Zions Bancorporation Selects TCS BaNCS for Core Banking Transformation

Focus on Achieving Enterprise-Wide Standardization, Straight Through Processing and Enhanced Customer Experience

New York | Mumbai, November 5, 2013: Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS), a leading global IT services, consulting and business solutions organization, today announced that Zions Bancorporation, one of America's premier financial services companies, has chosen TCS BaNCS for its core banking transformation program to achieve standardization, centralization and straight through processing across the enterprise. In addition to the cost saving benefits, the ability to have a single, 360 degree view of its end-user customers is a key focus of the core replacement program.

The depth of TCS BaNCS' capabilities, its implementation track record and overall quality of banking and technology experts were among the major factors that influenced this selection by Zions Bancorporation, which consists of a collection of great banks in select Western U.S. markets with combined total assets exceeding $50 billion. The transformation will be completed in phases, with Zions' management expecting significant improvements in operational efficiency and customer experience, and reduced operational and financial risk stemming from older legacy systems.

"TCS' demonstrated commitment and focus during the engagement process and earnestly showed us how we could leverage TCS BaNCS technology to achieve our objectives," said Joe Reilly, CIO of Zions Bancorporation. "The flexibility of the solution and speed of deployment were key criteria in our selection process. The modular components and multi-entity capability of TCS BaNCS tightly fits into our technology landscape."

"We are delighted that Zions Bancorporation has chosen TCS as technology partner to transform their enterprise," said N Ganapathy Subramaniam, President of TCS Financial Solutions. "We are taking the model bank approach to translate Zions Bancorporation's vision into a reality. By deploying TCS BaNCS, they can streamline and standardise their entire suite of products from both the bank's and the customer's point of view in the United States"
