Commenting on the financial performance of the company, **Mr. Alok Sanghi, Director of Sanghi Industries Ltd.** said, "Our strategy of diversifying sales to markets in Maharashtra and Rajasthan and not depending entirely on Gujarat has begun to pay off as we are able to operate at near full capacity and thus derive higher profit margins. Additionally, cost saving measures like debt reduction, higher captive power generation and increasing utilisation of cheaper sea route for transport of cement have given a further boost to profit margins."

About Sanghi Industries Limited:

Sanghi Industries Limited has emerged as a major cement player in western India over the last few years. Company's 3 million tonnes per annum capacity plant in the Abdasa taluka of Kutch district in Gujarat is ranked as the second largest cement plant at one location in India. It is one of the top 3 players in Gujarat and is now increasing its presence in Maharashtra and Rajasthan.

It was amongst the first few cement players to focus on branding a commodity product like cement in India. Today, the 'Sanghi Cement' brand is a household name across Gujarat. It is now focusing on emulating this success story in the neighbouring states.

Sanghi Industries has several firsts to its credit: first plant in India to install cross belt analyzer for micro analysis of limestone to ensure consistent superior quality of cement. First to install stacker and reclaimer for uniform homogenizing of each raw material and the first plant to have 100% robotic control systems to ensure consistently superior strength and quality of operations. It is only Indian Cement Company to achieve Export House status in the first eight months of commencement of operations. First company in India to have a full fledged infrastructure, from day one, such as 63 MW power plant, own jetty to cater the needs of sea route transportation and road network.
