TCS Partners with Google Cloud to Integrate Gemini Enterprise for its Workforce and Customers

Through a multi-year partnership expansion, TCS will drive efficiency and innovation with Google Cloud's agentic AI platform to build, manage, and deploy AI agents and boost value for enterprises

MUMBAI | October 14, 2025: [Tata Consultancy Services](#) (TCS) (BSE: 532540, NSE: TCS), a global leader in IT services, consulting, and business solutions, is expanding its long-standing partnership with Google Cloud by adopting its next generation agentic AI platform, Gemini Enterprise. This partnership will empower TCS' workforce to build agentic AI solutions to redefine Human + AI workflows. Gemini Enterprise will enable development of custom agents and seamless integration of pre-built Google Cloud agents and third-party agents. Agent-to-agent communication and agentic orchestration capabilities of Gemini Enterprise will simplify multi-step operational workflows and accelerate scaling agentic solutions in enterprises.

This collaboration strengthens the broader tcs^{AI} initiative towards capability building and reinforces TCS' commitment to democratise access to best-of-breed platforms. The access to Gemini models enables TCS to ideate, innovate, and rapidly build AI-led solutions for its customers.

The AI agents offered by Google Cloud via Gemini Enterprise are fully integrated with Google Cloud's scalable and secure infrastructure and AI solutions, including BigQuery. BigQuery already powers some of TCS' internal systems. With one of the largest Google Cloud certified workforces and GenAI expertise in the industry, TCS is uniquely positioned to lead AI transformation for enterprises. TCS' expertise spans advisory, engineering, and responsible AI, enabling rapid, scalable innovation for customers.

Thomas Kurian, Chief Executive Officer, Google Cloud said, *"AI is fundamentally redefining the value that professional services firms offer, and Gemini Enterprise provides TCS with a single, integrated platform that unifies enterprise knowledge and empowers every employee to become a force multiplier for the business. Together, we are helping our joint global customers integrate this best-in-class technology to accelerate their ability to build differentiated industry solutions and realize business value faster."*

Aarthi Subramanian, Executive Director – President and Chief Operating Officer, Tata Consultancy Services, said, *"At TCS, we see AI as a catalyst for empowering our workforce and redefining how we deliver value to clients. We have made significant investments in democratising access to AI technologies to our employees and Gemini Enterprise is a fresh addition to the TCS AI Infrastructure footprint. By adopting Gemini Enterprise, we are expanding our investments in our own people as well as accelerating innovation for our clients across industries. Google Cloud has long been an integral part of our cloud, data, and AI- powered transformations with our customers. This new chapter in our partnership will further enhance our capabilities and value proposition for our customers, especially as enterprises prepare themselves for the 'Agentic AI Future'".*

TCS and Google Cloud are helping customers solve real-world problems:

- **FairPrice Group**, a leading Singapore retailer, brought "Store of Tomorrow" to life with the Grocer Genie Portal for agentic AI-led store operations.
- **CME Group**, the world's leading derivatives marketplace, accelerated legacy code modernisation by 20% through Google's Gemini Code Assist, driving faster migration, improved code quality, and enhanced productivity across development teams.

- One of the largest UK banks established a GenAI office to drive enterprise-wide AI adoption and provide more personalised, efficient, and secure banking experience for its customers.
- A global transportation and logistics leader implemented an AI-powered solution to make smarter, safer shipping decisions and opened a new revenue stream.
- An European Aerospace leader to explore their export control document management by automating the classification and tagging of complex technical documentation using an AI and GenAI-powered solution that will enable rapid, accurate classification aligned with evolving export control regulations.

TCS and Google Cloud will continue to expand their development of domain-specific AI agents, leveraging TCS' deep domain knowledge and the multi-modal capabilities of Gemini Enterprise in sectors such as banking and financial services, retail and consumer packaged goods, manufacturing, and communications, media and information services. TCS is also building industry-specific, cloud, and AI-powered solutions along with its customers at the five Gemini Experience Centres it has established globally.

About Google Cloud

Google Cloud is the new way to the cloud, providing AI, infrastructure, developer, data, security, and collaboration tools built for today and tomorrow. Google Cloud offers a powerful, fully integrated and optimized AI stack with its own planet-scale infrastructure, custom-built chips, generative AI models and development platform, as well as AI-powered applications, to help organizations transform. Customers in more than 200 countries and territories turn to Google Cloud as their trusted technology partner.

Tata Consultancy Services

Tata Consultancy Services (TCS) (BSE: 532540, NSE: TCS) is a digital transformation and technology partner of choice for industry-leading organizations worldwide. Since its inception in 1968, TCS has upheld the highest standards of innovation, engineering excellence and customer service.

Rooted in the heritage of the Tata Group, TCS is focused on creating long term value for its clients, its investors, its employees, and the community at large. With a highly skilled workforce of over 590,000 employees in 55 countries and 202 service delivery centres across the world, the company has been recognized as a top employer in six continents. With the ability to rapidly apply and scale new technologies, the company has built long term partnerships with its clients – helping them emerge as perpetually adaptive enterprises. Many of these relationships have endured into decades and navigated every technology cycle, from mainframes in the 1970s to Artificial Intelligence today.

TCS sponsors 14 of the world's most prestigious marathons and endurance events, including the TCS New York City Marathon, TCS London Marathon and TCS Sydney Marathon with a focus on promoting health, sustainability, and community empowerment.

TCS generated consolidated revenues of over US \$30 billion in the fiscal year ended March 31, 2025. For more information, visit www.tcs.com
