For Immediate Release

REpower signs 43.05 MW order with Energiekontor UK

- Two contracts for a total of 21 MM82 – 2.05 MW turbines
- To be supplied to two separate wind farms in the UK

Pune: REpower Systems AG (WKN 617703) – in which Suzlon Energy Limited is a majority shareholder with over 90 per cent holding – signed two contracts with UK based wind energy company, Energiekontor UK Construction Limited. REpower UK will be supplying nine of REpower's MM82 turbines to Energiekontor UK's wind farm at Withernwick in Yorkshire and twelve to Hyndburn wind farm on Oswaldtwistle Moor in Lancashire. The turbines at these sites have a rated capacity of 2.05 megawatts (MW) per turbine.

It is estimated that the twelve turbines at the Hyndburn wind farm will generate around 70 million KWH of electricity per year; equivalent to the estimated electricity requirements of 52 per cent of the households within the Hyndburn area. The total capacity for both wind farms is 43.05 megawatts, enough to power approximately 24,000 homes. The construction is due to start in the second half of 2011 for Hyndburn and the first half of 2012 for Withernwick. The sites are scheduled for completion in 2012.

Mr. Rick Eggleston, Managing Director of REpower UK, said: "We are delighted to be working with Energiekontor UK. We hope that Withernwick and Hyndburn wind farms will mark the beginning of a long and prosperous relationship between the two companies."

Mr. Guy Wilson, Managing Director of Energiekontor UK, commented: "We are pleased to have reached this agreement with REpower. I am sure that we can build on the good relationship that we now have."

The Energiekontor Group has built 74 wind farms to date, comprising of over 450 wind turbines and a total power output of around 500 MW. In total this represents an investment of over Euro 720 million. Energiekontor UK has built two wind farms in the UK and is planning many more projects.

Since its inception in 2003, REpower UK is currently one of UK's fastest growing wind turbine manufacturers, with a 12.3 per cent share of the total wind power market in 2009, and is projected to capture 15-20 per cent market share by the end of 2010. The company has just reached the 500 MW landmark for installed wind turbines, and is now ranked as the fourth largest wind turbine manufacturer in the UK.

About REpower Systems AG:

REpower Systems AG, a Suzlon group company, is one of the leading manufacturers of onshore and offshore wind turbines. The international mechanical engineering company develops, produces and markets wind turbines with rated outputs of 2.05 MW to 6.15 MW and rotor diameters of 82 meters to 126 meters for almost any location. The company also offers a comprehensive portfolio of service and maintenance packages. The profitable and reliable systems are designed at the REpower TechCenter in Osterrönnfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven as well as Portugal and China.

With about 2,000 employees worldwide, the company, which has been listed since March 2002 and is headquartered in Hamburg, can make use of the experience gained from the manufacture and installation of over 2,000 wind turbines around the world. REpower is represented by distribution partners, subsidiaries and participations in European markets such as France, Belgium, the UK, Italy, Portugal and Spain as well as on a global level in the USA, Japan, China, Australia and Canada.

About Suzlon Energy Limited

Suzlon is ranked as the world's third* leading wind turbine supplier in terms of market share in 2009. Suzlon has its corporate offices in Pune, India and company's global spread reflects in its projects and markets portfolio - extending across Asia, Australia, Europe and North and South America. Suzlon is a highly vertically integrated wind turbine manufacturer with manufacturing capability along the full value chain – from components to complete wind turbine systems.
