ENCL: as above.

## Syrma SGS Begins Groundwork for New PCB Manufacturing Plant in Andhra Pradesh

*Over 1,000 new jobs, and a JV with South Korea's Shinhyup Electronics set the stage for a new manufacturing hub*

**Naidupeta (AP), India | December 01, 2025** - Syrma SGS has initiated construction on a new state-of-the-art Printed Circuit Board (PCB) manufacturing facility, marking an important step forward in the company's long-term expansion strategy. The plant, being developed through its subsidiary Syrma Strategic Electronics Pvt. Ltd., brings together advanced capabilities and a renewed push to strengthen India's electronics manufacturing ecosystem.

Located within the Naidupeta Industrial Zone, the upcoming facility is designed to produce a full spectrum of PCBs, including single-layer, multi-layer variants. With this facility, Syrma SGS will strengthen itself as a key contributor to India's high-growth electronics sector.

Beyond capacity, the project introduces a wave of livelihood opportunities for the community. With over 1000 direct jobs expected at the plant, it will help nurture local talent, support households, and contribute to the sustainable rise of Naidupeta as an emerging industrial hub.

To possess strong technological bandwidth, Syrma SGS has entered a joint venture with South Korea-based Shinhyup Electronics (SH Electronics Ltd.), a company known for its strong expertise in PCB engineering. The collaboration pairs Shinhyup's global engineering precision with India's fast-rising manufacturing strength. Together, they create a platform that enriches capability, sharpens quality, and positions the new facility for stronger competitiveness.

**Commenting on the inauguration, Mr. J S Gujral, Managing Director of Syrma SGS Technology Ltd.,** quoted, *"Each one of us at Syrma SGS has always believed that India can be a global force in high-precision electronics. This new plant is our way of turning that belief into action. With cutting-edge PCB technology, a strong local talent base, and the strength of our partnership with Shinhyup Electronics, we are creating the infrastructure and alliances needed for the next phase of India's electronics journey. It is incumbent upon organizations like ours to be reasonably aggressive in our investments. This is an exciting moment for us and for the ecosystem around us."*

With groundwork now in motion, the Naidupeta project is positioned to become a key manufacturing anchor for Syrma SGS, supporting the company's broader goal of developing a fully integrated, next-generation electronics production ecosystem in India.

### About Syrma SGS Technology Limited:

Syrma SGS is a leading Indian Electronic Systems Design and Manufacturing company. With over 30 years of expertise, Syrma SGS has been the preferred partner for customers seeking innovative and efficient EMS solutions. The Company serves more than 270 customers across 20+ countries. It has a pan-India manufacturing footprint with facilities in Chennai, Bangalore, Manesar, Gurgaon, Pune, Jodhpur and Baddi, along with R&D centres in Chennai, Pune, Gurgaon, and Stuttgart, Germany. For FY25, Syrma SGS achieved consolidated revenue of approximately INR 3,839 Crores. The Company offers a comprehensive range of services, including Product Design, Assembly (PCBA & Box Build), Quick Prototyping, and Tester Development Services, positioning us as a catalyst for growth in the industry. In addition to EMS, Syrma SGS also provides OEM solutions for RFID tags & inlays, high-frequency magnetic components, and electro-mechanicals. The Company's commitment to excellence is evident in the hundreds of millions of units delivered globally in the past decade, and the multidecadal relationships with several global customers.
