Ahmedabad, August 03, 2026: Torrent Power Limited (the “Company”) today announced financial results for the quarter ended June 30, 2026.

The company delivered EBITDA growth of 2% during the quarter, despite a challenging operating environment marked by geopolitical disruptions, which affected LNG supplies and, consequently, performance of its thermal power plants. This performance was supported by strong contribution from its Distribution and Renewable Energy businesses, which recorded EBITDA growth of 10% and 6%, respectively. Total Comprehensive Income (TCI) was impacted by financing costs associated with strategic investments in its under-construction portfolio that is expected to support future growth.

Key factors influencing performance were:

- ⬆ Improved operational performance across the Company's distribution businesses.
- ⬆ Improved performance of renewable portfolio, driven by higher plant load factors and contribution of projects commissioned during the previous year.
- ⬇ Higher finance costs resulting from increased borrowings for investments in under construction assets.
