Rlys to surpass freight target for FY19

SHINE JACOB
New Delhi, 28 March

FREIGHT TRAFFIC

The Indian Railways has set a record by handling 1,175 million tonnes (mt) of freight till the middle of March in 2018-19, surpassing 1,160 mt in the previous fiscal year.

The transporter has handled incremental freight traffic of 54.14 mt from April to February in 2018-19.

At this pace, the railways is expected to surpass the revised freight target of 1,216 mt for the current fiscal year.

"By February, we handled an additional 54 mt, compared to the same period last year. The addition is mainly from coal, where the incremental traffic was 45 mt by the middle of March," said an official.

From April to February 2018-19, the railways handled additional traffic of 5.16 per cent, totalling 1,103.53 mt against 1,049.39 mt during the same period last year. Freight earnings for the year have till now increased 11 per cent to ₹1.23 trillion.

"This is a major achievement considering the fact that freight traffic remained almost static for several years," he said. Freight traffic was at 1,107 mt in 2016-17 and 1,104 mt in 2015-16.

Compared to loss-making passenger traffic, the freight segment is the major revenue earner for the railways, contributing to around 65 per cent of its earnings. The official said several initiatives including freight rationalisation, classifying new commodities, expanding the freight basket, and entering into long-term tariff contracts with key freight customers helped the railways.

Other measures taken by the Railway Board to increase freight revenue include increase in freight rates of coal and RMSP (raw material for steel plants) by 8.75 per cent and increase in the haulage charge of container trains by 5 per cent in late 2018.

Passenger reservation earnings increased by 7.02 per cent to ₹34,721 crore.

The railways is targeting increasing its share in freight traffic from 33 per cent to over 40 per cent by 2022. The freight business is backed by commodities like coal, iron, cement, steel, food grains, fertilisers, and petroleum products.

According to the data available with the railways, during the current financial year, it handled 21 per cent more coal, touching 660 mt so far. Among the other commodities, major increases came from the container and iron/steel segments, where the increase was 22 per cent and 19 per cent respectively. The increase in coal traffic has helped the power sector in that there are now no thermal power plants with critical coal stocks.

Source: CRISIL Research

Rating agency CRISIL expects a sharp slowdown in India Inc's top line growth during the fourth quarter, driven by lower commodity prices. According to the rating agency, recent decline in prices will translate into lower prices for commodity producers, leading to a moderation in overall top line growth.

CRISIL Research expects 8 to 9 per cent year-on-year (YoY) revenue growth for corporate, ex-financials and energy in the fourth quarter of fiscal 2019 against an average growth of around 16.5 per cent during the first three quarters of FY19.

The forecast is based on CRISIL Research's analysis of 354 companies, which account for 67 per cent of the market capitalisation of the National Stock Exchange, excluding banking, financial services and insurance (BFSI) and oil sectors.

For a much larger sample of 1,991 companies covered by *Business Standard* — financials and energy — net sales were up 13.5 per cent YoY during the April-December 2018 period against 7.6 per cent YoY growth during the corresponding period a year ago. In comparison, the operating profit of companies was 7 per cent during the period against 4.9 per cent YoY growth a year-ago period.

"Sectors linked to commodities and infrastructure had been supporting revenue growth for the past few quarters. However, this trend has reversed in the fiscal fourth quarter. Steel, aluminium, natural gas and petrochemicals are expected to witness lower realisations YoY, and sectors such as construction and capital goods are also likely to grow slower," says Prasad Koparkar, senior director, CRISIL Research.

Besides consumer demand-driven sectors such as automobiles continues to reel under demand slowdown given higher cost of ownership and new axle norms, among other factors, he says.

The decline in revenue growth, though, would be cushioned by other consumer sectors.

Among others, retail has support from positive demand sentiment, while airline services stand to benefit from a sharp increase in domestic fares this quarter.

Export-linked sectors such as information technology (IT) services and pharmaceuticals, on their part, stand to gain from a weakening in the rupee on a YoY basis, though it has strengthened quarter-on-quarter.

"Consumer segments such as airline services and organised retail are expected to grow in the range of 15-20 per cent YoY," says CRISIL.

A decline in rupee, on the other hand, is likely to benefit export-driven sectors such as IT.

