Dear Sirs,

Sub.: REpower announces installation of 6M wind turbines in Eemshaven.

Enclosed please find the copy of the press release in the subject matter.

This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,
For Suzlon Energy Limited

H.A. Kanuga
Hemal A. Kanuga,
Company Secretary.

Encl.: As above.

28th November 2011

REpower announces installation of 6M wind turbines in Eemshaven

Hamburg/Amsterdam : REpower Systems SE – wholly-owned subsidiary of the Suzlon Group – has concluded a contract with RWE Innogy for the delivery of two Repower 6M wind turbines at the beginning of the EWEA Offshore exhibition in Amsterdam.

The turbines, each with a rated power of 6.15 MW and a hub height of 114 meters, will be installed in the Westereems wind farm near Eemshaven in the Dutch province of Gronigen. With a current installed power of 156 MW, Westereems is already the largest wind farm in the Netherlands and will now be extended with a further 12.3 MW, and, for the first time, feature REpower turbines at this location. Completion is planned for mid 2012.

"The two 6M turbines are an ideal expansion of the existing wind farm Westereems. Furthermore, with operation of the plants we aim at gaining new insights for their employment on the high seas in the project Nordsee Ost", explains **Prof. Martin Skiba, Head of Offshore Wind energy at RWE Innogy.**

The two 6M turbines correspond to the type which RWE Innogy is shortly going to use in the offshore wind farm Nordsee Ost (North Sea East). Installation of the wind farm Nordsee Ost, some 30 kilometres North of Helgoland, is to be started in spring 2012. In total, 48 turbines of the 6M type will be used there.

REpower is currently working on the production of the wind turbines at the company's offshore production location in Bremerhaven. Production is currently on schedule, the turbines are due to be delivered in the course of 2012.

About REpower:

REpower Systems SE, a Suzlon Group company, is one of the leading manufacturers of onshore and offshore wind turbines. REpower develops, produces and markets wind turbines with rated outputs of 1.8 MW to 6.15 MW and rotor diameters of 82 meters to 126 meters for almost any location. The company also offers a comprehensive portfolio of service and maintenance packages. The turbines are designed at the REpower TechCenter in Osterrönfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven as well as Portugal and China.

With just under 2,500 employees worldwide, REpower is headquartered in Hamburg and makes use of the experience gained from the manufacture and installation of around 3,000 wind turbines around the world.

About Suzlon Group:

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity, at the end of 2010. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with over 18,000 MW of wind energy capacity installed in 28 countries, operations over 30 countries, a workforce of over 13,000. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt on-shore turbines at 600 Kilowatts (KW), to the world's largest commercial 6.15 MW offshore turbine – built on a vertically integrated, low-cost,

manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including REpower Systems SE. Visit us at www.suzlon.com
