Tata Communications provides Visteon with a fully managed software-defined wide-area network

Tata Communications earns supplier recognition from cockpit electronics leader Visteon Corporation

Matawan, NJ, US, November 18th 2019 - [Tata Communications](#), a leading global digital infrastructure provider, was recognized as a top supplier to Visteon Corporation (NASDAQ: VC), a global leader in automotive cockpit electronics, at Visteon's Strategic Supplier Conference on Oct. 16 in Dearborn, Michigan. Tata Communications was named Best Indirect Supplier during an awards ceremony at The Henry Ford Museum, attended by more than 135 representatives from 65 global Visteon strategic suppliers, as well as senior leaders from Visteon.

With a next-generation hybrid network and Tata Communications IZO™ SDWAN, Visteon has been able to become more agile without compromising security. This has led to an enhanced customer experience, more seamless collaboration and greater business flexibility. It has also lowered the barriers for Visteon to expand to new geographies, including emerging markets like China.

Raman Mehta, Visteon Vice President and Chief Information Officer, said: *"Visteon has been intensely focused on modernizing our network for the past two years. Tata Communications has been a trusted supplier partner during this journey. Tata Communications provides Visteon with a fully managed software-defined, wide-area network, or SD-WAN. Their capable handling of this activity allows Visteon to focus on developing customer-facing technology for the future. Similarly, by using Tata Communications' globally managed UC platform, our design, engineering and manufacturing teams can collaborate more effectively and efficiently to achieve our strategic objectives."*

A new award for 2019, Best Indirect Supplier, recognized a supplier providing services not directly related to the design or production of Visteon products, but nonetheless critical to Visteon's success.

"Our suppliers are critical to the success of Visteon as a technology-focused leader in cockpit electronics, especially as the cockpit becomes more digital and the industry transitions to electric and automated vehicles," said **Visteon President and CEO Sachin Lawande**. *"Each of the suppliers recognized by Visteon has contributed significantly to our ability to develop and deliver innovative, high-quality solutions for global automakers - quickly and at competitive costs."*

"Global businesses need an agile, reliable digital infrastructure to enable them to operate more seamlessly and efficiently across country borders," said **Pathmal Gunawardana, Head of Americas, Tata Communications**. *"The software-defined hybrid network and unified communications platform we are delivering for Visteon helps the company focus on its innovation agenda, and enhance business flexibility as it explores new growth opportunities in new geographies worldwide. We are honored to have been recognized by Visteon for our role in advancing the quality and technology of cockpit electronics in vehicles, which is one of the fastest-growing and most important segments in the automotive industry."*

Winning suppliers received a crystal award with an embedded 3D image of two hands clasped in a handshake - symbolizing the mutual cooperation and partnership between Visteon and its suppliers.

Ends...

For immediate release**PRESS RELEASE****About Tata Communications**

Tata Communications is a leading global digital infrastructure provider that powers today's fast-growing digital economy.

The company's customers represent 300 of the Fortune 500 whose digital transformation journeys are enabled by its portfolio of integrated, globally managed services that deliver local customer experiences. Through its network, cloud, mobility, Internet of Things (IoT), collaboration and security services, Tata Communications carries around 30% of the world's internet routes and connects businesses to 60% of the world's cloud giants and 4 out of 5 mobile subscribers.

The company's capabilities are underpinned by its global network, which is the world's largest wholly owned subsea fibre backbone and a Tier-1 IP network.

Tata Communications Limited is listed on the Bombay Stock Exchange and the National Stock Exchange of India, and it serves customers in more than 200 countries and territories worldwide through its technology capabilities and partnerships.

Forward-looking and cautionary statements

Certain words and statements in this release concerning Tata Communications and its prospects, and other statements, including those relating to Tata Communications' expected financial position, business strategy, the future development of Tata Communications' operations, and the general economy in India, are forward-looking statements. Such statements involve known and unknown risks, uncertainties and other factors, including financial, regulatory and environmental, as well as those relating to industry growth and trend projections, which may cause actual results, performance or achievements of Tata Communications, or industry results, to differ materially from those expressed or implied by such forward-looking statements. The important factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements include, among others, failure to increase the volume of traffic on Tata Communications' network; failure to develop new products and services that meet customer demands and generate acceptable margins; failure to successfully complete commercial testing of new technology and information systems to support new products and services, including voice transmission services; failure to stabilize or reduce the rate of price compression on certain of the company's communications services; failure to integrate strategic acquisitions and changes in government policies or regulations of India and, in particular, changes relating to the administration of Tata Communications' industry; and, in general, the economic, business and credit conditions in India. Additional factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements, many of which are not in Tata Communications' control, include, but are not limited to, those risk factors discussed in Tata Communications Limited's Annual Reports. The Annual Reports of Tata Communications Limited are available at www.tatacommunications.com. Tata Communications is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements.
