Independent Research Firm Positions Tata Consultancy Services As A Leader in Oracle Services Providers Report

TCS recognized for its strategy, current offering and market presence

NEW YORK/MUMBAI, June 17, 2011: Tata Consultancy Services (TCS), (BSE: 523540, NSE: TCS), a leading IT services, consulting and business solutions firm, today announced that Forrester Research, Inc. cited TCS as a Leader in "The Forrester Wave™: Oracle Services Providers, Q2 2011" report¹.

Forrester evaluated the strengths, weaknesses, and differences in strategy of 14 leading global services providers in the Oracle applications market. The assessment was based on 68 criteria, which were grouped into three high-level buckets, including current offering, strategy, and market presence. TCS achieved top scores in all three areas.

TCS' partnership with Oracle has spanned nearly two decades. During this time, TCS has demonstrated through multiple global engagements their expertise on Oracle applications and technology solutions. With a deep understanding of customers' business needs across industry verticals, TCS provides complete lifecycle solutions that help customers realize maximum business benefits and efficiency from their Oracle investments.

"TCS provides Oracle enterprise solutions to its customers that help them to enhance existing processes and applications while enabling agility and adaptability for future growth," said Sridhar Bakshi, Global Head, Oracle Practice, Tata Consultancy Services. "We believe our high scores on the Forrester Wave™ Oracle Services Providers report are a testament to TCS' solution maturity, in-depth technology expertise, best-in-class consulting, proven onshore-offshore methodologies, and superior customer experience."

This is the third Forrester Wave™ report in 2011 in which TCS has been featured as an industry leader. TCS was named a leader in the March 2011 reports titled "The Forrester Wave™: Global IT Infrastructure Outsourcing, Q1 2011" and "The Forrester Wave™: SAP Service Providers, Q2 2011".
