TCS BaNCS to support BNP Paribas' Custody Operations in the United States

MUMBAI, January 22, 2013: Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS) a leading IT services, consulting and business solutions organization, announced today that its flagship product, TCS BaNCS has gone live in the United States at BNP Paribas for its custody operations. The platform is used for post trade services for local custody of all major asset classes in the US market and connects directly to the US Depository Trust & Clearing Corporation (DTCC) US DTCC.

TCS BaNCS is a best-in-class solution encompassing all facets of securities services like Trade processing, Clearing and Settlement, Corporate Actions processing, Custody, Position & Collateral Management and Cash Processing. The solution is built on the latest technology, a web-based application with J2EE architecture. TCS BaNCS provides real time processing and has multi-entity capability to service operational units in a 24/7 environment. The solution provides ease of integration with external market infrastructure such as brokers, depositories, custodians, counterparties and clients internal systems.

Alain Pochet, Global Head of Clearing and Custody Services BNP Paribas said: "The launch of our custody operations in the US means that we are now our own local custodian for more than 80 per cent of our clients' domestic market assets. It was therefore important for us to go on working on the world's leading equity market with one of our major IT partner."

N. Ganapathy Subramaniam, President, TCS Financial Solutions said "In addition to demonstrating TCS BaNCS' proven nature in the US custody space, this deployment showcases how firms can have complete end to end control from a regulatory and operational perspective. We are glad to be considered a preferred partner at BNP Paribas and will strive to solve their pressing technology problems globally".
