ITS GLOBAL VISION ON SHOW, TVS MOTOR COMPANY MAKES A STELLAR DEBUT AT EICMA

Six new products, a resurgent “new Norton”, connected technology, AR based Heads-Up Display Helmets, new range of accessories and a global roadmap – underline TVSM’s presence at the world’s largest 2-wheeler exhibition

Milan, Italy – November 4, 2025: TVS Motor Company (TVSM) – a global leader in two and three-wheeler manufacturing - has taken centrestage at EICMA 2025, making a landmark debut at the world’s largest two-wheeler exhibition. With a show floor commanding presence, TVS unveiled 6 new products across ICE and electric powertrains, advanced ride assist gear including AR based Heads-Up display helmets, a stunning new range of accessories, connected technology that enhances rider-machine connect and its roadmap for expansion in Europe.

Adjacent to the TVS pavilion, is the resurgent, “new” Norton range, built on timeless values of design, dynamism and detail, reimagined for a new generation of riders. Over the last five years, TVSM has invested £200 million in reviving the legendary brand – one built on 127 years of history, innovation and racing glory. Norton is now ready to redefine premium motorcycling!

TVSM’s product showcase at EICMA is headlined by (a) [TVS Tangent RR Concept](#) – a revolutionary supersport bike with a monocoque subframe (b) [TVS eFX three o](#) – the company’s most powerful electric motorcycle concept yet (c) [TVS M1-S](#) – the company’s first electric maxi scooter (d) [TVS Apache RTX 300](#) – a new benchmark in the adventure tourer segment (e) [TVS X](#) – the born electric, lean, aerodynamic machine, packed with segment first innovations and (f) [TVS RTR HyprStunt Concept](#) – a revolutionary new concept for everyday urban sports motorcycles.

Commenting on TVSM’s maiden appearance at EICMA, **Sudarshan Venu, Chairman**, TVS Motor Company, said, *“TVS is a business built over 100 years - a commitment to customer delight, quality and a focus on innovation and technology. Today, we are amongst the top global manufacturers of two-wheelers with a significant market share in over 50 countries. 35 percent of our revenues come from outside India. As TVSM debuts at EICMA, we underline our ambition to serve customers in Europe with passion, precision and pride. With the prowess of our existing portfolio, the six new unveils, the capability from our four centres of excellence in India, Indonesia, Bologna and UK and a new resurgent Norton, we are ready to write a new chapter.”*

PRESS RELEASE

Drawing on decades of racing success and trusted by millions of riders, the new TVS Tangent RR Concept is the harbinger of a revolutionary super sport design that leverages over four decades of TVS Racing's competitive track experience. Its monocoque subframe is crafted from intelligent composites that heightens its aerodynamics and boosts performance. The TVS Tangent RR Concept pushes the envelope delivering a combination of aggressive performance and class-leading features never before seen in India's motorcycle landscape.

Joining the TVS Tangent RR Concept in the spotlight is the TVS eFX three o electric motorcycle concept that reimagines the electric motorcycle performance. Crafted for the modern urban rider its futuristic silhouette channels raw electric power through a design that is taut, minimalistic yet expressive, intelligent yet visceral. Building on the success of the TVS iQube, India's largest selling EV, the TVS eFX three o has been engineered to set new benchmarks in street motorcycling underlining the company's aspiration to not just match global benchmarks but surpass them.

Expanding the Track to Road Legacy: RTR HyprStunt Concept

Building on TVSM's core track to road philosophy at EICMA 2025 is the TVS RTR HyprStunt Concept. This sharply styled, tech-forward urban sportsbike opens an entirely new segment in India, bridging everyday practicality with the heritage of TVS racing. For younger riders and city enthusiasts, it has been crafted for precision stunt riding and urban aggression - a bold mechanical expression that sets new benchmarks in lightweight, agile and urban ready riding dynamics.

Complementing these at EICMA, is the recently launched TVS Apache RTX 300, which has opened new frontiers for adventure tourers. This marks the most significant expansion of the TVS Apache nameplate in its 20th year reinforcing its position as India's gold standard for speed, excitement and reliability. The TVS Apache RTX 300 will hit the roads in Europe in Q1 2026.

