Mumbai: Suzlon Group, the world's third largest* wind turbine supplier, reported its earnings today, for the quarter ended September 30th, 2010.

Mr. Tulsi Tanti, Chairman and Managing Director – Suzlon Group, said: "The wind industry has undergone a major transformation over the past two years. While many mature markets face near stagnant conditions – compounded by policy hurdles – new and emerging markets are increasingly driving growth for the sector. I am happy to report that we are well positioned in both the emerging and offshore markets – our strategy to focus on these markets has proven to be sound and is now beginning to deliver. That said, we remain committed to the mature markets and note the many industry reports which forecast a recovery in these geographies in 2011/2012.

"This has been a progressive quarter for us. Our Group orderbook has grown to US\$ 5.4 billion, with particularly strong contributions from REpower and our India business. This gives us confidence about the remainder of the year and beyond. We have expanded our business into South Africa and established new R&D centers in Germany and announced plans to open one in China. We continue to maintain an aggressive focus on driving sales and improving performance at every level.

"We believe that innovation and new products, along with our low cost manufacturing base and low cost structure, allows us to ride out the challenging market environment."

Mr. Robin Banerjee, Chief Financial Officer – Suzlon Energy Limited, said: "A comparison with previous quarters shows that our financial situation is markedly improved. We have delivered a positive EBITDA of Rs. 148 crore, and our improvement continues across the board. We are working very hard to keep our costs in check and improve our margins – and we are making solid progress in this endeavor. Our sales performance is on
