Tata Consultancy Services Ranked World's 7th Greenest Company in Newsweek's Green Rankings 2011 Global 500 List

- ***TCS ranked No. 1 Asia based company***
- ***Ranked No. 2 Globally in Information Technology & Services Company category***

MUMBAI, October 19, 2011: Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS) a leading consulting, business solutions and IT services organization, today announced that it has been ranked as the **world's 7th greenest** company in Newsweek's Green Rankings 2011. In addition, TCS is the highest ranked Asia-based company and second highest ranked globally in the Information Technology & Services company category.

Newsweek's Green Rankings assess each company's environmental footprint, management of that footprint, and transparency. The Green Rankings focus on the largest publicly traded companies in America and worldwide. Each list consists of the largest 500 companies by revenue (most recent fiscal year), market capitalization, and number of employees as of June 30, 2011.

"We are very pleased to be recognized for our ongoing commitment to the environment. True to the Tata spirit, TCS regards climate change mitigation and environmental improvement as essential elements of its sustainable business philosophy. TCS' corporate sustainability efforts are focused on the four dimensions around the world – workplace, environment, community, and marketplace. The first three are how TCS is focused on increasing our own greening as a company and the fourth one is how we influence our clients to be more green," said N. Chandrasekaran, Chief Executive Officer and Managing Director, TCS.

Newsweek's Green Rankings Methodology:

Newsweek's Green Rankings compare the environmental footprint, management (policies, initiatives, controversies) and transparency of the biggest companies on the planet. Published annually since 2009, this project is the first effort by a major media organization to comprehensively rank companies in this way. Newsweek teamed up with two leading environmental research organizations, Trucost and Sustainalytics, to produce the most comprehensive rankings, of 500 global and 500 US companies, available. The methodology was developed in collaboration with an advisory panel of sustainability experts. For additional details on the methodology visit:
