PRESS NOTE

Taurian MPS Positioned to Explore Opportunities Under India's ₹2,814 Crore Critical Mineral Processing Initiative

Company's established mineral beneficiation and processing capabilities provide a strong foundation to participate in India's growing domestic mineral processing ecosystem.

Mumbai, November 5, 2026: Taurian MPS Limited, a specialized engineering manufacturer of high-quality crushing, screening, washing, material-handling and mineral-processing equipment, sees emerging business opportunities following the Union Cabinet's approval of the **₹2,814 crore "Capex Support Scheme to Promote Critical Mineral Processing"**, aimed at strengthening India's domestic lithium and nickel processing infrastructure.

Announced on November 4, 2026, the initiative provides capital subsidies of up to 30% on eligible investments towards establishing four critical mineral processing plants, to encourage domestic processing, reduce import dependence and strengthen India's critical minerals value chain.

Emerging Opportunities for Taurian MPS

The development could create opportunities for domestic equipment manufacturers supplying crushing, screening, washing, classification, dewatering and material-handling solutions, depending on individual project requirements.

Taurian MPS, with its established engineering capabilities, diversified equipment portfolio and experience in integrated mineral processing solutions, is positioned to explore these opportunities. The company's advanced FRAC series, incorporating hydrocyclone-based classification, washing and dewatering systems, demonstrates its expertise in specialised mineral beneficiation applications.

Importantly, **Taurian has already supplied beneficiation equipment for silica sand processing**, including applications associated with semiconductor-related materials. This experience highlights the company's capabilities beyond conventional aggregate processing and its potential relevance to emerging high-value industrial mineral applications.

Building on India's Critical Minerals Opportunity

With the government's Capex Support Scheme expected to encourage investment in domestic processing facilities, Taurian intends to leverage its existing product portfolio, application-specific engineering capabilities and project execution experience to pursue relevant equipment supply opportunities.

The initiative represents a potential long-term growth avenue for domestic mineral processing equipment manufacturers, with Taurian seeking to strengthen its presence in higher-value mineral beneficiation applications.

About Taurian MPS Limited:

Taurian MPS designs and manufactures a comprehensive range of crushing, screening and mineral-processing equipment including jaw, cone and vertical shaft impact (VSI) crushers, track-mounted mobile plants, and washing and classification systems serving aggregate producers, stone-crushing operators and mineral-processing customers across India and international markets.

Founded in 2010 and headquartered in Mumbai, the Company began by supplying aggregates and spare parts before transitioning into full-scale manufacturing under the Taurian brand. Its manufacturing base in Roorkee, Haridwar (Uttarakhand), has supported over 2,000 installations across 20+ countries through a global dealer network of 25+ partners, with a presence spanning Uttarakhand, Karnataka, Chhattisgarh, Rajasthan, Gujarat, Maharashtra and several other Indian states, alongside export markets in the Gulf, the Caribbean and the Americas.
