### MANAGEMENT DISCUSSION AND ANALYSIS REPORT

It provides a clear insight into current year activities, examining key financial metrics, emerging trends in the spinning industry, and sector-specific opportunities and challenges. The report also outlines the Company's strategic approach to navigate these dynamics and enhance its financial and operational position, presenting an integrated picture of its financial standing and future direction.

The Management Discussion and Analysis report presents a comprehensive review of United Polyfab Gujarat Limited's financial performance for the fiscal year ended March 31, 2026, alongside an informed overview of the spinning industry. It highlights key trends shaping the sector, including Gujarat's newly launched Textile Policy 2024, which introduces attractive incentives—such as capital subsidies (10–35% of eligible fixed capital investment), interest subsidies (5–7% over 5–8 years), power subsidies (₹1 per unit), and payroll assistance—aimed at encouraging modernization, sustainability, and value-chain integration.

A notable advancement under this policy is the inclusion of spinning units—previously excluded—bringing UPGL and similar manufacturers into the ambit of these benefits. Simultaneously, industry stakeholders face pressures such as rising raw material costs driven by increased cotton MSP, coupled with global headwinds like steep U.S. tariffs targeting textile exports.

Against this backdrop, UPGL's strategy emphasizes leveraging new state and central government incentives, enhancing operational efficiencies, and exploring non-U.S. markets to mitigate adverse macroeconomic effects. This section spotlights how the Company is responding to these developments, articulating its financial outcomes, strategic adaptations, and resilience amid evolving industry dynamics.

#### Indian Economic Overview:

India's economy remained remarkably resilient in the face of global disruptions. Strong domestic consumption, higher government spending on infrastructure and an accommodative monetary policy powered this growth. Retail inflation eased to 4.6% in FY 2025-26, the lowest since FY 2018-19. This led the Reserve Bank of India (RBI) to implement its first rate cut in five years to 6%, thereby supporting continued growth.<sup>10</sup> The financial services sector remained stable, supported by well-capitalized banks and a solid regulatory framework. Government initiatives, such as 'Make in India' spurred domestic manufacturing growth, while long-term prospects in manufacturing and technology attracted strong foreign investment. The expansion of India's digital economy, including e-commerce and digital payments, further boosted economic activity. Imported commodity prices in India eased in FY 2025-26, with the World Bank's Commodity Markets Outlook projecting a 5.1% decline in 2025 driven largely by falling crude oil and metals prices, which kept domestic inflationary pressures anchored. Cotton prices in India averaged around INR 7,800 per quintal in FY 2025-26, supported by lower production and an INR 589 MSP increase in May 2025 that set prices at INR 7,710–8,110 per quintal.<sup>11</sup> India's manufacturing sector grew at 4.8% in FY 2025-26, up from 4.7% in FY 2025-26. This contributed to 7.4% GDP growth in the fourth quarter of FY 2025-26. <sup>12</sup> The government increased budget allocations to support manufacturing, with FDI in the sector reaching USD 184 Billion—a 90.5% rise over the past decade—fueled by production-linked incentive schemes. <sup>13</sup> Over the past six financial years, total FDI inflows amounted to USD 464.54 Billion. <sup>14</sup> With robust physical and digital infrastructure, India is now well-positioned to expand the share of the manufacturing sector in the economy and strengthen its role in global supply chains.

#### Indian Textile Market:

The textile and apparel (T&A) market in India has been on an upward trajectory, growing from USD 106 Billion in FY 2019-20 to USD 147 Billion in FY 2025-26, at a CAGR of 7%. With a contribution of approximately 2.3% to the national GDP in FY 2025-26 and accounting for 3.91% of global textile and apparel trade, India remains one of the world's largest textile markets. Textile and apparel exports surged by 6%, reaching USD 36.6 billion in FY 2025-26, despite soft festive demand and competitive imports from Bangladesh. During the same period, exports of cotton-based products (yarn, fabrics, made-ups and handloom) grew by 3.19% to USD 12.056 Billion. Gujarat, Maharashtra, Tamil Nadu, Punjab, Uttar Pradesh and West Bengal continue to dominate India's textile production. However, fluctuating cotton prices averaging INR 7,800 per quintal in FY 2025-26 added cost pressures, especially for spinners and weavers. Nevertheless, India's abundant raw-material base with a cotton output of 301.75 lakh bales in FY 2025-26 provided a firm foundation for competitive manufacturing.<sup>2</sup> To meet the Ministry of Textiles' target of reaching USD 250 Billion by FY 2030-31, the market will need to grow at a CAGR of 9% onwards.

