Ref: Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

Dear Sirs,

We write to inform that CARE Ratings Limited has reaffirmed its ratings of 'CARE AAA; Stable' assigned to Long-term bank facilities and its rating of "CARE AAA; Stable / CARE A1+" on the Long-term / Short-term bank facilities of the Company.

Copy of the press release issued by CARE Ratings Limited is attached.

This is for your information and records, please.

Thanking you,

Yours faithfully,
For UltraTech Cement Limited

UltraTech Cement Limited

June 24, 2026

Facilities/Instruments	Amount (₹ crore)	Rating[1]	Rating Action
Long-term bank facilities	2,400.00	CARE AAA; Stable	Reaffirmed
Long-term / Short-term bank facilities	14,700.00	CARE AAA; Stable / CARE A1+	Reaffirmed

Details of instruments/facilities in Annexure-1.

The list of facilities / instruments falling under the purview of various financial sector regulators (FSRs), along with the names of respective FSRs has been disclosed under Annexure-7.

Rationale and key rating drivers

CARE Ratings Limited (CareEdge Ratings) has reaffirmed ratings assigned to bank loan facilities of UltraTech Cement Limited (UltraTech). Reaffirmation reflects its sustained market leadership position in India, supported by a large and well-diversified cement manufacturing footprint across regions. UltraTech has the largest installed cement capacity in India of 200.1 million tonnes per annum (MTPA) as of April 2026. Including its overseas grey cement capacity of 5.4 MTPA in the United Arab Emirates (UAE), its overall grey cement capacity stands at 205.5 MTPA. The company's scale and geographic diversification support volume growth and pricing resilience, which underpin the rating.

The company plans to add ~37 MTPA of cement capacity, which is expected to take the total installed capacity to over 242.5 MTPA by the FY28-end. The capacity has expanded over threefold from ~65 MTPA in FY16 to ~200 MTPA over a decade, reflecting sustained capital deployment aligned with demand growth. CareEdge Ratings expects the ongoing capacity expansion to support UltraTech's market leadership and volume growth in the medium term.

Apart from additional grey cement capacity, the company is expanding its green power generation capacity to ~85% of its estimated power requirements by FY30-end. The company also plans to increase its Waste Heat Recovery System (WHRS: Waste Heat Recovery System) capacity from 414 megawatt (MW) as on March 31, 2026, to 435 MW by FY27-end. Renewable power capacity is planned to increase from 1.39 gigawatt (GW) as on March 31, 2026, to 2 GW by FY27-end. These initiatives are expected to improve energy efficiency and partially mitigate fuel cost volatility in the medium term.

Ratings also factor UltraTech's robust financial profile, characterised by a healthy capital structure and strong debt coverage indicators. Sustained accretion to reserves has supported a strong net worth. Capital expenditure, inorganic acquisitions, and higher working capital requirements led to an increase in debt in FY25. However, strong operating performance led to a marked improvement in debt coverage indicators in FY26. Net debt to profit before interest, lease rentals, depreciation, and tax (PBILDT), including letters of credit (LC) and security deposits from dealers (SD), improved to 1.38x as on March 31, 2026, from 1.89x as on March 31, 2025. CareEdge Ratings expects leverage to remain comfortable, supported by healthy profitability and internal accruals.

The company's liquidity remains superior, supported by strong cash flow from operations, moderate working capital limit utilisation, healthy cash and cash equivalents, and liquid investments.

Despite these strengths, CareEdge Ratings notes that the company remains exposed to cyclicality in the cement industry and volatility in input costs and realisations. Ongoing geopolitical tensions may lead to volatility in pet coke prices. The impact is partly mitigated by the availability of raw material inventory sufficient for ~3-4 months of operations. Prolonged input cost pressure could lead to higher operating costs and remains a key monitorable.

[1]Complete definition of ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors: Not applicable

Negative factors

- Significant debt-funded capital expenditure (capex) or acquisition plans, which leads to deterioration in the net debt to PBILDT (inclusive of SD and LC) beyond 2x on a sustained basis.

