Dear Sir / Madam,

**Sub: Intimation under Regulation 30 of SEBI LODR - Press Release**

In terms of Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we hereby attach the Press Release dated 21<sup>st</sup> January 2026 titled "SWELECT REINFORCES ITS COMMITMENT TO RESPONSIBLE ENERGY".

The above information will be made available on the website of the Company [www.swelectes.com](http://www.swelectes.com). We request you to kindly take on record the above intimation.

Thanking You,

Yours Faithfully,

For **SWELECT Energy Systems Limited**

**R Chellappan**  
**Whole-time Director and Vice Chairman**

**Encl.: as above**

## SWELECT REINFORCES ITS COMMITMENT TO RESPONSIBLE ENERGY

- **Unveils new brand identity**
- **Launches NUMERGY product portfolio, a comprehensive range of Battery Energy Storage Systems (BESS) and home energy solutions**

Chennai, January 21, 2026: SWELECT Energy Systems Ltd. (BSE: 532051 | NSE: SWELECTES), formerly known as NUMERIC Power Systems Ltd., a leading name in India's renewable energy sector, today unveiled its new corporate logo and brand tagline 'Powering the World Responsibly', marking an important step in the company's evolution and its long-term commitment to clean and reliable energy. The company also announced the launch of its NUMERGY product portfolio, a comprehensive range of Battery Energy Storage Systems (BESS) and home energy solutions designed to address the growing need for reliable, round-the-clock power across residential, SOHO and large-scale commercial & industrial (C&I) applications.

Commenting on the unveiling of the new brand identity, Mr. R. Chellappan, Founder & Vice Chairman, SWELECT Energy Systems Ltd. said, *"Our new identity reflects how far we have come and where we are headed. From building dependable power solutions under Numeric to focusing on clean energy through SWELECT, our core values remain the same - reliability, responsibility and trust. 'Powering the World Responsibly' aptly captures our belief that growth and sustainability must go hand in hand."*

The refreshed identity reflects what SWELECT stands for today...a company rooted in strong engineering values, now focused on delivering responsible, sustainable energy solutions to homes, industries, and businesses. The new logo and tagline signal a clear direction as the company strengthens its presence across solar, energy storage, and integrated energy solutions.

SWELECT's journey is deeply connected to the legacy of Numeric Power Systems Limited, a name that became synonymous with reliability in India's power electronics space. For decades, Numeric set the benchmark for UPS systems with an industry-leading 99.9999% reliability record. That engineering discipline and customer trust continue to form the backbone of SWELECT's approach today.

In line with this ethos is SWELECT's NUMERGY portfolio, which has been designed to address energy storage needs across homes, small businesses and large commercial & industrial users, with solutions that scale seamlessly from residential to enterprise applications.

Unveiling the NUMERGY product range, Dr. Arulkumar Shanmugasundaram, CEO & Managing Director, SWELECT Energy Systems Ltd. said, *"Battery Energy Storage Systems are central to the future of reliable and resilient power. As energy consumption patterns change and renewable penetration increases,*

*storage will be the key to ensuring round-the-clock availability, grid stability, and energy independence. With NUMERGY, SWELECT is addressing these needs across homes, businesses and industries."*

The NUMERGY portfolio includes...

- NUMERGY HOME: 1 - 10 kW - Complete home energy solutions designed for residential and small office/home office (SOHO) applications.
- NUMERGY HYBRID: 5 - 20 kW - Advanced hybrid energy systems ideal for high-consumption residential properties and small commercial installations, offering enhanced capacity and flexibility for demanding energy requirements.
- NUMERGY HP: 3 - 50 kW - High-performance Battery Energy Storage Systems (BESS) engineered for commercial and industrial applications requiring robust energy storage infrastructure and sophisticated grid integration capabilities.

SWELECT's NUMERGY HOME and Battery Energy Storage Systems (BESS) are engineered to enhance the performance of solar energy systems and ensure reliable, round-the-clock power availability.

#### Value Proposition and Technical Advantages

- Optimised Resource Utilisation: Solar power generated during the day is efficiently stored and used when required, reducing dependence on the grid and improving overall energy efficiency.
- Grid Integration and Peak Management: Advanced energy management technology enables intelligent energy dispatch, storing surplus renewable generation for release during peak demand periods, thereby minimizing curtailment and improving grid economics.
- Lower Project Costs: Intelligent energy management helps reduce electricity costs by lowering peak demand charges and improving return on investment over the system's life cycle.
- Renewable Energy Maximization: Excess renewable generation is stored rather than curtailed, ensuring maximum utilization of installed solar capacity and improving overall project economics.
- Reliable Power Delivery: Integrated storage ensures uninterrupted power supply, even during grid outages or peak load conditions.

*"Built on Numeric's strong DNA of Battery Storage and powered by SWELECT's renewable energy expertise, NUMERGY positions us to emerge as a leading player in the energy storage space, supporting India's clean energy transition," adds Shanmugasundaram.*

Together these solutions combine SWELECT's solar and battery expertise to provide unique value propositions to customers.

**About SWELECT Energy Systems Ltd.**

Established in 1984, as a UPS and Power Protection Systems leader, SWELECT Energy Systems Limited has emerged as a leading solar power solutions company with a robust presence in the global energy market. SWELECT specializes in the manufacturing of solar photovoltaic (PV) modules, Module mounting structures (MMS), power conditioning units, and offers comprehensive engineering, procurement, and construction (EPC) services. The company's state-of-the-art manufacturing facilities and technical proficiency underscores its commitment to delivering high-quality, sustainable energy solutions.

SWELECT also carries the strong legacy of Numeric, India's leading UPS solutions brand, under which it built deep expertise in power electronics and battery energy systems for over two decades. In 2012, the company transitioned from Numeric to SWELECT, symbolising its evolution from "Power to Energy" and establishing itself as a trusted leader in the solar energy sector.
