Taurian MPS Strengthens In-House Mineral Processing Expertise with Appointment of Industry Veteran Mr. Sanjeev Singhal

Mumbai, September 29, 2026: Taurian MPS Limited, a specialized engineering manufacturer of high-quality crushing, screening, washing, material-handling and mineral-processing equipment, has announced the appointment of **Mr. Sanjeev Singhal as Vice President- Minerals**, strengthening its **senior leadership team** as the Company looks to expand its presence across the minerals processing segment in India and international markets.

Mr. Singhal brings **more than 27 years of industry experience** across crushing, screening, mineral processing, washing and water recycling technologies. He is an alumnus of the **Indian Institute of Technology (B.H.U.), Varanasi** and has built his career across technical, entrepreneurial and leadership roles in the mineral processing industry.

Prior to joining Taurian MPS, Mr. Singhal founded and led **Starke Minerals** and has held key leadership positions at **Propel Industries and Nawa Engineers**. His experience across product applications, customer requirements and mineral processing solutions is expected to support Taurian MPS as it strengthens its Minerals division and builds deeper relationships across the industry.

The appointment comes at a time when Taurian MPS is working towards a larger opportunity in the crushing, screening and mineral processing equipment market. The Company believes that building a strong in-house leadership and technical team will be important as it expands its product portfolio, addresses larger projects and strengthens its position against established domestic as well as global equipment manufacturers.

Speaking on this appointment, Mr. Yashvardhan Sumit Bajla, Managing Director, Taurian MPS Limited, said: *“Our growth strategy is very clear. We see a large addressable market ahead of us, both in India and Internationally, and we want Taurian MPS to build the capabilities required to participate meaningfully in this opportunity.*

As we grow, our focus is not only on increasing capacity or adding products. We are equally focused on bringing experienced professionals into the organisation who understand the industry, technology and customer requirements at a much deeper level. Mr. Sanjeev brings over 27 years of relevant experience and has worked closely across the mineral processing ecosystem.

Today, we are competing in a market where several globally established MNCs have operated for decades. To build relevance alongside these companies, we need strong engineering, strong products and, most importantly, experienced people within the organisation. Having this capability in-house is something we are proud of.

Sanjeev's appointment is another step in that direction. We have been steadily adding experienced senior professionals across key functions, and we intend to continue strengthening our leadership and technical teams as the business scales."

About Taurian MPS Limited:

Taurian MPS designs and manufactures a comprehensive range of crushing, screening and mineral-processing equipment including jaw, cone and vertical shaft impact (VSI) crushers, track-mounted mobile plants, and washing and classification systems serving aggregate producers, stone-crushing operators and mineral-processing customers across India and international markets.

Founded in 2010 and headquartered in Mumbai, the Company began by supplying aggregates and spare parts before transitioning into full-scale manufacturing under the Taurian brand. Its manufacturing base in Roorkee, Haridwar (Uttarakhand), has supported over 2,000 installations across 20+ countries through a global dealer network of 25+ partners, with a presence spanning Uttarakhand, Karnataka, Chhattisgarh, Rajasthan, Gujarat, Maharashtra and several other Indian states, alongside export markets in the Gulf, the Caribbean and the Americas.
