TCS Wins Migration Success Partner of the Year Award from AWS

Tata Consultancy Services was Recognized for Helping Customers Drive Innovation, Build Solutions on AWS Cloud and Reimagine their Businesses

MUMBAI, September 30, 2020: Tata Consultancy Services (TCS) (BSE: 532540, NSE: TCS), a leading global IT services, consulting and business solutions organization, announced that it has been [recognized by Amazon Web Services \(AWS\)](#) as the 2020 AWS Migration Success Partner of the Year in India.

Each year, AWS honors partners who demonstrate leadership in the region and play key roles in helping customers reimagine their businesses, drive innovation and build solutions on AWS cloud. TCS won the award for its commitment to excellence in helping customers successfully migrate and manage their core applications on the cloud.

TCS is a Premier AWS Consulting Partner and certified managed services partner. It offers a suite of services around AWS such as cloud advisory services, strategy and roadmap definition, assessment, deployment and implementation, workload migration, and hybrid managed services. Additionally, it has a dedicated AWS Cloud Experience Center and a Centre of Excellence.

TCS has been partnering with leading corporations globally in their growth and transformation initiatives, harnessing the power of the cloud as part of the future-ready technology stack that delivers global availability, scalability, security, and agility, while further reducing the cost of IT infrastructure. Using this as the foundational element of an adaptive core, TCS has helped customers enhance their operational resilience, adaptability and innovation.

A significant component of the core transformation engagements executed by TCS is application modernization. This entails leveraging TCS' domain knowledge to analyze legacy applications to define the functional subdomains for decomposition, extraction of business logic and prototyping of relevant microservices. Additionally, TCS uses its contextual knowledge and design-thinking for functional enhancements, new technology-enabled features and business capabilities, which are then crafted as a bouquet of microservices, APIs and a modern UX.

TCS has invested in building intellectual property in this space to enhance the speed to value. TCS MasterCraft™ TransformPlus, an intelligent automation product, significantly accelerates end-to-end application modernization and supports a wide range of legacy and modern programming languages. TCS iCMC™ is a decision support engine that helps customers plan the sequencing of applications for modernization and cloud migration, helping enterprises speed up pre-migration cloud assessment and decisions by up to 75 percent.

Additionally, TCS leverages its intelligent Modernization Factory to accelerate and monitor the software construction through its complete lifecycle of build, test, continuous integration and deployment on a cloud platform, which evolves across a staggered and controlled transformation. Other accelerators include the TCS Modernization Propeller, with an extensive library of pre-defined industry-specific microservices and API templates built using TCS' deep domain knowledge, an integrated MS/API Development Factory and a holistic Business Ecosystem Integration Services framework.

In addition, the company provides a ready catalog of end-to-end cloud transformation services for SAP on AWS, to accelerate strategic SAP cloud initiatives. Services include cloud strategy, design, cloud migration factory, integration and cloud extension development.

"We leverage our deep contextual knowledge of our customers' business and technology landscapes, expertise in digital technologies, and extensive portfolio of industry-aligned cloud solutions to help enterprises become more purpose-driven, resilient and adaptable," said Ujjwal Mathur, Country Head, TCS India. "We are delighted to receive the AWS Partner Award in recognition of our long strategic relationship with AWS, focus on delivering superior business outcomes, and commitment to helping customers accelerate their growth and transformation journeys."

About Tata Consultancy Services Ltd. (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for over 50 years. TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile™ delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 443,000 of the world's best-trained consultants in 46 countries. The company generated consolidated revenues of US \$22 billion in the fiscal year ended March 31, 2020, and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the Dow Jones Sustainability Index (DJSI), MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
