TCS Launches Next-Generation Private Cloud in Canada

Tata Consultancy Services' Cloud Solution Enables Greater Agility, Enhanced Security and Improved Customer Visibility and Control

TORONTO | MUMBAI, December 19, 2018: Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS) a leading global IT services, consulting and business solutions organization, has launched a next-generation, private cloud in Canada to help forward-thinking enterprises move rapidly along the digital maturity curve. TCS' Enterprise Cloud Platform (ECP) is a dynamic solution stack that provides multiple, flexible cloud infrastructure options including IaaS, PaaS, and state-of-the-art hybrid cloud capabilities which enable highly secure orchestration between on premise and public cloud environments.

The ECP platform provides a first-of-its-kind software defined approach to solve customer challenges, and offers tremendous control over both physical and virtual environments. With enhanced security based on open standards and policy-based automation, the solution provides greater network fabric visibility, assurance that customer data remains in Canada, and enables enterprises operating in legacy environments to adopt the cloud through easy transformations.

"We are extending our state-of-the-art cloud offerings to customers in Canada and reinforcing the pivotal role we play in their ongoing digital transformation journeys," said **Satishchandra Doreswamy, Global Head, Cloud Infrastructure, TCS**. *"Our end-to-end cloud services and solutions portfolio, assessment tools, and a robust framework for cloud foundation and migration, make TCS a trusted partner of choice."*

"Canadian enterprises are looking for greater agility and flexibility to compete in a Business 4.0™ world. To cater to their needs, TCS has been steadily investing in building an agile-ready workforce and cloud-based solutions and capabilities, here in Canada," said **Soumen Roy, Country Head, TCS Canada**. *"Adoption of the TCS Enterprise Cloud Platform will enable rapid delivery of customer service solutions, ensure superior business continuity and agility, enhance user experience, and reduce total cost of ownership."*

As one of Canada's top ten IT services providers, TCS has consistently introduced products and services that help its customers differentiate themselves. TCS has focused on building domain solutions which align with the evolving needs of companies across sectors, from banking and financial services to utilities and oil and gas, resulting in a new end-to-end cloud services portfolio that helps organizations develop a strong digital spine, while remaining compliant with Canadian regulations.

About Tata Consultancy Services Ltd. (TCS)
Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for the last fifty years. TCS offers a consulting-led, cognitive powered, integrated portfolio of IT, Business & Technology Services, and engineering. This is delivered through its unique Location Independent Agile delivery model, recognized as a benchmark of excellence in software development.
