Dear Sirs,

We are sending herewith copy of the Press Release titled **"TCS Collaborates with Red Hat to Build Next-Gen Solutions that Accelerate Customers' Digital Transformation"** which will be disseminated shortly.

The Press release is self-explanatory.

Thanking you,

Yours faithfully,
For **Tata Consultancy Services Limited**

Rajendra Moholkar
Company Secretary

PRESS RELEASE For immediate

TCS Collaborates with Red Hat to Build Next-Gen Solutions that Accelerate Customers' Digital Transformation

Tata Consultancy Services to Develop Microservices-Based Solutions and Frameworks in the Areas of Customer Experience, Cybersecurity, and DevOps on Red Hat OpenShift Container Platform

CINCINNATI | MUMBAI, December 18, 2018: Tata Consultancy Services (BSE: 532540, NSE: TCS), a leading global IT services, consulting, and business solutions organization, has extended its collaboration with Red Hat to build microservices-based open source solutions and frameworks that will accelerate customers' digital transformation journeys.

The collaboration aims to develop industry-specific as well as cross-industry horizontal solutions and frameworks leveraging the Red Hat OpenShift Container Platform, machine learning algorithms, natural language processing engines, and other Red Hat specific products and technologies. These solutions will help customers accelerate their shift away from legacy monolithic systems, towards more agile, cloud native, containerized applications based on open source technologies, in hybrid environments.

To be built by TCS' Global Business Solutions Labs in Cincinnati, the solutions address all four pillars of TCS' Business 4.0™ thought leadership framework – intelligent, agile, automated, and on the cloud. The TCS Red Hat solutions will help customers create value by enabling superior end-user experience through data driven intelligence and mass personalization, securing them against cyber-risks and gaining agility through an automated DevOps model. These include:

- Customer Insight: 360-degree Customer View is one of TCS' first big data solutions architected on OpenShift, allowing organizations to correlate and analyze data at every stop of the customer's journey. This enables a systematic understanding of the customer's sentiments, thereby reducing customer attrition and increasing business revenue.

- Customer Experience: TCS' Cognitive Contact Center is an intelligent, highly responsive and contextual solution with advisory support, empowering enterprises to deliver superior end-user experiences. The solution will support issue escalation using natural, human-like conversation – ensuring ease and simplicity for the end user.

- Cybersecurity: TCS' Security Data Lake will help enterprises create predictive models for threat intelligence and anomaly detection so they can better understand potential risks and secure themselves against advanced persistent threats and other sophisticated attacks on the network security infrastructure.

- DevOps: TCS' Secure by Design DevSecOps solutions will help enterprises improve speed to market by allowing them to seamlessly transition from traditional release management to an end-to-end

automated DevOps model. Businesses remain more secure while ensuring greater agility, collaboration and standardization across the environment.

"Together, TCS and Red Hat plan to bring our customers a set of solutions that leverages our contextual knowledge, domain expertise and the Business 4.0™ thought leadership framework, and based on Red Hat's open source technologies. These differentiated, interoperable solutions will help our customers accelerate their digital transformation journeys and succeed in today's fast paced, outcome-focused digital environment," said **Raman Venkatraman, Vice President and Global Head, Alliances & Technology Unit, TCS.**

"Red Hat and TCS' long standing, successful collaboration is now extending around DevOps, data science, AI/machine-learning, and cybersecurity. We see tremendous business value in TCS' solutions on Red Hat's OpenShift Container Platform. By leveraging TCS' technology skills to build more secure, intelligent and responsive solutions, we aim to deliver superior end user experiences, offer new growth opportunities to our customers and accelerate their digital transformation journeys," said **Larry Stack, Senior Vice President, Global Accounts and Target Industries, Red Hat.**

####

About TCS' Business Solutions Unit (BSU):

TCS' strong partnerships with technology vendors, Global Business Solutions Labs, specialized knowledge of emerging technologies, deep domain expertise, and global teams, enables us to help customers solve business problems or develop new business models through proof of concept, proof of technology, and validation of solution architecture. Based on TCS Business 4.0™ thought leadership framework, we drive business innovation for our Customers by leveraging technologies in the areas of Cloud, Cyber Security, Business Analytics, Big Data, Blockchain, APIfication, Connected Networks, Artificial Intelligence, Integration Services, Business Visualization and Simulation enablers. Our industry-specific business solutions that leverage leading and disruptive technologies on an interoperable platform supported by a workforce with cross-technology skills help clients drive Digital Re-imagination and Simplification.

About Tata Consultancy Services Ltd (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for the last fifty years. TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 411,000 of the world's best-trained consultants in 46 countries. The company generated consolidated revenues of US $19.09 billion in the fiscal year ended March 31, 2018, and is listed on the BSE (formerly Bombay Stock Exchange)

and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award winning work with communities across the world have earned it a place in leading sustainability indices such as the Dow Jones Sustainability Index (DJSI), MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
