New Version of Connected Clinical Trials Platform Launched at TCS ADD Vantage

Tata Consultancy Services' Solution, Part of the Advanced Drug Development Suite, Includes Upgraded Features Such as Intelligent Medication, Digital Patient and Site Engagement, and Virtual and Remote Trials

PARIS | MUMBAI, December 13, 2018: Tata Consultancy Services (TCS) (BSE: 532540, NSE: TCS), a leading global IT services, consulting, and business solutions organization, released a new version of the Connected Clinical Trials (CCT) platform at the recently concluded TCS ADD Vantage forum in Paris.

TCS ADD Vantage is an exclusive forum for the pharma ecosystem that brought together leaders and subject matter experts from several global pharmaceutical companies including four of the top five players, and labelling and smart medication packaging solution providers. Participants discussed industry trends and challenges, and how innovative technology solutions can enable them to become future ready.

CCT is an innovative software-as-a-service (SaaS) platform that enables life sciences companies to significantly transform patient engagement in clinical trials and improve the efficiency and accountability of the clinical supply process. CCT is part of TCS' Advanced Drug Development (ADD) suite that offers a wide range of cloud based clinical solutions and services, including clinical data management, metadata management, pharmacovigilance, and data analytics and insights.

The latest release of the CCT platform has the following upgraded features:

- **Intelligent Medication** – Includes adherence (sensor-enabled medication packages), tracking (medication kit transactions), and labeling (electronic drug labels in user's local language).
- **Digital Patient and Site Engagement** – Includes Subject App that helps with a 360 degree interaction between patients, sites, and sponsors, and Site App and Portal, a mobile-friendly app to monitor and track all subject and medication related activities.
- **Virtual and Remote Trials** – Includes consent (patient-friendly multimedia content on mobile devices, both at site and remotely in user's local language) and Digimarkers (end-to-end support for digital endpoints derived from smart devices, sensors, and wearables).

"Life sciences companies are embracing digital technologies to improve patient care and transform the drug development landscape. TCS' state-of-the-art Connected Clinical Trials platform with its advanced digital technologies framework and patient-centric features will significantly improve medication adherence and patient engagement," said **Debashis Ghosh, President, Life Sciences and Healthcare, TCS.** *"Our strong contextual knowledge, deep domain expertise, and skilled talent pool help us create solutions that address industry requirements, bring benefits to the patient, and are shaping the future of clinical trials."*

About Tata Consultancy Services Ltd. (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for the last fifty years. TCS offers a consulting-led, Cognitive powered, integrated portfolio of IT, Business & Technology Services, and engineering. This is delivered through its unique Location Independent Agile delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 411,000 of the world's best-trained consultants in 46 countries. The company generated consolidated revenues of US $19.09 billion for year ended March 31, 2018 and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award winning work with communities across the world have earned it a place in leading sustainability indices such as the Dow Jones Sustainability Index (DJSI), MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
