Sub.: Expansion of India Product Portfolio — Room Air Conditioners, BLDC Ceiling Fans and Air Purifiers

Dear Sir/Madam,

We wish to inform you that Symphony Limited (“Company”) proposes to expand its India product portfolio through a calibrated and phased entry into:

- 1. Room Air Conditioners;**
- 2. BLDC Ceiling Fans; and**
- 3. Air Purifiers**

The proposed expansion is expected to broaden the Company’s addressable market in India through adjacent consumer-durable categories with long-term growth potential. It will leverage Symphony’s capabilities in cooling, brand-building, distribution, consumer insights and after-sales service. It is also consistent with the Company’s stated focus on strengthening its Beyond India Summer Products (“BISP”) portfolio, while further reinforcing its leadership in the Indian household air cooler category.

The rollout will follow an asset-light model, with no current plan to invest in in-house manufacturing capacity. Internal accruals will be deployed progressively and prudently towards product development, inventory, brand-building, channel and service readiness, and working capital.

Products are proposed to be introduced selectively across ranges, markets and channels commencing from the December 2026 quarter. The pace and scale of expansion will be calibrated to consumer response, execution readiness and satisfactory commercial and operating outcomes.

This disclosure is being made pursuant to Regulation 30 and other applicable provisions of the SEBI Listing Regulations.

Please take note of the same.

Thanking you,

Yours Truly,

For Symphony Limited

Mayur Barvadiya

Company Secretary and Head – Legal
