 50.4% in February, while in rural areas it declined to 58.7% from 58.7% in February. Youth participation also weakened, with LFPR dropping to 41.6% in March from 42.1% the month before. Among young men, it fell to 60.9% from 61.2%, and among young women, it declined to 22.3% from 23.1%.

In urban areas, labour force participation rate fell marginally to 50.3% in March from 50.4% in February, while in rural areas it declined to 58.7% from 58.7% in February. Youth participation also weakened, with LFPR dropping to 41.6% in March from 42.1% the month before. Among young men, it fell to 60.9% from 61.2%, and among young women, it declined to 22.3% from 23.1%.

Meanwhile, the worker population rate (WPR), or employment rate, decreased to 52.6% in March from 53.2% in February. Male and female WPR slipped to 73.6% and 32.6%, respectively.

Supply disruptions during March raised input costs across items, including aluminium powder (15.8%) and aluminium alloys (13.5%). Inflation in the fuel

oil/cum (22.9%), copper wire (21.9%), and power segment turned positive at 1.1% in March, compared with a contraction of 3.8% in February. Crude oil prices

rose 51.6% in March, while refined petroleum products fell 1.1% in March, compared with a contraction of 3.8% in February. Crude oil prices

Unemployment Rate Rises to 5-mth High of 5.1%

Women continued to face higher unemployment at 5.3% compared to 5% for men in March

Our Bureau

New Delhi: India's unemployment rate rose to a five-month high of 5.1% in March, up from 4.9% in February, mainly driven by an increase in the urban jobless rate, official data released on Wednesday showed.

Women continued to face higher unemployment, with a rate of 5.3% compared to 5% for men. Urban unemployment rate increased to 6.8% in March from 6.6% in February, while in rural areas it edged up to 4.3% from 4.2%, according to the Periodic Labour Force Survey (PLFS). The data covers individuals aged 15 years and above who were unemployed but actively seeking work. It is based on the current weekly status, which measures employment or job-seeking activity over the seven days preceding the survey.

Job Hunting

Unemployment rate rose to 5.1% in March from 4.9% in February.

Youth unemployment (15-29 years) also increased, reaching 15.2% in March compared to 14.8% in February.

Supply Crunch Drives City Gas Companies Towards PNG Push

Firms tap spot mkt to secure nat gas, step up hiring of skilled labourers

Kalpina Pathak

Mumbai: City gas distribution (CGD) companies are re-drawing their plans with the Iran war squeezing supplies, leading them to pivot towards domestic gas. "If we can build an ecosystem where we are able to migrate a household, not just to PNG for cooking, but PNG for geysers also, at the same cost, with a marginal increase in pipeline you are generating a consumption which gets you a better return," said Tandon. Traditionally, the PNG segment has generated comparatively lower unit economics, making it an unattractive venture for CGD companies. "CGD companies lay long pipelines to reach a small number of homes which pushes up infrastructure and supply costs per household," said a senior industry official requesting anonymity. "But the reward is not handsome. Instead, if we supply the same gas to the industrial segment, our earnings multiply. Houses also need not use less gas but in many cases there are fewer paying customers." Also, the cost of securing a PNG connection has been a deterrent. The last year they have to pay more than ₹5,000. However, LPG cylinders continue to be subsidised. Despite these challenges, the government to expand the PNG network, a rate supporter to companies. The Iran war has

(Gas) at Bharat Petroleum Corporation Ltd (BPCL) will invest around ₹1,700 crore this fiscal year to expand its gas business. The company is also looking at how it can increase PNG consumption per household. "We can build an ecosystem where we are able to migrate a household, not just to PNG for cooking, but PNG for geysers also, at the same cost, with a marginal increase in pipeline you are generating a consumption which gets you a better return," said Tandon. Traditionally, the PNG segment has generated comparatively lower unit economics, making it an unattractive venture for CGD companies.

LPG Imports Halve, Domestic Output Falls from March Peak

Week-old ceasefire has done little to ease fuel availability, particularly cooking gas

Sanjeev Choudhary

New Delhi: India's monthly LPG imports halved to 16,000 tonnes in April from February levels, extending a similar decline in March, according to shipping data, while domestic output has fallen about 10% from its March peak, tightening overall supply. Disruptions to energy flows from the Gulf due to the US-Iran war continue to roll global oil and gas markets, and a week-old ceasefire has done little to ease fuel availability, particularly for cooking gas. LPG imports averaged 37,000 tonnes per day during April 1-14, broadly in line with March but sharply lower than 73,000 tonnes per day in February, according to ship

