Tata Consultancy Services Introduces Intelligent Testing System (ITS) at CA World 2013

LAS VEGAS, April 23, 2013 – CA World: Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS) a leading IT services, consulting, and business solutions organization, today announced its Intelligent Testing System (ITS) solution, designed to help customers automate the testing lifecycle. The new solution is being developed through TCS' existing partnership with CA Technologies and combines TCS' innovative process and automation tools with CA LISA® Service Virtualization software. TCS is premiering this new offering, which will be generally available in May 2013, at CA World 2013 in Las Vegas, NV.

ITS features engineering-based accelerators and built-in agile tools and will allow TCS and CA Technologies customers to automate the entire test cycle, reduce dependency on components, and provide faster time to market, leading to higher quality while minimizing cost. For use across all industries, ITS will allow users to test their applications intelligently while adhering to industry specific regulatory requirements.

"We believe that the future of software assurance lies in creating a seamless cycle between development, test and production," said Siva Ganesan, VP and Global Head, Assurance Services, Tata Consultancy Services. "ITS, which has been developed leveraging TCS' rich experience in this space, uses superior engineering and implementation practices to provide a holistic automated test experience across the delivery chain."

"As enterprises look for new ways to drive innovation while reducing costs, they are beginning to understand how improvements in software development and testing can help them achieve their business goals," said Shridhar Mittal, general manager, Application Delivery, CA Technologies. "ITS is building a strong offering with our Service Virtualization software serving as the critical foundation to help bring significant value to our joint customers."

TCS is demonstrating the ITS solution at CA World from April 21-24, 2013 in Las Vegas, NV. The company is a Gold Sponsor at this year's event.