#### Threats:

- Global Market Volatility: Economic slowdowns, geopolitical tensions, and trade barriers can impact exports and input costs
- Intense Industry Competition: Price and quality pressures from global players, especially in textiles and paper
- Raw Material Price Fluctuations: Cotton, pulp, and chemicals are subject to price volatility, affecting margins
- Regulatory and Environmental Compliance Risks: Stricter norms, particularly in water-intensive sectors, can lead to cost and operational pressures
- Currency Fluctuations: Affects export competitiveness and profitability

### RISKS AND CONCERNS:

United Polyfab Gujarat Limited operates in a dynamic and competitive textile landscape marked by several notable risks that could affect operational and financial stability

- Raw material related Risk: Raw material being a major cost of production, Company's operations and profitability are significantly dependent on price and timely availability of raw materials used in production process. The primary raw materials for our textile operations are raw cotton and spandex yarn.
  - Cotton: Being an agricultural commodity, prices of cotton are affected by a range of factors like changes in weather conditions affecting sowing, government policies and regulations. Governing taxes, tariffs, duties, subsidies, import and export restrictions on agricultural commodities, overall supply situation in the world, etc. all these influence pricing and demand supply situation in this industry. The planting of certain crops versus other uses of agricultural resources, the location and size of crop production, volume and types of imports and exports, etc. determine availability of cotton.

The Company has an experienced team for procurement of raw cotton with a deep understanding of this natural fibre. As a Company, we have adopted various processes whereby we are expanding our sources across different supply chain intermediaries and other stake holders. Cotton being an international commodity, our focus remains optimizing domestic and international opportunities to create a competitive edge of sourcing based on landed cost.

- **Market related Risk:** The Company's performance is dependent upon the demand situation in individual business segments. A slowdown in demand may lead to decline in production/ sales and thus impact profitability. The market demand is also dependent on global economic and international trade dynamics. The USA reciprocal tariff being negotiated can have a major impact international trade directions and demand. This is likely to impact textile trade in a major way.

In the domestic market as well, the Company faces competition from organized big players and the unorganized small and fragmented players. The Company has developed a good reputation amongst the domestic traders, garment manufacturers and brands due to quality, design capabilities and cost. Further, the Company has started building relationships with large retailers (physical and online) to supply fabrics and garments. The Company's operations are now getting scaled up and it is fully prepared to meet larger volumes. The Company is confident that it would regain a preferred supplier status for big brands and retailers given the quality, design capability and the capacity to provide large volumes on a consistent basis

- **Financial Risk:** **United Polyfab Gujarat Limited** maintains structured banking facilities comprising a **term loan** from banks and **working capital limits** to support its operations. As part of its financial discipline, UPGL is required to **periodically meet interest obligations** on both the term loan and working capital facilities, while also **adhering to the repayment schedule** for the term loan as per the terms agreed with its lenders.
- **Information Technology Risk:** Information and Technology being the major backbone of Company's overall operation and data storage/ analysis, is another key risk area identified by the Company and several measures are being taken to strengthen the same and mitigate the risk associated with this.

Some of the improvements done during the financial year are:

- Old and obsolete IT systems are replaced with new systems. (Ongoing process)
- Network infrastructure is being hardened to mitigate security threats (ongoing process).

#### BOARD EVALUATION:

Pursuant to the provisions of the Companies Act, 2013 (including Schedule IV) and SEBI (LODR) Regulations, 2015, the Board conducts a formal annual evaluation of its own performance, those of its Committees, and its individual Directors. The Board's performance review includes assessments of its composition, effectiveness of processes, governance standards, and quality of information flow. Committee evaluations focus on the clarity of mandate, fulfillment of responsibilities, and the frequency and effectiveness of meetings. Individual Directors—including the Chairman—are evaluated on adherence to the Board's Code of Conduct, participation in meetings, preparedness, and contribution to the strengthening of corporate governance. In line with regulatory guidance, Independent Directors convene separately to evaluate the performance of non-independent Directors, the Board as a whole, and the Chairperson; while the Board as a whole (excluding the Independent Director under review) evaluates Independent Directors.

#### BOARD AGENDA:

The annual calendar of Board and Committee Meetings is agreed upon at the beginning of each year. Meetings are governed by a structured Agenda and a Board Member may bring up any matter for consideration of the meeting in consultation with the Chairman. Agenda papers are generally circulated to the Board Members at least 7 working days in advance. In addition, for any business exigencies the resolutions are passed by circulation and later placed at the subsequent Board or Committee Meeting for ratification/ approval. Detailed presentations are made at the meetings on all major issues to enable the Board to take informed decisions.

