Cyberscope Partners with Ment Tech to Strengthen Web3 Security and Blockchain Technology Capabilities

The partnership brings together Cyberscope's Web3 security expertise and Ment Tech's blockchain development, AI-powered technology, crypto infrastructure, and tokenization capabilities to support businesses across the digital asset ecosystem.

New York, New York (November 18, 2026) - Cyberscope, a Web3 security and a TAC Security company, has entered into a strategic partnership with Ment Tech to support the development of a more secure, reliable, and scalable digital asset ecosystem.

The partnership combines Cyberscope's expertise in smart contract security audits, penetration testing, KYC, compliance, and blockchain risk intelligence with Ment Tech's capabilities in AI-powered platforms, blockchain applications, crypto infrastructure, and real-world asset (RWA) tokenization solutions.

Ment Tech's technology portfolio spans centralized crypto exchanges, digital and crypto banking platforms, trading applications, and tokenization platforms. By bringing together these complementary capabilities, the collaboration aims to create opportunities for businesses to access both technology development expertise and security services as they build, launch, and scale their digital asset projects.

As blockchain adoption continues to expand across industries, businesses increasingly require reliable technology infrastructure alongside robust security and risk assessment capabilities. Through this partnership, Cyberscope and Ment Tech aim to bridge this requirement by connecting relevant projects with complementary expertise throughout their development and growth journey.

The collaboration will explore mutual referrals, client introductions, and broader ecosystem opportunities, enabling both organizations to connect businesses with relevant solutions based on their technology and security requirements.

"Strong partnerships are built on shared expertise, aligned goals, and a commitment to delivering meaningful value to customers. Through this partnership with Cyberscope, we aim to connect businesses with the right technology expertise and solutions to address their evolving needs. By combining our strengths and networks, we look forward to creating new opportunities, accelerating innovation, and helping businesses turn their technology goals into reality."

Strengthening the Web3 Technology and Security Ecosystem

The partnership reflects a shared objective of strengthening collaboration between blockchain technology development and Web3 security. While Ment Tech focuses on building blockchain applications, crypto infrastructure, AI-powered platforms, and tokenization solutions, Cyberscope brings the security expertise required to assess vulnerabilities, strengthen applications, and address emerging risks.

By connecting these capabilities, both organizations aim to support businesses in addressing technology and security requirements at different stages of their journey, from product development and deployment to expansion and long-term operations.

Through mutual referrals and collaboration opportunities, Cyberscope and Ment Tech seek to create greater value for their respective customer networks while contributing to stronger security practices, continued innovation, and sustainable growth across the digital asset ecosystem.

About Ment Tech

Ment Tech develops AI-powered platforms, blockchain applications, crypto infrastructure, and real-world asset (RWA) tokenization solutions. Its portfolio includes centralized crypto exchanges, digital and crypto banking platforms, trading applications, and tokenization platforms, supporting businesses in building and advancing their digital technology capabilities.

About Cyberscope

Cyberscope, the Web3 Security division of **TAC InfoSec Limited (NSE: TAC)**, is a global blockchain security company specializing in smart contract audits, AI-powered threat detection, token security analysis, and decentralized application security. Having performed **2,700+ smart contract audits**, Cyberscope helps organizations and investors identify vulnerabilities, strengthen blockchain security, and build trust across decentralized ecosystems. Its flagship platform, **Cyberscan AI**, leverages artificial intelligence to provide instant smart contract analysis, risk scoring, real-time threat intelligence, and proactive security insights for Web3 users and projects.
