TAC InfoSec Client Growth Accelerates 37% in Q2 FY27; Adds 1,600 Clients in July–August

TAC Security adds nearly 92% of entire Q1 client subscription in just the first two months of Q2, driven by ESOF, Socify.ai, CyberScope and Government Cybersecurity Business

NEW YORK / MUMBAI — September 2026: TAC InfoSec Limited (**NSE: TAC**), known as **TAC Security**, reported a sharp acceleration in client additions during Q2 FY27, adding **750 clients in July and 850 clients in August**, taking the total for the first two months of the quarter to **1,600 clients**.

In comparison, TAC Security added **1,750 clients during the entire Q1 FY27**, comprising **550 in April, 580 in May and 620 in June**. The average monthly client addition has therefore increased from approximately **578 in Q1 to 793 during July–August — an acceleration of nearly 37%**.

With September still remaining in Q2, the Company has already added nearly **92% of the total clients added during the entire previous quarter**.

The growth is being supported by increasing adoption across TAC Security's key platforms — **ESOF, Socify.ai and CyberScope** — alongside its government and enterprise cybersecurity businesses.

Across **ESOF and Socify.ai**, new clients during July and August included **Amazon Development Centre India, F-Secure, TELUS Health, NAVER Cloud, Massachusetts General Hospital, University of Pennsylvania, University of Florida, University of Washington, University of Illinois Chicago and University of Bern's ARTORG Center**.

The Company also saw renewals from several globally recognized organizations including **Salesforce, HubSpot, Notion, Panasonic Holdings, NTT DOCOMO, CASIO, Freshworks, Xerox, Western Digital, IEEE, NETGEAR, ZoomInfo, PandaDoc and QNAP Systems**.

CyberScope, TAC Security's Web3 security business, continued expanding its footprint with clients including **Metta Protocol, Miracle Labs, ChessChain, RobinFlow, StorageChain, Orbis, SIGNET and Sector** during July and August.

TAC Security's India government business continued engagements with institutions including the **Ministry of Agriculture, DPIIT, National Informatics Centre, ONGC, Gujarat Informatics Limited and IIT Hyderabad**, while its India enterprise business saw new and recurring relationships across organizations including **LBSNAA, Grant Thornton, Hyperface, Protean e-Governance and Reliance-linked entities**.

The Company's earlier growth strategy identified **ESOF, Socify.ai and CyberScope as the three major engines for scaling TAC Security's global client base**, spanning application security, vulnerability management, cybersecurity compliance and Web3 security.

Trishneet Arora, Founder & CEO of TAC Security, said: *"Our client growth is encouraging, but retention is an even stronger validation of our product strength, AI-led innovation and the value we continue to deliver to customers. As we work toward our FY27 revenue guidance of approximately ₹100 crore, our focus is not only on adding new clients, but also on deepening existing relationships through higher retention, broader adoption of ESOF and Socify.ai, and increased revenue per customer. The 37% acceleration in our monthly client-subscription run rate, combined with continued renewals from leading global organizations, reinforces our confidence in the platform-led growth strategy we are executing this year."*

The acceleration supports TAC Security's broader **2030 Bold Vision**, under which the Company is pursuing category leadership across vulnerability management, application security, cybersecurity compliance and Web3 security, supported by increasing investment in AI, automation and global expansion.

TAC Security serves customers across **100+ countries**, with its product-led model designed to support rapid global onboarding across enterprises, technology companies, governments, universities, healthcare institutions and startups.

With 850 client additions in August compared with 550 in April, TAC Security's monthly client-addition pace has increased by more than 50% in just four months — positioning Q2 FY27 as a potentially significant step-up in the Company's global scale-up journey.

TAC InfoSec Limited to Hold AGM on September 30, 2026.

Additionally, TAC Security's AI-led SOC 2 platform took six months to land its first 100 customers, three months for the next 100 and just two months for the latest 100, as the cybersecurity company pursues a 10,000-customer ambition
