PRESS RELEASE

UltraTech to scale up supply chain electrification with 600+ heavy-duty electric truck fleet

To transport 5 million MT of clinker and other key materials with potential of over 1,17,000 tonnes of net annual CO_2 reduction, displacing the equivalent of 39 million litres of diesel per year.

UltraTech Cement Limited, an Aditya Birla Group company and the world's largest cement company by sales volume and capacity outside China, announced today that it will scale up its electric vehicle fleet in its logistics operations to 600+ EV trucks by December 2026.

UltraTech has signed service contracts with leading EV prime mover manufacturers including Tata Motors, Ashok Leyland, IPLTech, Energy in Motion and Sany along with their subsidiaries and other third-party logistic providers to deploy EV trucks.

The total fleet of 600+ EV trucks will transport about five million MT of clinker and other key materials per annum across Gujarat, Uttar Pradesh, Madhya Pradesh, Rajasthan, Chhattisgarh, Maharashtra and Odisha. Once fully operational, this fleet of over 600 EV trucks will enable a net annual CO_2 reduction of more than 1,17,000 tonnes, displacing the equivalent of 39 million litres of diesel per year.

Mr K C Jhanwar, Managing Director, UltraTech Cement Limited, said, "UltraTech is expanding sustainability beyond its plants by adopting greener logistics solutions. This large-scale transition to green logistics underscores our focus on decarbonising every link of our value chain and supports our commitment to achieving Net Zero."

UltraTech has been a pioneer in advancing sustainable transport in the cement sector, being the first cement company to deploy heavy-duty electric trucks for long-haul transport of clinker and other materials at scale. The Company was among the first in India to introduce green logistics, deploying CNG trucks in 2021 and electric trucks in 2024. UltraTech currently operates 850+ trucks as part of its green logistics operations, including CNG and electric trucks.

UltraTech, with a grey cement capacity of over 200 MTPA in India, operates one of the country's most complex logistics networks. Its electrification strategy covers the entire supply chain—from mine-to-plant movement to inter-plant transport of clinker and other key materials.

About UltraTech Cement Limited

UltraTech Cement Limited is the cement flagship company of the Aditya Birla Group. A USD 10 billion building solutions company, UltraTech has a total Grey Cement capacity of 205.5 MTPA and White Cement/Putty capacity of 3.2 MTPA. It is a signatory to the GCCA Climate Ambition 2050 and has committed to the Net Zero Concrete roadmap announced by GCCA.