Analytical approach: Consolidated

CareEdge Ratings has considered a consolidated view of the parent (UltraTech) and its subsidiaries owing to significant business, operational, and financial linkages between parent and subsidiaries. Consolidated subsidiaries and associates as on March 31, 2026, are listed under Annexure-6.

Outlook: Stable

The rating outlook "Stable" indicates the expected sustenance of its market leadership in the cement business and its strong credit metrics. The company is expected to continue growing its scale of operations supported by incremental cement capacities at a healthy operating profitability margin.

Detailed description of key rating drivers:

Key strengths

Market leader in Indian cement market supported by continuous capacity additions

In FY26, the company commissioned 8 MTPA of new capacity across multiple locations. In April 2026, an additional 8.7 MTPA was commissioned. As a result, UltraTech's total domestic grey cement manufacturing capacity has crossed the 200 MTPA milestone, standing at 200.1 MTPA. Including its international footprint of 5.4 MTPA, UltraTech's global cement manufacturing capacity now stands at 205.5 MTPA, firmly entrenching the company's position as the largest cement producer outside of China. The company plans to add ~37 million tonnes of capacity, which is expected to take the total installed capacity to over 242.5 million tonnes by FY28-end. The company successfully completed the migration of the acquired India Cements Limited and Kesoram cement businesses to the UltraTech brand by the end of March 2026. The successful completion of the brand integration is expected to enhance market positioning, strengthen brand recall, and support the realisation of operational and commercial synergies from acquisitions.

In FY26, the company exhibited strong revenue growth, with topline increasing by ~16.53% to ₹88,511.53 crore (PY: ₹75,955.13 crore). The improvement was primarily driven by higher sales volumes and modestly better realisations. Volumes grew by ~13.56% to 154.25 MT (PY: 135.83 MT), while blended realisations improved by ~2.68% to reach ₹5665 per tonne in FY26. The robust revenue performance, along with a higher share of green power and benefits from operating leverage, led to a notable improvement in profitability. PBILDT increased to ₹17,020 crore (PY: ₹12,557 crore), with margins expanding to ~19.23% (PY: 16.53%).

Regionally diversified revenue streams supported by pan-India installed capacities

Being a commoditised product, cement is significantly cost sensitive and freight/transportation cost is among major costs. Plant location usually dictates the company's major target geographies. UltraTech has 34 integrated manufacturing units, 36 grinding units, one Clinkerisation unit, and 10 bulk packaging terminals. The company has a presence across regions, with the highest capacity in south India at 50.5 MTPA, followed by north India (37.5 MTPA), west India (34.5 MTPA), east India (33.3 MTPA), and central India (35.6 MTPA), and overseas (5.4 MTPA) as on March 31, 2026. UltraTech has a network of over 1.45 lakh channel partners across the country and has a market reach of over 80% across India. In the white cement segment, UltraTech goes to market under the brand name of Birla White. It has two white cement units and four wall care putty units, with a current capacity of 3.3 MTPA. With 465 ready mix concrete (RMC) plants in 167 cities, UltraTech is the largest manufacturer of concrete in India.

Sound operating efficiencies supported by integrated operations

The company's large scale of operations is supported by its internal operating efficiencies, allowing it to control costs and have a wide market reach. The company has established captive TPP of 1333 MW, WHRS of 414 MW, and renewable energy (solar and wind energy) of 1.39 GW as on March 31, 2026, making it self-sufficient for a significant portion of its power requirements being cost effective. The company has also benefitted from increasing its low-cost green power mix to 43% in FY26. It is targeting to increase green power mix to 85% by 2030. The company also has captive limestone reserves to fully meet its requirements for the long term. The company also has split GUs for accessing wider market. This has helped the company maintain healthy operating margins in the range of 21-26% in three fiscal years through FY22, though moderation was observed in FY23 to 15.97%, considering significant cost inflation particularly in power and fuels costs. However, in FY24 and FY25, prices of pet coke and coal moderated leading to power and fuel cost reducing from ₹1749 per tonne in FY23 to ₹1,536 per tonne in FY24 and ₹1,356 per tonne in FY25.