#### NUMBER OF BOARD MEETINGS:

The Board and its Committees convene at pre-scheduled intervals, aligned with the availability of Directors and Committee members, with Committee meetings typically held just prior to the Board meeting. Recommendations from these Committees are presented to the Board for approval or noting. The gap between two consecutive Board meetings consistently remained well within the regulatory maximum of 120 days. Meeting notices are dispatched within the timelines prescribed under the Companies Act, 2013 and SEBI (LODR) Regulations.

All meetings are conducted in person at the Company's registered office, with agendas, comprehensive background notes, and explanatory material circulated in advance. In exceptional cases, supplementary items may be added to the agenda. The agenda is prepared by the Company Secretary in consultation with the Managing Director and Chairman. Core statutory and material matters—as outlined in Part A of Schedule II of SEBI (LODR)—along with compliance updates, and Minutes of Board

Committee meetings, are tabled for consideration.

Additionally, the Managing Director and/or CFO deliver operational presentations during these sessions. Post-meeting, key decisions are promptly communicated to relevant departments. United Polyfab Gujarat Limited has developed its Nomination & Remuneration Policy in full compliance with the Companies Act, 2013 and SEBI (LODR) Regulations, 2015, to ensure fair and equitable compensation across Directors, Key Managerial Personnel (KMP), and employees. This market-driven policy is crafted to attract, retain, and motivate high-performing talent by aligning compensation with individual skills, experience, and responsibilities. The reward structure comprises a strategic mix of fixed salary, benefits, perquisites, and performance-linked variable pay, reflecting prevailing industry standards and role-specific expectations. Our remuneration framework is performance-oriented, with periodic reviews that acknowledge and incentivize achievement. Executive leadership—comprising the Chairman, Managing Director, and Executive Directors—are remunerated through salary, benefits, and allowances. Notably, no pecuniary transactions occurred with Non-Executive or Independent Directors beyond approved remuneration and disclosures in the “Related Party Transactions.” This disciplined approach ensures that compensation remains transparent, merit-based, and consistent with stakeholder interests.

The Remuneration Policy has been updated on the website of the Company at: <https://www.upgl.in/policy/nomination-and-remuneration-policy.pdf>

#### **BOARD COMMITTEES:**

During the year under review, the Company maintained all mandatory Board Committees—Audit, Nomination & Remuneration, Stakeholders’ Relationship, and Corporate Social Responsibility—as well as an additional non-mandatory committee dedicated to overseeing routine business transactions. Each Committee operates within defined terms of reference regarding its scope, responsibilities, and authority. Committee decisions and recommendations are systematically presented to the Board for approval or noting, and the procedural norms applicable to Board meetings are largely extended to Committee sessions wherever feasible. Deferred tax resulting from "timing difference" between taxable and accounting income is accounted for using the tax rates and laws that are enacted or substantively enacted as on the balance sheet date. Deferred tax asset is recognized and carried forward only to the extent that there is a virtual certainty that the asset will be realized in future.

**j. Provisions**

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources will be required to settle the obligation and a reliable estimate can be made. These are reviewed at each reporting date and adjusted to reflect the current best estimates.

## **k. Earnings per Share**

Basic earnings per share is calculated by dividing the net profit after tax by the weighted average number of equity shares outstanding during the year adjusted for bonus element in equity share. ## **n. Financial Instruments**

### **i. Financial Assets**

#### **A. Initial Recognition and Measurement**

All Financial Assets are initially recognised at fair value. Transaction costs that are directly attributable to the acquisition or issue of Financial Assets, which are not at Fair Value Through Profit or Loss, are adjusted to the fair value on initial recognition. Purchase and sale of Financial Assets are recognised using trade date accounting. However, trade receivables that do not contain a significant financing component are measured at transaction price.

## **B. Subsequent Measurement**

### **a) Financial Assets measured at Amortised Cost (AC)**

A Financial Asset is measured at Amortised Cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise to cash flows on specified dates that represent solely payments of principal and interest on the principal amount outstanding.

### **b) Financial Assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)**

A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates to cash flows that represents solely payments of principal and interest on the principal amount outstanding.

### **c) Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)**

A Financial Asset which is not classified in any of the above categories are measured at FVTPL. Financial assets are reclassified subsequent to their recognition, if the Company changes its business model for managing those financial assets. Changes in business model are made and applied prospectively from the reclassification date following the changes in business model in accordance with principles laid down under Ind AS 109 – Financial Instruments.

## **C. Investment in Subsidiaries, Associates and Joint Ventures**

The Company has accounted for its investments in Subsidiaries, associates and joint venture at cost less impairment loss (if any).

## **D. Other Equity Investments**

All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in 'Other Comprehensive Income'. However, dividend on such equity investments are recognised in Statement of Profit and loss when the Company's right to receive payment is established.

