Dear Sirs,

Sub.: REpower wins 50 MW order for Canadian Wind Projects.

Enclosed please find the copy of the press release in the subject matter.

This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,

For Suzlon Energy Limited

H.A. Kanuga

Hemal A. Kanuga,
Company Secretary.

Encl.: As above.

25th August, 2011

REpower wins 50 MW order for Canadian wind projects

Pune / Hamburg: REpower Systems SE (WKN 617703) – in which Suzlon Energy Limited is the majority shareholder with approximately 95 per cent holding – has concluded a contract with WindWorks Power Corp. for the delivery of a total of 25 wind turbines for five projects in Ontario (Canada). Five MM92 CCV wind turbines (Cold Climate version) are destined for each of the wind farms in Settlers Landing, Snowy Ridge, Grey Highlands, Cloudy Ridge and Clean Breeze, all located in the vicinity of Oshawa (Province of Ontario). The wind farms will generate a total output of more than 50 megawatts.

With a nominal output of 2.05 MW each and a hub height of 100 meters, the turbines are scheduled to be delivered in the spring of 2013 and put into operation in the summer of the same year.

Just one month ago, REpower announced plans to deliver 15 turbines for projects run by WindWorks in Ontario. **Andreas Nauen, CEO of REpower Systems SE** commented: "We are pleased that we have been able to conclude contracts for a total of eight wind farms in Ontario. The Cold Climate version of the REpower MM92, specifically equipped for use in locations with damp weather conditions and major temperature fluctuations, is very well received by the Canadian market." In February 2010, REpower installed two pilot units of this type in Québec (Canada) and has already sold a total of almost 250 CCV version turbines of the MM series in the growing Canadian market.

Helmut Herold, Managing Director of the Canadian REpower subsidiary REpower Systems Inc., stated: "These additional projects with WindWorks show that the collaboration is functioning in an outstanding way. For Ontario, these projects not only serve to expand important renewable energy sources in the region, but also create numerous jobs and help support the local economy."

REpower Systems Inc., the Canadian subsidiary of REpower Systems SE, was founded in 2007 with headquarters in Montréal (Québec) and a sales office in Toronto (Ontario).

About REpower Systems:

REpower Systems SE, a Suzlon Group company, is one of the leading manufacturers of onshore and offshore wind turbines. The international mechanical engineering company develops, produces and markets wind turbines with rated outputs of 1.8 MW to 6.15 MW and rotor diameters of 82 meters to 126 meters for almost any location. The company also offers a comprehensive portfolio of service and maintenance packages. The profitable and reliable systems are designed at the REpower TechCenter in Osterrönfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven as well as Portugal and China.

With just under 2,500 employees worldwide, the company, which has been listed since March 2002 and is headquartered in Hamburg, can make use of the experience gained from the manufacture and installation of around 3,500 wind turbines around the world. REpower is represented by distribution partners, subsidiaries and participations in European markets such as France, Belgium, the UK, Italy, Portugal, Sweden, Poland and Spain as well as on a global level in the USA, China, Australia and Canada.

About Suzlon Group:

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity, at the end of 2010. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with over 17,000 MW of wind energy capacity installed in 28 countries, operations across 32 countries, a workforce of over 13,000 and revenues of approximately US\$ 4 billion. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt on-shore turbines at 600 Kilowatts (KW), to the world's largest commercial 6.15 MW offshore turbine – with a vertically integrated, low-cost, manufacturing base. The Group comprises of Suzlon Energy Limited and its subsidiaries, including REpower Systems SE in which the company currently holds ~95 per cent share.

The Suzlon Group is headquartered at One Earth, a 10.13-acre campus in Pune, India, powered 100 per cent by renewable energy. One Earth has achieved Platinum-level LEED certification, the highest level of green-building certification. Visit us at www.suzlon.com
