ANALYSTS SAY CORRECTION OF AROUND 10-15% POSSIBLE IF EARNINGS GROWTH DOESN'T HOLD UP

Valuations, Weak Demand Slow Auto Bull Run

Ruchita Sonawane

Mumbai: The multi-year bull run in automobile shares is losing its steam as investor appetite for the sector is waning amid concerns over elevated stock valuations and sluggish vehicle demand. The Nifty Auto index has declined over 11% in the past month as against the 5.7% decline in the benchmark Nifty. Analysts said the auto index could drop at least 10-15% from current levels.

"Post-Covid, auto shares have experienced a bull run, and despite some adjustments over the past six months, valuations remain stretched," said Krishna Appala, Senior Research Analyst, Capitalmind Research. "If earnings growth doesn't hold up, corrections of around 10-15% are likely as share prices have already surged over the last three years."

Since April 2020, the Nifty Auto Index has surged 430% as against the 201% up move in the Nifty

Among autoshares, Maruti Suzuki gained 388%, Tata Motors soared 1250%, Mahindra & Mahindra jumped 892%, Bajaj Auto rose 980% and Hero MotoCorp advanced 702%.

The elevated valuations in auto shares after the run up in the share prices prompted Hyundai Motor India to launch the country's largest IPO of ₹s 27,670 crore. The mega Hyundai IPO might have signalled a top for auto shares, reflecting in the stock making a weak debut on the bourses on October 29. The company's stock is currently 7% below its issue price.

"The Hyundai IPO earlier this month marked the peak of valuations in the sector, with Hyundai trading at 27 times Price to Earnings (PE) ratio, while market leader Maruti Suzuki is trading at 24 times PE," Appala said.

Analysts said signs of a slowdown in intransigent demand is weighing down sentiment.

India's largest two-wheeler maker, Bajaj Auto guided for lower two-wheeler sales growth in its second-quarter results. The company's shares plunged 13.1% post the results—the largest single-day fall since March 2020—with the pessimism rubbing off on its peers. Hero MotoCorp and TVS Motor, which fell over 3% each.

"The momentum in two-wheeler stocks was strong ahead of Bajaj Auto's guidance on weak festive demand," said Munnish, Mandishha, Research Analyst, Anand Rathi Institutional Equities.

"The auto sector peaked in November 2023 in terms of volumes, followed by a small uptick in April this year, said analysts. Since then, auto sales have declined, and the sector is currently amid a sluggish phase in the cycle.

Appala noted that vehicle launches have risen to around 17,000 units, compared to an average of 67,000, indicating a slowdown.

"The auto sector has been facing slow growth since Q1, initially overshadowed by election uncertainty," said Krishna Appala, Senior Research Analyst, Capitalmind Research. "However, the sluggish growth persisted in Q2 as well. Bajaj Auto's commentary also indicates a slowdown."

BUYING OPPORTUNITY?

Auto shares are expected to remain under pressure over the next two to three quarters, he said. The near-term catalyst for the auto sector could be an overall uptick in consumption, driven by interest rate cuts.

Mandishha said that the corrections in auto shares could be a buying opportunity for investors. However, two-wheeler shares to do better than those in Passenger Vehicle and Commercial Vehicle segments.

"Given that the demand is subdued in the PV segment and high valuations, Hyundai has witnessed corrections after the IPO, but it remains a structurally strong player in the sector."

Oil Slips 5% After Israel's Limited Attack on Iran

Oil prices tumbled by around \$4 a barrel on Monday after Israel's retaliatory strike against Iran at the weekend bypassed oil and nuclear facilities and did not disrupt energy supplies. Brent futures were down \$4.13, or 5.43%, at \$71.92 a barrel at 1445 GMT, while WTI U.S. crude futures lost \$4.04, or 5.63%, to \$67.74.

Both Brent and U.S. West Texas Intermediate crude futures hit their lowest since Oct 1 at the open. The benchmarks gained 4% last week in volatile trade. -Reuters

US Poll Jitters, RBI Gov Talk Push Up 10-Y Yields

VOLATILITY IN STORE Strong US jobs data has also led to exuberance cooling off, say dealers

Rozebud Gonsalves

Mumbai: Yields on the 10-year benchmark government security climbed three basis points since the previous close, on the back of rising US treasury yields, ahead of presidential elections in the world's largest economy, bond dealers said.

Yields on the 10-year benchmark security closed at 6.87% on Monday versus its previous close of 6.84% on Friday, CCL data shows. Yields closed at 6.82% a week ago. The 10-year US bond yield shot up by nine basis points to 4.27% on Monday.

Trading hours were extended by 30 minutes on Monday closing at 5:30 pm, due to a technical glitch on the NSE-OM trading platform, dealers said.

A rise in government bond yields increased borrowing costs across the economy as sovereign debt yields are the benchmarks for determining the

price of corporate borrowing.

Speculation of Trump being re-elected by markets is causing global risk aversion, rising the yields of bonds in the US.