US has been largest LPG supplier to India so far this month, shipping 142k tonne, or 27% of the 523k tonne received

already seeing some shifts in trade flows, but replacement options are insufficient to offset the shortfall. The US has been the largest LPG supplier to India so far this month, shipping 142,000 tonnes, or 27% of the 523,000 tonnes received. The UAE supplied 141,000 tonnes, Saudi Arabia 92,000 tonnes, Qatar 82,000 tonnes, and Kuwait 11,000 tonnes. Iran supplied 43,000 tonnes, while Argentina 11,000 tonnes. In March, while 11,000 tonnes were shipped to India, shipped 10,000 tonnes. Before the war, Gulf countries accounted for about 64% of India's LPG consumption. India has managed to move nine LPG carriers out of the Persian Gulf, supporting flows, but the dominance of Gulf suppliers in the spot market is limiting its ability to ramp up supplies. Globally, most LPG volumes are locked in through annual contracts, with barely 10% available on the spot market, leaving limited additional supply even at higher prices, industry executives note. After the conflict began, Indian refiners ramped up LPG output by about 40% to 50,000 tonnes per day towards the end of last month. Output has since eased to around 45,000 tonnes per day. Nayara Energy undertook a refinery shutdown and some feedstock has been diverted back to petrochemicals. The earlier diversion had begun to hit petrochemical output, leading to shortages of plastic bags and pharmaceutical packaging materials.

OVERSEAS INSOLVENCY FRAMEWORK NEARS ROLLOUT

Spl NCLT Bench Planned for Cross-border Cases

Move to enable easier access for creditors to global assets of stressed cos and allow cooperation from foreign courts

Bankinkar Pattanayak

New Delhi: India plans to set up a special bench for the National Company Law Tribunal (NCLT) with trained manpower to handle cross-border insolvency cases once the new bankruptcy rules are notified, to fast-track proceedings, people aware of the matter said.

The cross-border framework, approved last month as part of amendments to the Insolvency and Bankruptcy Code (IBC), will be based on a model UN law with modifications to suit the Indian context.

It seeks to enable easier access for creditors to overseas assets of stressed companies and allow India to seek cooperation from foreign courts to bring such proceedings. The need for such a framework emerged during bankruptcy proceedings involving Amtek Auto, Videocon Industries, Essar Steel and Jet Airways, where issues such as asset location and complex cross-border procedures delayed resolution. The corporate affairs ministry will begin framing cross-border insolvency rules soon. To ensure parliamentary oversight, a draft of every rule will be laid before each House of Parliament, as

Crossing the Frontier

Cross-border IBC framework to be aligned with a model UN law. Special bench to have members trained in such insolvencies. MCA to frame rules soon; bench to come up after that.

per the amended IBC. "The special bench is necessary for time-bound insolvency proceedings," one of the people told ET. "We can't have a situation where a foreign adjudicating authority hearing the insolvency case is moving fast and we are lagging," he said. Advanced jurisdictions, including Singapore, are known for time-bound resolutions. The proposed NCLT bench will have members trained in cross-border insolvency resolution, the person said.

MODEL UN FRAMEWORK The United Nations Commission on International Trade Law (UNCITRAL) for cross-border insolvency resolution has been adopted by more than 50 jurisdictions. It is based on principles such as access to foreign and domestic courts by resolution

Move follows delay in cases, including Amtek, Videocon and Jet Airways

professionals, recognition of foreign proceedings, cooperation between courts, and coordination of multiple concurrent insolvency proceedings. Ratifying countries are allowed to firm up rules, depending on their peculiar context, on the basis of this model law. "A special bench will result in faster resolution of cross-border insolvency cases. This will brighten the chances of recovery for creditors as well," said Yogendra Adlak, executive partner at Lakshmi Kumar & Sidharan attorneys. Earlier, the IBC provided for cross-border insolvency through bilateral agreements and letters of request issued by the NCLT to foreign courts under Section 234. However, this mechanism was ad hoc and prone to delays and uncertainty.

Second 100 days Campaign – "Saksham Niveshak"

Pursuant to the Investor Education and Protection Fund Authority (IEPFA), Ministry of Corporate Affairs (MCA) communication dated March 27, 2023, the Company has initiated a second 100 days campaign "Saksham Niveshak" until July 9, 2023.

This campaign is being undertaken to facilitate shareholders in updating Know Your Customer (KYC) details including:

1. Bank account mandate, 2. Nominee Registration, 3. Contact information (email, mobile number, address)

This campaign is also being undertaken to facilitate shareholders to claim their Unpaid/Unclaimed Dividends in order to prevent their dividend amount and shares being transferred to IEPFA and resolve issues associated thereto.

Shareholder Action Required:-
Shareholders who have not claimed their dividends or have incomplete KYC records are requested to contact the Company's Registrar and Share Transfer Agent (RTA) at the earliest to the below mentioned address:-
Integrated Registry Management Services Private Limited, 2nd Floor, "Kencos Towers", No. 1, Ramakrishna Street, North Usman Road, T. Nagar, Chennai - 600 017, Ph. No. 044 2514 0801, Email: enward@integregatedindia.in

Important Advisory:-
Please note that per the Companies Act, 2013, if dividend remains unclaimed for a period of seven consecutive years, the dividend amount and the corresponding shares (if available) are liable to be transferred to IEPFA.

Thus, we urge all stakeholders to take prompt action during the campaign period to safeguard their entitlement and ensure compliance with statutory requirements.
