TAC InfoSec's Subsidiary CyberScope Partners with VC.FUN to Bring Trusted Security and Auditing Support to Web3 Launches

Web3 Security Firm Cyberscope to Offer Smart-Contract Audit Services to Projects Launching on VCFUN's Web3 Platform

New York & Mumbai, June 8 — Cyberscope, a TAC Security Company (NSE:TAC) one of the largest provider of smart contract auditing and blockchain security solutions, today announced a strategic partnership with VCFUN, a Web3 launchpad focused on helping innovative blockchain projects successfully launch, grow, and build credibility from the outset.

Through this partnership, projects launching through the VCFUN ecosystem will gain access to Cyberscope's smart contract auditing and security solutions. The collaboration is designed to help founders and project teams strengthen trust, improve transparency, and demonstrate a proactive commitment to security before and after launch.

As part of the initiative, projects that complete a Cyberscope audit after launching on VCFUN will receive an audit badge, recognizing their commitment to security and enabling them to showcase credibility to their communities, investors, and ecosystem partners.

By combining VCFUN's launchpad infrastructure and project incubation capabilities with Cyberscope's trusted security expertise, the partnership creates a strong foundation for Web3 founders looking to launch with greater confidence.

*"Security and transparency are critical to building long-term trust in Web3," said **Cyberscope Spokesperson Cindy Zekio, Vice President of Business Engagement** "Through our partnership with VCFUN, we are making trusted auditing and security resources more accessible to emerging projects at one of the most important stages of their journey: launch."*

*"We are proud to partner with Cyberscope, Web3 Security firm focused on top-level security and a verified audit partner of CoinMarketCap and CoinGecko," said **VCFUN Spokesperson**, "Founders and teams launching on VCFUN will have access to top-tier auditing and security support, helping ensure their launch and project are built on a stronger foundation."*

Together, VCFUN and Cyberscope aim to support a safer and more trusted blockchain ecosystem by making high-quality auditing and security resources more accessible to emerging Web3 projects.

This partnership further reinforces Cyberscope's continued momentum in advancing trust, transparency, and security across the global Web3 ecosystem.

About VCFUN

VCFUN is a Web3 launchpad focused on helping innovative blockchain projects successfully launch, grow, and connect with their communities. Through its launchpad infrastructure and project support capabilities, VCFUN enables founders and teams to bring new ideas to market with greater visibility and momentum.

About Cyberscope Web3 Security, Inc.

Cyberscope, a TAC Security Company, is a leading provider of Web3 Security, smart contract auditing, and compliance solutions, serving a global client base across the decentralized finance, blockchain, and digital asset sectors. Founded in 2023, the company has completed over 2,700 smart contract audits and 500+ KYC verifications, securing more than \$2 billion in digital assets for over 3,000 clients. Cyberscope's proprietary tools combine automated and manual analysis to deliver rapid, high-quality security assessments recognized by major industry platforms such as CoinMarketCap, PinkSale, and DxSale. With a reputation for quality, speed, and trust, and backed by the resources and global reach of TAC Security, Cyberscope is positioned to set new standards for security, transparency, and compliance in the rapidly evolving Web3 ecosystem.

About TAC Security (TAC InfoSec Limited) – NSE: TAC

TAC Security is a publicly listed global cybersecurity company specializing in vulnerability management. Serving 10,000+ clients across 100+ countries, the company is among the world's largest vulnerability management providers by client count. Its flagship platform, ESOF (Enterprise Security in One Framework), enables cyber risk quantification, vulnerability assessment, and AI-driven security analysis. TAC Security holds certifications including CREST, and ISO standards, and partners with global technology companies such as Google, Microsoft, and Meta.
