TAKE Solutions to build a Scalable Unified AI Platform, aligning with the IndiaAI Mission to Transform the USD 370 billion National Healthcare Ecosystem

Positioned to Drive Inclusive Healthcare Delivery and Support the Vision of 'Viksit Bharat' Through Democratized AI Access

Chennai, 17th Feb 2026 – Against the backdrop of the ongoing India AI Impact Summit 2026 in New Delhi, TAKE Solutions Limited today announced its strategic plan to develop a comprehensive Unified AI Platform. Designed to revolutionize the healthcare ecosystem, the platform serves as a one-stop digital infrastructure layer enabling hospitals, diagnostic laboratories, clinical trial organizations, and clinics to seamlessly adopt and deploy artificial intelligence solutions.

This initiative marks a transformational step in TAKE Solutions' evolution, deeply aligned with the Government of India's push to position AI as a critical development tool for societal good. As the nation focuses on unlocking a USD 370 billion healthcare sector and a USD 197 billion preventive healthcare opportunity, this platform mirrors the summit's core theme of "Sarvajana Hitaya, Sarvajana Sukhaya" (welfare and happiness for all) by ensuring advanced technology reaches every citizen.
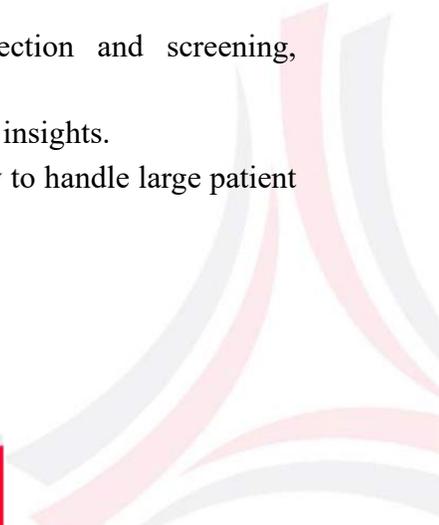

Democratizing AI for Healthcare Providers: Echoing the government's priority of building scalable digital public infrastructure and bridging healthcare delivery gaps, the planned platform will function as a comprehensive Healthcare AI Marketplace and Integration Layer. It empowers healthcare providers across both urban centers and underserved communities to seamlessly access, deploy, and manage a wide range of AI-powered applications through a single, unified integration. By significantly reducing technology adoption barriers, implementation complexity, and upfront investment requirements, the platform supports the national mandate for affordable, accessible care. It is designed to support multiple healthcare use cases critical to public and private health, including:

- Diagnostics and pathology automation: Empowering early detection and screening, effectively bridging specialist shortages.
- Clinical decision support systems: Assisting doctors with data-driven insights.
- Hospital workflow and operational automation: Enhancing efficiency to handle large patient volumes while reducing costs.
- Clinical trial optimization and patient data intelligence.
- Preventive healthcare and proactive care scaling.

Driving Impact and Sustainable Growth: With global and domestic healthcare entering a technology-driven era—and the global AI in healthcare market expected to exceed USD 180 billion by 2030—TAKE Solutions is establishing itself as a pivotal enabler of India's AI-led healthcare transformation.

Healthcare providers are rapidly increasing technology spending to improve clinical outcomes, creating a massive opportunity for platforms that can deliver scalable, real-world impact. By offering an integrated AI marketplace, TAKE Solutions aims to onboard a large base of healthcare providers, generating scalable revenues while directly supporting the nation's broader socio-economic goals of inclusive growth and technological self-reliance under the IndiaAI Mission.

About Take Solutions: Take Solutions is a global technology company delivering domain-intensive solutions and services for the life sciences and supply chain industries. With deep expertise in building scalable digital platforms and data-driven solutions, the company focuses on enabling enterprises to improve efficiency, compliance, and decision-making. Through its expanding investments in AI, analytics, and digital health technologies, Take Solutions is positioning itself to participate in the next wave of innovation, ensuring its solutions address human-centric challenges across healthcare and other knowledge-led industries.
