TCS' New MasterCraft™ DataPlus 3.0 Uses Machine Learning to Help Enterprises Further Strengthen Data Privacy

Tata Consultancy Services' Latest Release of DataPlus Automates Data Discovery and Empowers Users with a More Intuitive Experience

NEW YORK | MUMBAI, September 09, 2021: Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS), a leading global IT services, consulting, and business solutions organization, released a major version of TCS MasterCraft™ DataPlus, with a self-guided approach to building data privacy and data quality processes and Machine Learning (ML)-based sensitive data attribute discovery.

TCS MasterCraft DataPlus is an integrated data management software for data privacy, test data management, data quality management, data analytics and database modeling. It is industry-agnostic, delivering context-specific solutions to an enterprise's data management challenges. The software is backed by decades of relevant TCS expertise in helping global enterprises in their transformation and regulatory compliance programs. TCS MasterCraft DataPlus has been deployed across multiple geographies and business verticals, and has provided value to enterprises of varying scale, with its data privacy and data quality management capabilities.

The latest release, DataPlus 3.0 provides users a guided approach to building the required data privacy and data quality management processes, through ready-to-use process templates that are amenable to additional configuration. The new intuitive experience reduces the time taken to train and onboard new users as well as reliance on support teams. Through ML-based sensitive data discovery, DataPlus 3.0 intelligently learns to identify probable sensitive and personally identifiable data attributes, enabling privacy-safe data provisioning.

Vijayalakshmi Gopal, Business Head, TCS MasterCraft, said, *"Traditional data management software have limited ability to cope with the explosion in scale and variety of data resulting from enterprises' digital transformation initiatives. TCS MasterCraft DataPlus 3.0, our next generation data privacy and data quality management software, leverages machine learning to drive higher levels of automation and more effective data discovery. The new features make the software easier to learn and intuitive, enhancing the overall user experience."*

About TCS MasterCraft™

TCS MasterCraft™ is TCS' suite of intelligent automation products that optimizes IT service delivery. The suite has three products, namely **TCS MasterCraft DevPlus** (for continuous delivery lifecycle management), **TCS MasterCraft TransformPlus** (for application analysis, modernization, and development) and **TCS MasterCraft DataPlus** (for enterprise data privacy and quality). The products have been used by 330+ customers across 840+ projects in TCS. The products are the outcome of TCS' decades of investment in research and development in automation, and experience in delivering various service delivery projects over the years. For more information on MasterCraft products, visit <https://mastercraft.tcsapps.com>.

About Tata Consultancy Services (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for over 50 years.

TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile™ delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 500,000 of the world's best-trained consultants in 46 countries. The company generated consolidated revenues of US \$22.2 billion in the fiscal year ended March 31, 2021 and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
