Digitate's ignio™ SaaS Suite for the Autonomous Enterprise Now Available on Microsoft Azure

Customers Can Now Avail the Full Benefit of ignio's Cognitive Capabilities Along with the Economy, Agility and Scalability of the Cloud

SANTA CLARA | MUMBAI, July 7, 2020: Digitate, a software venture of Tata Consultancy Services (TCS) (BSE: 532540, NSE: TCS), a leading global IT services, consulting and business solutions organization, announced that the ignio™ SaaS suite of AI-driven software that combines enterprise IT context, insights, and intelligent automation to deliver resilient, agile, and autonomous IT operations without human intervention, is now available on Microsoft Azure.

The availability of the ignio SaaS suite on Azure will enable quicker configuration and deployment, high scalability, cost-effective pricing, strong security, and consistent availability with the latest updates, all on a trusted global public cloud platform.

The award-winning ignio suite consists of five standalone software products – ignio AIOps, ignio AI.WorkloadManagement, ignio AI.ERPOps, Cognitive Procurement and ignio AI.Digital Workspace. It blends artificial intelligence and machine learning to deliver autonomous enterprise IT and business operations, with out-of-the-box features that enable it to identify the root causes of issues and fix them autonomously, freeing up time and resources to devote to innovation and higher value work.

With a track record of delivering impactful outcomes within weeks, ignio is viewed by forward thinking organizations as a strategic investment to build a self-healing, resilient technology core that powers a seamless customer experience. This has helped it establish a strong track record, with over 150 customers, mostly Fortune 1000 corporations, in just the five years since its launch. The launch of ignio SaaS on Azure is expected to make it even more accessible to customers and ease their path to building autonomous enterprises.

"*We envision that in the new normal, successful enterprises have to be purpose-driven, autonomous, and highly adaptive in order to drive innovation and to best serve their customers and employees*," said **Akhilesh Tripathi, Global Head, Digitate**. "*ignio SaaS on Microsoft Azure will deliver end-to-end autonomous capabilities for enterprises, and enable great customer and employee experiences, along with the economy, agility and scalability of the cloud*."

Priya Vijayarajendran, Vice President – Data and AI, Microsoft Corp., said, "*Business leaders in every industry are focused on how to offer trusted services to their customers, wherever they are. Digitate, combined with Microsoft Azure, is bringing advanced AI capabilities to help companies cognitively transform and empower customers in new ways*."

Digitate and Microsoft will work with leading companies to help them become more resilient and adaptable using ignio SaaS on Azure. This has become especially relevant in the current COVID-19 situation. With most enterprises operating in a work-from-home mode, ignio SaaS on Azure represents a robust solution that allows them stay focused on business outcomes, reducing downtime and enabling a high service availability with anytime and anywhere access.

About Digitate

Digitate is a software venture of TCS. Launched in 2015, Digitate's ignio™ is an award-winning solution that reimagines enterprise IT operations with its unique and innovative design that blends artificial intelligence, machine learning, and advanced software engineering to quickly and autonomously resolve issues when they arise, and preempt incidents wherever possible. ignio has been adopted by large, global enterprises, mostly Fortune 500 and Global 2000 corporations, which are leaders and innovators in their respective industries. Digitate is headquartered in the heart of the Silicon Valley in Santa Clara, California, USA and Pune, India.
