TCS Positioned in the 2020 Gartner Magic Quadrant for Enterprise Agile Planning Tools for its Jile™ Platform

Tata Consultancy Services Promotes Jile for Organizations Needing to Scale Agile and Transform into Business 4.0™ Enterprises

NEW YORK | MUMBAI, May 29, 2020: Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS), a leading global IT services, consulting, and business solutions organization, has been positioned in the Gartner Magic Quadrant for Enterprise Agile Planning Tools[1] for the second consecutive year for Jile™, its cloud-based Agile DevOps platform.

"*Business 4.0™ enterprises are companies that invest in their digital transformation initiatives with comprehensive software application development and delivery platforms, such as Jile, to drive an Agile culture and mindshare across the organization*," said **Durga Maruwada, Business Head – Jile, TCS**. "*We believe this positioning is a recognition of Jile's ability to enable enterprises to align IT initiatives with core business objectives as well as equip Agile teams with the right set of tools, processes and controls to continuously deliver value to stakeholders*."

Jile is a comprehensive platform that empowers companies in their digital transformation journeys to become Business 4.0 enterprises by moving development and delivery tools to the cloud and applying Agile methods to large-scale, multi-site software development programs. Distributed Agile teams can manage synchronized, incremental delivery of large systems involving complex sub-products, across different technology stacks, each with its own product vision, roadmap, and release cycle. In this way, Jile helps organizations that develop and manage large IT systems embrace Agile and DevOps at scale to promote innovation and achieve business agility.

TCS is one of 16 vendors in the Magic Quadrant this year. According to the report, "*The enterprise agile planning tools evaluated in this Magic Quadrant have capabilities for planning and collaborating at a team level, but also provide functionality that enables scaling across multiple teams… The drive to provide continuous value has led enterprises to shift from a project-based software delivery approach to one that treats applications as products*."

"*Jile is an Enterprise Agile Planning tool with the addition of DevOps capabilities in a single platform that orchestrates and automates the CI/CD pipeline and includes test management. These capabilities provide stakeholders visibility into the software delivery value stream allowing them to remove bottlenecks and extract information to make better business decisions,*" added **Durga Maruwada.**

About Tata Consultancy Services Ltd. (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for over 50 years. TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile™ delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 448,000 of the world's best-trained consultants in 46 countries. The company generated consolidated revenues of US $22 billion in the fiscal year ended March 31, 2020, and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the Dow Jones Sustainability Index (DJSI), MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
