## Press Release

### **TAKE Solutions Taps Anthropic to Accelerate AI Dominance in \$370B Healthcare Sector**

Strengthening platform efficiency and scalability to drive AI-led healthcare expansion

**Chennai, 21<sup>st</sup> Feb 2026** – Take Solutions Limited, a global AI-driven healthcare Company, today announced the integration of advanced artificial intelligence capabilities powered by Anthropic’s Claude. This strategic technology adoption marks a significant milestone in Take Solution’s ongoing mission to build scalable, intelligent, and preventive healthcare platforms designed to improve outcomes, enhance efficiency, and enable data-driven healthcare delivery.

The integration of Anthropic’s Claude advanced AI capabilities will strengthen Take Solution’s upcoming platforms, including its AI-driven Preventive Healthcare Platform, One Minute Clinic, and its Unified AI Marketplace. These platforms are being designed to transition healthcare from a reactive treatment model to a predictive and preventive care ecosystem.

By embedding advanced AI across its platforms, Take Solutions aims to:

- Enhance clinical decision intelligence through faster and more accurate data analysis
- Improve productivity across healthcare workflows, diagnostics, and patient engagement
- Deliver highly personalized health insights and preventive care recommendations
- Enable seamless integration of AI applications through its Unified AI Marketplace
- Scale its One Minute Clinic model to provide faster, intelligent, and accessible healthcare services

The company’s Unified AI Marketplace is envisioned as a scalable platform enabling healthcare stakeholders, including hospitals, diagnostic centers, pharmaceutical companies, and wellness providers, to access and deploy AI solutions efficiently. The addition of Anthropic capabilities significantly strengthens the platform’s ability to process complex medical, clinical, and operational data securely and at scale.

Similarly, Take Solution’s Preventive Healthcare Platform leverages artificial intelligence to identify early health risks, recommend corrective actions, and enable proactive healthcare management, addressing one of the fastest-growing segments of the global healthcare industry.

The One Minute Clinic initiative, designed to deliver rapid health assessments and intelligent recommendations, will also benefit from enhanced AI capabilities, enabling faster report generation, improved accuracy, and better patient experience.

*"Artificial intelligence is becoming the foundation of next-generation healthcare. The integration of advanced Claude AI capabilities significantly enhances our technology stack and strengthens our ability to build scalable, intelligent healthcare platforms. This advancement will improve operational efficiency, accelerate innovation, and support our vision of transforming healthcare through predictive and preventive intelligence."* **Said Mr. Parmeshvar Dhangare, Chairman of Take Solutions.**

### **Strategic Significance**

The global healthcare industry is undergoing a structural shift toward AI-enabled preventive care, digital diagnostics, and intelligent healthcare platforms. With its continued investments in advanced AI infrastructure, Take Solutions is positioning itself at the forefront of this transformation.

By strengthening its AI ecosystem, the company is building scalable platforms designed to serve large healthcare networks, diagnostic providers, and life sciences organizations globally.

### **About Take Solutions:**

Take Solutions is a global technology company delivering domain-intensive solutions and services for the life sciences and supply chain industries. With deep expertise in building scalable digital platforms and data-driven solutions, the company focuses on enabling enterprises to improve efficiency, compliance, and decision-making. Through its expanding investments in AI, analytics, and digital health technologies, Take Solutions is positioning itself to participate in the next wave of innovation, ensuring its solutions address human-centric challenges across healthcare and other knowledge-led industries.