## **E. Impairment of Financial Assets**

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of Financial Assets other than those measured at Fair Value Through Profit and Loss (FVTPL), limited to measurement trade receivables. Expected Credit Losses are measured through a loss allowance at an amount:

- equal to 20 % of those receivables who are outstanding beyond 180 days (limited to within 365 days) of the bill date;

- equal to 50 % of those receivables who are outstanding beyond 365 days (limited to within 720 days) of the bill date;
- equal to 100% of those receivables who are outstanding beyond 720 days (expected credit losses that result from all possible default events over the life of the financial instrument).

For Trade Receivables the Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

## **ii. Financial Liabilities**

### **A. Initial Recognition and Measurement**

All Financial Liabilities are recognised at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

### **B. Subsequent Measurement**

Financial Liabilities are carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

## **iii. Derecognition of Financial Instruments**

The Company derecognises a Financial Asset when the contractual rights to the cash flows from the Financial Asset expire or it transfers the Financial Asset and the transfer qualifies for derecognition under Ind AS 109. A Financial liability (or a part of a Financial liability) is derecognised from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

## **iv. Offsetting**

Financial Assets and Financial Liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

**o. Non-Current Asset Held for Sale**

Non-Current asset or disposal groups comprising of asset and liabilities are classified as 'held for sale' when all the following criteria are met:

- I. Decision has been made to sell,
- II. The asset is available for immediate sale in its present condition,
- III. The asset is being actively marketed and
- IV. Sale has been agreed or is expected to be concluded within 12 months of the balance sheet.

Subsequently, such non-current assets and disposal groups classified as 'held for sale' are measured at the lower of its carrying value and fair value less cost to sell. Non-Current assets held for sale are not depreciated or amortised.

A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

### **(n) Financial Instruments**

#### **i. Financial Assets**

##### **A. Initial Recognition and Measurement**

All Financial Assets are initially recognised at fair value. Transaction costs that are directly attributable to the acquisition or issue of Financial Assets, which are not at Fair Value Through Profit or Loss, are adjusted to the fair value on initial recognition. Purchase and sale of Financial Assets are recognised using trade date accounting. However, trade receivables that do not contain a significant financing component are measured at transaction price.

##### **B. Subsequent Measurement**

###### **a) Financial Assets measured at Amortised Cost (AC)**

A Financial Asset is measured at Amortised Cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise to cash flows on specified dates that represent solely payments of principal and interest on the principal amount outstanding.

###### **b) Financial Assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)**

A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates to cash flows that represents solely payments of principal and interest on the principal amount outstanding.

###### **c) Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)**

A Financial Asset which is not classified in any of the above categories are measured at FVTPL. Financial assets are reclassified subsequent to their recognition, if the Company changes its business model for managing those financial assets. Changes in business model are made and applied prospectively from the reclassification date following the changes in business model in accordance with principles laid down under Ind AS 109 - Financial Instruments.

### **C. Other Equity Investments**

All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in 'Other Comprehensive Income'. However, dividend on such equity investments are recognised in Statement of Profit and loss when the Company's right to receive payment is established.

### **D. Impairment of Financial Assets**

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of Financial Assets other than those measured at Fair Value Through Profit and Loss (FVTPL). Expected Credit Losses are measured through a loss allowance at an amount:

- equal to 20 % of those receivables who are outstanding beyond 180 days (limited to within 365 days) of the bill date;
- equal to 50 % of those receivables who are outstanding beyond 365 days (limited to within 720 days) of the bill date;
- equal to 100% of those receivables who are outstanding beyond 720 days (expected credit losses that result from all possible default events over the life of the financial instrument).

For Trade Receivables the Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

## **ii. Financial Liabilities**

### **A. Initial Recognition and Measurement**

All Financial Liabilities are recognised at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

### **B. Subsequent Measurement**

Financial Liabilities are carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date,

the carrying amounts approximate fair value due to the short maturity of these instruments.

### iii. Derecognition of Financial Instruments

The Company derecognizes a Financial Asset when the contractual rights to the cash flows from the Financial Asset expire or it transfers the Financial Asset and the transfer qualifies for derecognition under Ind AS 109. A Financial liability (or a part of a Financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

### iv. Offsetting

Financial Assets and Financial Liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

### o. Non-Current Asset Held for Sale

Non-Current asset or disposal groups comprising of asset and liabilities are classified as 'held for sale' when all the following criteria are met:

- i) Decision has been made to sell,
- ii) The asset is available for immediate sale in its present condition,
- iii) The asset is being actively marketed and
- iv) Sale has been agreed or is expected to be concluded within 12 months of the balance sheet.

Subsequently, such non-current assets and disposal groups classified as 'held for sale' are measured at the lower of its carrying value and fair value less cost to sell. Non-Current assets held for sale are not depreciated or amortised.
