

FOR IMMEDIATE RELEASE

TAKE Solutions Implements Oracle Mobile Supply Chain Applications for Leading Housewares Manufacturer

TAKE's knowledge of the Oracle E-Business Suite, coupled with on-shore/off-shore implementation capabilities provides customer with intelligence and strong competitive value

Chennai - June 4, 2012 - TAKE Solutions Ltd. [BSE: 532890 | NSE: TAKE], a leader in the Supply Chain Management and Life Sciences domains, today announced the successful implementation of Oracle Mobile Supply Chain Applications (MSCA®) for a leading manufacturer of household goods. Leveraging TAKE's more than 15 years of expertise with the Oracle® E-business Suite products, the customer has achieved real-time inventory visibility into manufacturing, put-away and customer shipments. TAKE also implemented location control and cycle counting to provide additional visibility and inventory accuracy.

"TAKE's depth of knowledge with Oracle allows us to go beyond standard implementation to deliver extended functionality," said Matt Walker, EVP Supply Chain for TAKE Solutions. "In addition to automating a number of paper-based inventory, manufacturing and shipping processes, we were able to help our customer streamline several additional processes by combining multiple Oracle transactions into a single transaction, utilizing Oracle's Application Developer Framework."

TAKE delivered the project utilizing an on-shore/off-shore resource model to provide an effective mix of functional supply chain automation expertise along with competitive pricing on a global scale. In addition to initial cost-savings, the customer's project team was able to work actively with TAKE's experts for the necessary knowledge transfer to manage and support the Oracle Mobile Supply Chain Applications implementation post deployment.

TAKE's Supply Chain division has been focused on the Oracle E-Business Suite for more than a decade. A Gold level member in Oracle Partner Network (OPN), TAKE has implemented supply chain mobility and automation solutions, streamlined warehouse, manufacturing, procurement and distribution processes, and improved inventory accuracy for more than 300 enterprises running the Oracle E-Business Suite.