"The rupee is expected to be 10 per cent weaker on year, which will boost export-oriented sectors such as IT services and pharmaceuticals that are projected to grow 17 per cent and 11 per cent on YoY basis."

With lower top line growth, India Inc is staring at dampened profitability at the operating level. Growth in operating profit or earnings before interest, tax, depreciation and amortisation is expected to print lower, at 7 per cent YoY compared with an average 13 per cent YoY growth in the preceding three quarters.

The rating agency expects India Inc margin to contract up to 50 basis points (bps) on-year for the quarter as top line shrinks. On a quarter-on-quarter basis, though, margins will show an improvement of 70 bps because of lower input costs. Growth in the fourth quarter comes on a high base as the year-ago period had seen healthy 12 per cent revenue growth against 7 per cent growth in the first half of the last financial year.

Home loan queries at finance firms down 7.9% in Dec quarter

ABHIJIT LELE
Mumbai, 28 March

LIQUIDITY STRESS

NBFC home loan enquiries (YOY growth in %)

Enquiries for home loans at non-banking financial companies (NBFCs), which include housing finance companies, dropped 7.9 per cent in the quarter ended December 2018, according to a CIBIL report, showing the effect of liquidity crunch on finance companies in the wake of payment defaults by IL&FS group firms. Such enquiries had grown 45.4 per cent year-on-year in the fourth quarter of 2017.

In the case of banks, however, home loan enquiries showed a year-on-year increase of 9.3 per cent, according to the CIBIL CYQ4 2018 Industry Insights Report (IIR).

Yogendra Singh, vice-president of data science and analytics for TransUnion CIBIL, said the decline in home loan enquiries at NBFCs could largely be attributed to the supply side liquidity/ funding crunch faced by the segment. "The demand (from customers for loans) has not contracted. It is an issue of supply (of funds) when NBFCs are going through a course correction," he said.

The NBFC segment is expected to show a rapid recovery in home loans over the next two quarters with the reforms underway across the segment. This trend bodes well as NBFCs contribute significantly to driving financial inclusion and access to credit, Singh said.

NBFCs have been a significant part of overall consumer lending growth in recent years. But as the global economy slows and the non-bank financial market matures, there are early signs this sector is starting to cool.

The retail lending market is not immune to these trends and has started exhibiting deceleration. Aggregate retail lending growth in value terms (balance outstanding) has declined from 27.4 per cent in Q1 2018 to around 19 per cent in Q4 2018.

"Although we do expect continued growth amongst non-bank lenders, it is anticipated this could be at a more moderate rate. If this does happen, it will be interesting to see how this important part of the consumer credit markets adjusts, and to what extent banks step in to capture a greater share of the market," CIBIL said.

In recent years, India has experienced a transformation of the consumer mindset from a savings-focused and debt-averse country to a more consumption-focused, leveraged economy.

The rate of change has been, and still is, significant, and is due to multiple factors: changing demographics, urbanisation, rising digitalisation and the subsequent rise of e-commerce, improved access to retail lending. Accompanying this has also been a specific increase in the proportion of short-term, smaller-sized loans – often by NBFC lenders, which include housing finance companies (HFCs), the report said.

Merchandise exports at $330 bn in FY19: Prabhu

SUBHAYAN CHAKRABORTY
New Delhi, 28 March

Merchandise exports will be about $330 billion in the current fiscal year, Commerce and Industry Minister Suresh Prabhu said on Thursday. This will be lower than the $350-billion target internally set by the commerce department.

Exports have consistently been unable to meet the commerce department's annual trade growth forecast. Speaking at a meet with diplomats from the European Union and the Oceania region, Prabhu said India's exports have risen despite global uncertainties in the early part of 2018-19 (FY19).

While petrochemicals, jewellery, and apparel remain major export sectors, newer segments such as agri products have been successfully pushed, officials said.

India shipped out more than 610 million tonnes of agricultural produce in FY19.

In the last fiscal year, total exports stood at $302.84 billion, below the government's target of $310 billion, while it was $275.85 billion in the year before.

India's annual exports remained above the $300-billion mark till 2014-15, but declined to $262.29 billion in 2015-16 due to global slowdown. Exports had reached a high of $314.4 billion in 2013-14. In the current fiscal year, the country has seen services exports worth $200 billion, Prabhu added.
