New TCS Solution Helps Enterprises Jumpstart Return-to-Work Programs Within Four Weeks

Tata Consultancy Services' Safe Workplace Solution Monitors Critical Safety Factors, Including Self Attestation and Contact Tracing

NEW YORK | MUMBAI, August 18, 2020: Tata Consultancy Services (TCS) (BSE: 532540, NSE: TCS), a leading global IT services, consulting and business solutions organization, announced the launch of [TCS Safe Workplace](#), a return-to-work solution that helps global enterprises quickly transition to a safe, secure and productive work environment.

As the COVID-19 crisis stabilizes, employees expect to return to a work environment they can trust. Enterprises are creating new policies to address mandated self-attestation, contact tracing and social distancing regulations, while also ensuring compliance. Reopening the workplace is particularly complex for large enterprises with multiple business lines and/or multiple jurisdictions and languages.

To address this pressing need, the TCS Safe Workplace was launched, leveraging TCS' technology expertise and domain capabilities in HR processes, business continuity, facility management, and employee safety and well-being.

TCS Safe Workplace uses existing enterprise platforms to design and create a workplace command center that assesses the readiness of employees, the work environment and the workforce model; automates the return to work processes, including contact tracing, shift management, and workspace planning; and monitors critical risk factors.

Additionally, the solution helps companies manage self-attestation from employees, awareness communications, and grievance resolution. It identifies pandemic zonal hotspots and enables fact-based decision-making, so an organization can proactively adapt its operations to avoid issues that may affect its employees and customers.

TCS Safe Workplace enables enterprises to jumpstart return-to-work programs within four weeks and scale support to manage thousands of employees across various locations. Several global enterprises, including a US-based financial information and analytics company and a leading global computer parts manufacturer, have engaged TCS to deploy the solution to support their workplace reopening initiatives.

"As our customers determine the best return-to-work approach for their employees' safety, security and basic health needs, TCS Safe Workplace helps them manage the enormity and complexity of this undertaking, and build resilience into their operations. In as little as four weeks, they can create a safe workplace for returning employees, and focus on growing their business," said **Ram Subramanian, Global Head – Human Capital Practice, Enterprise Application Services, TCS.**

About Tata Consultancy Services Ltd. (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for over 50 years.

TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile™ delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 443,000 of the world's best-trained consultants in 46 countries. The company generated consolidated revenues of US \$22 billion in the fiscal year ended March 31, 2020, and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the Dow Jones Sustainability Index (DJSI), MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