Electric Innovation

Alongside its stars, TVSM also showcased the smart, advanced EV TVS X and TVS M1-S electric maxi scooter that are engineered for new-age global urban riders. Together, they reiterate TVS's drive to create two-wheelers for any journey for any rider in any continent. The two EVs would be launched in Europe by the end of 2026.

At EICMA, TVS Motor has also unveiled the **AR enabled Heads Up Display (HUD) Helmets** in partnership with Swiss startup Aegis Rider. The Aegis Rider vision helmet keeps the rider's focus on the road and uses spatial anchoring and AR technology to

PRESS RELEASE

display vital information through a heads-up display with first of its kind patented technology. The AR display enhances situational awareness with real-time navigation, hazard alerts, and call notifications without distracting the rider—marking a quantum leap in enhancing riding experience and smart connectivity.

Among the connected technologies that enhance the rider-machine compatibility, TVSM has displayed the **integration of Android Auto with the TVS X** console, powered by TVS SmartXconnect. This connectivity suite offers riders effortless wireless pairing, smart navigation, hands-free calling, and entertainment via Google Assistant, perfectly blending the demands of modern urban life with seamless mobility. Also on display, is the TVS iQube integrated to Smartwatch, redefining the way riders connect with their vehicles. This integration connects the TVS iQube electric scooter with a special edition smartwatch, to provide real-time access to critical updates, including vehicle status, battery insights, tyre pressure, and safety alerts, along with a plethora of native watch features.

TVS Motor Company's expansive lineup at EICMA 2025 also features a broad spectrum of market-leading products that underscore the company's unmatched ability to serve every rider segment. This includes the TVS Jupiter, the TVS NTORQ, the TVS Raider and the TVS TVS iQube. TVSM's flagship mid-size sportsbikes—the fully faired TVS Apache RR 310 and the naked street sportbike TVS Apache RTR 310—along with a limited-edition carbon fiber variant of the TVS Apache RR 310 and a Build-to-Order customized TVS Apache RTR 310 variant are also on display. TVSM has showcased two versions of the TVS Ronin roadster—one standard and another dressed with a full accessory kit—catering to lovers of neo-retro styling. Two elegant and technologically advanced **e-bikes** are also drawing plentiful attention.

Also, on show is TVSM's extensive range of premium merchandise and accessories reflecting its racing heritage and lifestyle appeal. The lineup features high-quality helmets, riding gear, hydration backpacks, Bluetooth intercoms, and lifestyle apparel including t-shirts, sweatshirts, caps, and leather jackets.

TVS Motor Company's debut at EICMA not only sets the pace for the global two-wheeler industry, it stands as a celebration of India's sporting, engineering, and electric mobility talent—proven by the expanding might and success of the Apache nameplate and building on its pioneering success in EVs.

About TVS Motor Company

TVS Motor Company (BSE:532343 and NSE: TVSMOTOR) is a reputed two and three-wheeler manufacturer globally, championing progress through sustainable mobility with four state-of-the-art manufacturing facilities located in India and Indonesia. Rooted in our

TVS BREAKS NEW GROUND WITH THREE BOLD NEW CONCEPTS AT EICMA

At EICMA 2025, TVS Motor Company begins an exhilarating new chapter in its storied journey of performance, innovation, and rider connection. Leading the charge are three trailblazing concepts: the **TVS Tangent RR Concept**, **TVS eFX three o Electric Concept**, and the **TVS RTR HyprStunt Concept**.

Together, these models stand as the new pillars of TVS Motor Company's vision that puts the rider at the heart of innovation, performance, and everyday excitement. Each of these models is crafted to deliver immersive experiences that push the boundaries of motorcycling for the global audience.