In FY26, the fuel cost further moderated to ₹1270 per tonne, owing to increase in green power mix. This and other efficiencies and slight improvement in blended realisations resulted into PBILDT/tonne improving from ₹924 per tonne to ₹1103 per tonne. However, due to the ongoing West Asia crisis fuel cost is expected to rise with price of pet coke reaching to ~$150-160/tonne. However, the company has long-term fuel contracts, which shall help to partially mitigate the risk arising from increase in fuel prices.

Robust capital structure and strong debt coverage indicators

The company's credit profile is supported by a sustained strengthening in its capital base, with net worth improving to ~₹62,917 crore as of March 31, 2026, from ₹56,180 crore as of March 31, 2025. This growth reflects healthy internal accruals driven by strong operating performance, even after accounting for the payout of a one-time special dividend of ₹240 per share. The continuous accretion to reserves, backed by the company's established scale of operations and above-average operating margins, underscores its strong earnings retention capacity and provides a buffer to absorb potential business risks.

The company's capital structure remains robust and well-calibrated, as reflected in an improvement in overall gearing to 0.45x as of March 31, 2026, from 0.50x as of March 31, 2025. Thus, providing the company with an adequate headroom to support future growth without materially straining its balance sheet. Net debt to PBILDT (including LC) improved to 1.22x as on March 31, 2026, from 1.69x as on March 31, 2025, while the adjusted metric (including LC and security deposits from dealers) improved to 1.38x from 1.89x, owing to improved profitability during the year. The company's debt servicing capacity is further evidenced by a significant strengthening in interest coverage (PBILDT/ Interest), which rose to 9.09x in FY26 (PY: 7.61x). This indicates ample cushion to meet interest obligations and reflects resilience against potential earnings volatility or increases in borrowing costs.

Key weaknesses

Cyclicality of the cement industry

The cement industry is highly cyclical and depends largely on the country's economic growth. There is a high degree of correlation between the GDP growth and growth in cement consumption. Being a cyclical industry, cement goes through phases of ups and downs and accordingly impacts unit realisations.

Exposure to volatile input costs and price realisations

The company is exposed to commodity price risk, arising from raw material price fluctuation (gypsum, fly ash, and slag) and fuel (coal and pet coke). Coal (indigenous and international) is used for power generation to run its plants and fuel for kilns. In the recent past, the cement industry witnessed significant spike in power and fuel costs; post pent-up demand for fuel after multiple COVID-19 waves. Russia-Ukraine war exacerbated fuel cost in FY22 and FY23. Spike in fuel costs impacted profitability margins in FY22 and FY23, while subdued realisations have been constraining factor in profitability margins in FY25. Going forward, fuel costs may be impacted due to the ongoing West Asia crisis, which has led to significant increase in prices of pet coke. Freight expenses, which account for a significant portion of total costs, are expected to be affected by rising diesel prices. To mitigate this, the company is focusing on reducing lead distances to contain costs. The company's profitability will remain exposed to significant input cost volatility and cement price realisation, which depends on each region's demand and supply dynamics (volume growth and installed capacity) to cater the demand in a particular region.

Liquidity: Superior

UltraTech's superior liquidity is supported by healthy cash and cash equivalents, significant generation of gross cash accruals (GCA) and moderate bank limit utilisation. The company generated GCA of ₹13258 crore in FY26. The company's repayment obligations in FY27 is ~₹3000 crore, along with internal cash requirements for its capex plans can be serviced sufficiently by its internal accruals. The company had current investments of ₹3735 and cash and cash equivalent to ₹1384 crore as on March 31, 2026. CareEdge Ratings has taken cognisance of the proposed payout of a one-time special dividend of ₹240 per share, considering its impact on liquidity and capital structure. The company has significant cushion in its working capital limits for incremental working capital requirements, and it has the capability to raise funds from markets at competitive rates. Average fund-based bank limit utilisation was at 58% for the last 12 months through March 2026. UltraTech has robust capital structure, which provides headroom for incremental debt, if required.

