Timken India Receives Two BIS licenses for their Bearings

The brand received BIS licenses for Spherical Roller Bearings across two manufacturing facilities.

Bangalore, Karnataka, October 30, 2026 —Timken India Limited (the "Company") today announces that it has been awarded two Bureau of Indian Standards (BIS) licenses for its bearings.

This achievement confirms Timken India's leadership in manufacturing excellence, quality assurance and regulatory compliance across multiple bearing categories and production sites.

Key highlights:

- The Company has received two BIS licenses for bearing products.
- Timken India has received SRB Roller production licenses at its Bharuch (new) plant.
- Timken India has received Cylindrical Roller Bearing production licenses at its Bharuch (old) plant.

"This is a remarkable milestone which validates the strength of our design, testing, and quality control procedures across our manufacturing facilities," said Sanjay Koul, Managing Director, Timken India Limited. "Securing the first BIS license in India for SRB for the new Bharuch facility and for CRB for the old Bharuch plant underscores our commitment to the highest standards of quality, engineering and customer service. These licenses enable us to better serve industrial sectors that demand certified, high-performance bearings – from automotive and rail to heavy industries and renewables."

Customer and market impact

- Enhanced confidence: BIS-certified bearings reduce technical qualification barriers for OEMs, infrastructure projects and regulated sectors.
- Stronger supply assurance: Certified manufacturing across three plants shortens lead times and improves regional availability.
- Tender readiness: Distributors and customers will benefit from ready documentation and qualification support for tenders requiring BIS-certified components.

About the BIS licenses - The Bureau of Indian Standards (BIS) licenses were issued after rigorous evaluation of product design, manufacturing processes, and quality-control systems. Each license confirms conformity to the relevant Indian national standards for bearing performance and safety.
