Royal Academy of Engineering of Spain and TCS Partner to Transform Education with New Digital Framework

Tata Consultancy Services Will Contribute to the 'Forum for the Digitalization of Higher Education' So Students and Teachers Can Access the Latest Educational Models and Digital Learning Services

MADRID | MUMBAI, November 3, 2021: Tata Consultancy Services (TCS) (BSE: 532540, NSE: TCS), a leading global IT services, consulting and business solutions organization, and the Royal Academy of Engineering of Spain have partnered to develop a new innovative digital framework that will provide online access to the latest learning support services and enhance collaboration between global educational professionals.

TCS will leverage its deep domain knowledge and digital transformation expertise to build and deploy 'Forum for the Digitalization of Higher Education' (FDHE), a framework for Spanish and worldwide universities to digitalize all touchpoints throughout the student lifecycle, from admissions, campus management, and learning management to exam administration, assessments, results management, and student communications.

The new digital FDHE framework will streamline university campus operations, drive greater speed and transparency in assessments, and enhance student and educator experience. It will also drive greater international student enrollment and provide online access to the latest digital learning services, helping Spanish engineering institutions expand into global markets. Further, it will encourage better engagement among candidates, students, and alumnus.

In addition, Royal Academy of Engineering of Spain and TCS will create an executive governance board that will work closely with government representatives and university professionals in Spain and worldwide to create highly engaging learning experiences for higher education leaders, teachers, and students. The board will also work with industry sponsors to promote equity and inclusivity across all schools, colleges, and universities.

"Our work alongside TCS is a very important initiative, not just to provide better value for engineering students across Spain but to reimagine the learning experience for a wider market of international students and educational professionals," said **Javier Pérez de Vargas Cabrero, Managing Director, Royal Academy of Engineering, Spain**. *"The new FDHE framework will not only uphold the highest standards of the Academy but optimize university administrative processes and boost student satisfaction levels across the global education sector."*

Ankur Mathur, Head, Education Business, TCS, said, "*We are pleased to partner with Royal Academy of Engineering of Spain in this strategic initiative of national and global importance, to digitally reimagine higher education, and enhance experiences and outcomes for students as well as educators. Our deep domain knowledge, partnerships with academia, and investments in intellectual property position us very well to accelerate digital transformation in the European education sector."*

As part of this partnership, TCS and the Royal Academy of Engineering of Spain will host a series of interactive events, meetings, webinars, and roundtables for schools, colleges, universities, and technical learning institutions. These sessions will provide valuable insights on how innovations in digital learning can be leveraged to transform the education experience for a global community of students and learning professionals.

About Tata Consultancy Services

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for over 50 years. TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile™ delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 528,000 of the world's best-trained consultants in 46 countries. The company generated consolidated revenues of US $22.2 billion in the fiscal year ended March 31, 2021 and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
