Cyberscope Partners with Crystal Intelligence to Strengthen Digital Asset Security and Blockchain Intelligence

The collaboration combines Cyberscope's Web3 security expertise with Crystal Intelligence's blockchain analytics and investigative capabilities to support a more secure, transparent, and trusted digital asset ecosystem.

New York, 16th Nov 2026 - Cyberscope, a TAC Security Company, has partnered with Crystal Intelligence, a blockchain intelligence provider, to strengthen security, transparency, and trust across the digital asset ecosystem.

The partnership brings together Cyberscope's expertise in smart contract security audits and risk assessment with Crystal Intelligence's capabilities in blockchain analytics, transaction monitoring, and investigations. By combining these complementary strengths, the collaboration aims to help businesses identify vulnerabilities, assess digital asset risks, detect threats, and investigate suspicious on-chain activities more effectively.

As the digital asset ecosystem continues to evolve, organizations face the dual challenge of preventing security vulnerabilities and identifying potentially illicit or suspicious blockchain activity. Through this partnership, Cyberscope and Crystal Intelligence aim to address these challenges across the digital asset risk lifecycle, connecting proactive security assessments with blockchain intelligence and investigative capabilities.

The collaboration is designed to support businesses in making more informed decisions, strengthening risk management practices, and improving visibility into potential threats. By bringing together Web3 security and blockchain intelligence, both organizations seek to contribute to greater transparency and confidence in the adoption of digital assets.

"Building a safer Web3 ecosystem requires security and intelligence to work hand in hand. Our partnership with Crystal brings together Cyberscope's Web3 security expertise with Crystal's blockchain intelligence capabilities, enabling both organizations to deliver greater value and stronger protection to their customers. Together, we're advancing a more secure, transparent, and trusted digital asset ecosystem." **Spokesperson, Cyberscope**.

"Protecting digital assets means spotting threats before they happen and following the funds after they do. Our partnership with Cyberscope pairs their Web3 security audits with Crystal's decision intelligence, putting verified evidence in front of every decision our customers make across the risk lifecycle, from smart contract security to transaction monitoring and

investigations. Together, we're helping make trust and safety standard in digital assets."
Spokesperson, Crystal Intelligence.

Through this partnership, Cyberscope and Crystal Intelligence aim to provide businesses with a more comprehensive approach to digital asset security and risk management. Cyberscope's smart contract auditing and security assessment capabilities complement Crystal Intelligence's blockchain analytics and investigative tools, supporting organizations in addressing risks from vulnerability identification to suspicious transaction investigations.

The collaboration reflects a shared focus on strengthening the infrastructure of trust across the digital asset ecosystem. By combining security expertise with blockchain intelligence, both organizations aim to help businesses navigate emerging threats, improve risk visibility, and support the responsible growth of the Web3 and digital asset sectors.

About Crystal Intelligence

Crystal Intelligence provides blockchain intelligence solutions, including blockchain analytics, transaction monitoring, and investigative capabilities, to support organizations in identifying risks and examining suspicious activity across the digital asset ecosystem.

About Cyberscope

Cyberscope, the Web3 Security division of **TAC InfoSec Limited (NSE: TAC)**, is a global blockchain security company specializing in smart contract audits, AI-powered threat detection, token security analysis, and decentralized application security. Having performed **2,700+ smart contract audits**, Cyberscope helps organizations and investors identify vulnerabilities, strengthen blockchain security, and build trust across decentralized ecosystems. Its flagship platform, **Cyberscan AI**, leverages artificial intelligence to provide instant smart contract analysis, risk scoring, real-time threat intelligence, and proactive security insights for Web3 users and projects.

About TAC Security (TAC InfoSec Limited) – NSE: TAC

TAC Security is a publicly listed global cybersecurity company specializing in vulnerability management. Serving **10,000+ clients across 100+ countries**, the company is among the world's largest vulnerability management providers by client count. Its flagship platform, **ESOF (Enterprise Security in One Framework)**, enables cyber risk quantification, vulnerability assessment, and AI-driven security analysis. TAC Security holds certifications including **CREST**