The TVS Tangent RR Concept captures TVSM's racing heritage, blending raw sporting emotion with everyday rideability. It is designed for those who seek the exhilaration of the track with each ride, bringing the authenticity of championship-winning DNA to the open road. With a monocoque subframe crafted from intelligent composites that makes it highly aerodynamic

and lightweight, the TVS Tangent RR Concept creates an unmistakable connection between man, machine, and the urge to go faster, farther, every single day. Riders will find themselves part of a legacy, joining a community that values cutting edge performance, adrenaline and aspiration.

PRESS RELEASE

The TVS eFX three o reimagines what the electric motorcycle stands for—delivering a silent, powerful, and ultra-smooth rush that transforms daily commutes and weekend escapes alike. Engineered to set new benchmarks in street motorcycling, its futuristic silhouette channels raw electric power through a design that is taut, minimalistic, yet expressive, intelligent and visceral. The TVS

eFX three o speaks to riders looking for a future-forward mobility experience and stands apart from the crowd by offering both sustainability and pleasure. Its innovative form carries an unmistakable flow, shaped by wind tunnels and digital sculpting.

A full digital cockpit offers seamless integration through the SmartXconnect system, providing ride diagnostics, live mapping, and energy management via smartphone or wearable interface. A floating halo light signature — a thin, hovering ring housing next-gen vision tech — a third eye, provides a vision of what future looks like.

The RTR HyprStunt Concept creates a new wave in urban sport motorcycling. Tailored for the young-at-heart and city enthusiasts, it is crafted for precision stunt riding and urban aggression. The TVS RTR HyprStunt Concept is about standing out in traffic, feeling a sense of ownership over every turn, and making the daily ride not just efficient, but exhilarating.

Collectively, these concept models are beacons that showcase TVS Motor Company's understanding of evolving rider lifestyles and aspirations. The TVS Tangent RR Concept, eFXthree o, and TVS RTR HyprStunt Concept position TVS as a leader not only in performance, but also in shaping the next generation of motorcycling experiences—giving every rider, from seasoned enthusiasts to urban explorers, a sense of thrill, adrenaline, and community of two wheels.

TVS TO LAUNCH THE APACHE RTX 300 IN EUROPE, SHOWCASED AT EICMA

The TVS Apache RTX 300 - a new benchmark for adventure tourers - first launched in India three weeks ago, is set to be launched in Italy and other markets in Europe. The motorcycle that has garnered huge appreciation from the community in India, brings racing precision and everyday comfort onto a single platform. Built on the RT-XD4 platform, it brings together TVS's rally-racing DNA with refined design and comfort suited for modern explorers. Whether conquering rugged European trails or cruising alpine passes, the TVS Apache RTX 300 strikes the perfect balance of performance and poise.

Engineering Powerhouse

Powered by a 299.1 cc liquid-cooled DOHC engine producing 36 PS and 28.5 Nm, the TVS Apache RTX 300 delivers immediate torque and exceptional tractability across varied terrains. Its light steel trellis frame and aluminium swingarm ensure agility, while a 6-speed gearbox with assist and slipper clutch

guarantees smooth transitions through challenging landscapes.

Adventure-Ready Design

High ground clearance (200 mm) and an accessible 835 mm seat provide confidence for diverse riders. Wider handlebars, upright seating, and a sculpted tank encourage long-distance comfort. The styling is assertive—bold yet balanced—with adaptive lighting and minimalist rally-inspired cues.

Smart Connectivity

The SmartXconnect interface adds navigational assistance, block-route mapping, and digital document storage. With voice control, GoPro integration, and real-time tracking, the TVS Apache RTX 300 is a tourer deeply connected to its rider.

PRESS RELEASE

Key Specifications & Features

Engine: 299.1 cc, single cylinder, liquid-cooled, DOHC
Power/Torque: 36 PS @ 9000 rpm, 28.5 Nm @ 7000 rpm
Gearbox: 6-speed gearbox, slipper clutch, quickshifter
Chassis: Steel trellis frame, aluminium cast swingarm
Suspension: Adjustable USD forks, monoshock with 180mm travel
Seat Height: 835 mm, Ground Clearance: 200 mm
Tech: SmartXConnect : map mirroring, GoPro control, TPMS, voice/music control