Assumptions/Covenants: Not applicable

Environment, social, and governance (ESG) risks

The cement sector has a significant impact on the environment owing to higher emissions, waste generation, and water consumption. This is because of energy-intensive cement manufacturing process and its high dependence on natural resources, such as limestone and coal, among others as key raw materials. The sector has social impact due to its operations affecting local community and health hazards involved. UltraTech has been focusing on energy management, emission reduction, raw material procurement, and waste management to reduce its ecological footprint.

Environment:

- Target of reduction in CO_2 emission to 462 kg CO_2/tonne of cement by FY32. It was 539 CO_2/tonne of cement in FY26.
- Short-term target of 60% electricity by renewable energy and WHRS by FY27. The company is targeting to increase green power mix to 85% by 2030 and 100% of its electricity requirement through renewables sources by 2050, as part of its RE100 commitment.

Social:

- Over 3,000 villagers and 200 marginal farmers have benefited through reliable water access, better crop yields, and reduced dependency on external sources, supporting UltraTech's water positivity and sustainability goals.
- Rejuvenation of water bodies undertaken by Reddipalayam Cement Works, has come as a boost to conserve water in Ariyalur district.

Governance

- Boards of directors constitute 50% independent directors, of which, two are women. Women constitute 20% board of directors. Roles of chairman and managing director are held by separate individuals.

14.	Borrowing Programme ~	-
15.	Issuer Ratings #	-
16.	Credit Ratings for Capital Protection Oriented Schemes (By Mutal Funds and AIFs)	SEBI
17.	Credit Quality Ratings (CQRs) for Mutual Fund Schemes and Schemes of AIFs	SEBI
18.	Listed Security Receipts	SEBI
19.	Unlisted Security Receipts	RBI
20.	Independent Credit Evaluation (ICE)	RBI
21.	Expected Loss Ratings (For Loan Facilities (Fund / Non-Fund Based) from Banks / NBFCs / NHB / FIs)	RBI
22.	Expected Loss Ratings (Listed / Proposed to be Listed Bonds / Debentures / Preference Shares (All Securities))	SEBI
23.	Expected Loss Ratings (Unlisted / Proposed to be Unlisted Bonds / Debentures / Preference Shares (All Securities))	MCA
24.	Unlisted PTCs / Securitisation Notes (Originated by Entities Not Regulated by RBI) *	Investor-side regulator such as IRDAI, PFRDA @

[1]SEBI: Securities and Exchange Board of India; RBI: Reserve Bank of India; MCA: Ministry of Corporate Affairs; IRDAI: Insurance Regulatory and Development Authority of India; PFRDA: Pension Fund Regulatory and Development Authority

* Includes securitisation transactions involving assignee payout, acquirer's payout.

~ The rated instrument may involve issuance of different instruments such as debt securities (listed or otherwise), bank loans, commercial paper (listed or otherwise), among others. The regulator of the instrument may accordingly be SEBI, RBI or MCA and can only be determined upon issuance. In the rating reports subsequent to issuance(s), CareEdge Ratings shall separately capture the rated quantum details and names of respective regulators.

^ Includes bank facilities such as liquidity facility, second loss facility that are part of securitisation transactions.

There is no instrument being rated and hence, Regulator of the Instrument is not applicable. The rating scale and definitions are being followed as stipulated in SEBI Master Circular for CRAs.

@ These ratings were assigned in regulatory regime prior to introduction of SEBI CRA Circular dated February 10, 2026, and the investor side regulators have accordingly been included.

Note: For facilities / instruments falling under the purview of FSRs other than SEBI, the grievance / dispute redressal mechanisms and investor protection mechanisms provided by SEBI shall not be available.

Note on complexity levels of rated instruments: CareEdge Ratings has classified instruments rated by it based on complexity. Investors/market intermediaries/regulators or others are welcome to write to care@careedge.in for clarifications.

About us:
Established in 1993, CareEdge Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the Reserve Bank of India. With an equitable position in the Indian capital market, CareEdge Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CareEdge Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CareEdge Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.
