PAT	54.7	44.8	22.1%	68.3	235.9
PAT Margin	6.1%	5.8%	-	7.4%	6.7%

Key Highlights:

- ❑ **A strong year-on-year volume growth of 20% in Q1 FY26** was driven by the successful ramp-up of operations at our Greenfield facility in **Dahej, Gujarat**, which commenced in FY24. This state-of-the-art facility manufactures key industrial packaging products, including **Plastic Containers** and **Intermediate Bulk Containers (IBCs)**. Building on this positive momentum to **achieve ~15% volume growth p.a.**, we have undertaken further capacity expansion initiatives through Brown/Greenfield projects to enhance overall productivity and effectively cater to the growing market demand.
- ❑ TPL Plastech Ltd has consistently paid dividend in **the last 18 years** after being acquired by Time Technoplast Ltd, and the company's dividend payout policy is minimum **30% of PAT**.
- ❑ As we grow stronger, we **aim to improve ROCE** by cost reduction attained through automation, re-engineering of moulds and machinery, following improvement in overall working capital cycle time. Remaining committed to **enhance stakeholder value** we are confident these steps will help us cross significant milestones and enhance net earnings.
- ❑ The Company aims to achieve to transitioning **75% of its electricity consumption to green energy within the next two years** through partnerships with solar power generation companies. This shift is expected to deliver meaningful **cost efficiencies** while significantly **reducing carbon emissions**. Aligned with its broader sustainability vision, the Company remains actively engaged in global efforts to combat climate change and minimize its environmental footprint.

Management Commentary: “Backed by growing demand from core sectors such as chemicals, specialty chemicals, and pharmaceuticals, we are continuing to successfully cater to the rising requirement for advanced industrial packaging solutions. For the quarter ended 30th June 2025, volumes grew by nearly 20% YoY, while revenue recorded an increase of around 17% YoY. Our EBITDA margin for Q1 FY26 remained stable at approximately 11%.

The industrial packaging industry is witnessing steady expansion, driven by regulatory developments, rising demand in emerging markets, and the adoption of automation and digital technologies that enhance efficiency and traceability. India’s industrial packaging market, valued at USD 5.3 billion in 2025, is projected to reach USD 8.9 billion by 2033, growing at a CAGR of 6.91%. This growth is fueled by increasing use of advanced materials such as lightweight, high-strength composites that improve packaging performance.

Additionally, the shift in chemical manufacturing from China to other Asian economies, particularly India, is creating new growth avenues for industrial packaging sector. With the global chemical manufacturing market expected to surpass USD 104 billion by 2028, the Company remains well-positioned to capitalize on such emerging opportunities and deliver sustained value to stakeholders.”