"Markets are speculating Trump being re-elected which will cause volatility and disruptions in the short run. Plus, after stronger than expected jobs data in the US, the possibility of another 25 basis point rate cut by the Fed has risen, causing the cut to submerge in yields to unwind," said Vikas Goel, MD & CEO of PNB Gilts.

"The US Federal Reserve delivered a 50 basis point rate cut in September, causing bond yields to soften. However, stronger than expected jobs data from the US has reduced the likelihood of another 50 basis point rate cut that the market was pricing in earlier, dealers said.

The non farm payroll (NFP) data for September showed the biggest jump in six months, with more than 254K jobs, versus expectations of 140K jobs. The NFP data for October is expected on Friday, November 1. Markets are fully pricing in a 25 basis point rate cut by the US Fed in November, with the likelihood for a 25 basis point cut at 59%, according to the CME FedWatch group.

The recent speech by the Governor of Reserve Bank of India also caused bond yields to rise, as the governor said it would be "very very risky" for a rate cut when the inflation is at 5.5%. "When your inflation is 5.5%, and the next print is also expected to be high, you can't be cutting rates at that point. Therefore, a rate cut at this stage will be very premature and can be very, very risky," said RBI governor Shaktikanta Das.

Realty Cos Raise ₹12,801 cr via QIP in 9 Mths

Real estate sector accounted for 17% of QIP raised so far in 2024, second only to green power firms

Faizan Haider

New Delhi: The real estate sector accounted for about 17% of qualified institutional placement (QIP) in the first nine months of 2024, raising ₹12,801 crore — second only to the renewable energy sector in terms of the funds raised.

After the pandemic, Indian real estate developers have been aggressively tapping capital markets through initial public offerings (IPOs), according to real estate consultancy Anarok's analysis of available data trends of listed developers on the National Stock Exchange. Indian companies raised ₹15,833 crore via QIP across sectors till the end of September this year, according to the data. In QIPs, companies sell shares publicly to institutional investors.

Enhanced transparency, a robust post-pandemic residential real estate recovery and strong investor confidence are factors driving the surge in activity, thereby positioning the sector for continued growth.

FILE PHOTO: "After renewable energy real estate comes in second highest among sectors to raise funds through QIP so far this year. This strong QIP activity highlights the sector's crucial role in India's broader capital markets and the institutional investors' growing confidence in Indian real estate," Anarok group chairman Anuj Puri said.

between January 2021 and September 2024, making it the second best performing sector index after the Nifty PSU Bank Index.

This growth in the stock market reflects a broader confidence in the real estate sector and its ability to deliver long-term value. Robust housing sales growth after the pandemic has prompted leading developers to unleash inventory across markets. As per Anarok data, more than 1.36 million units have been launched in the top seven cities between 2023 and end-September 2024.

Concurrently, about 1.44 million housing units have been sold in these cities year-to-date. Strong demand led to a more than 10% decline in unsold housing inventory in this period, despite the high rate of supply addition.

"To fund their aggressive expansion, these developers are turning to IPOs and the QIP route. We expect investor participation to grow many-fold in coming years," Puri said.

Homebuyers Withdraw Insolvency Case Against Skylark Mansions

CoC approves CIRP withdrawal with over 90% votes

Bangaluru: The Skylark Itaca Buyers Welfare Association has withdrawn its case against Skylark Mansions in the National Company Law Tribunal, Bengaluru earlier this month.

In an October meeting, the Committee of Creditors (CoC) approved the withdrawal of the Corporate Insolvency Resolution Process (CIRP) with 94.32% of votes under Section 12A. Additionally, HDFC and Arcil Asset Reconstruction Company abstained from voting too.

"Over 78% of the homebuyers voted in favour of the withdrawal of the case," mentioned the order copy.

"Skylark Mansions is one of the few real estate companies to successfully settle the issue and have the complaint withdrawn by the petitioners. The company's promoters have worked diligently to resolve the matter legally. Their primary intention has always been to deliver the promised homes to their buyers. This is the first time the company has faced such a challenge, and they are eager to take on new projects and continue their good work," said the company to ET's query.

In 2020, The National Company Law Tribunal has appointed an Interim Resolution Professional (IRP) against the Skylark Itaca project, a special purpose vehicle for construction of the residential project Skylark Itaca.

The IRP has also released the company from CIRP and the Resolution Professional has been directed to return the control to the Suspended Board of Directors. "The Corporate Debtor is brought out from the rigour of CIRP, and the IRP is directed to handover the charge of the assets and affairs of the corporate debtor back to the suspended members of the board of directors of the corporate debtor. Further, the IRP is discharged from his duties," the order mentioned.

Around 380 buyers from Skylark Itaca Buyers Welfare Association filed a petition in NCLT that passed judgment in favour of the homebuyers in February 2020. This also included initiation on withdrawal of cash and a counter signature of the IRP at the back side of the cheques or day-to-day functioning of the company.
