Tata Power Renewable Energy Limited Commissions 100.8 MW Jewali Wind Project in Maharashtra

- To generate 299 million units of clean electricity annually and offset over 245 million kg of CO₂ emissions
- Project to power Tata Power Mumbai Distribution consumers and support its Renewable Purchase Obligation compliance

Caption: Jewali wind project by Tata Power Renewables

National, July 3, 2026: Tata Power Renewable Energy Limited (TPREL), a subsidiary of The Tata Power Company Limited, has successfully commissioned its **100.8 MW Jewali Wind Project** in Dharashiv district, Maharashtra. The electricity generated from the project will be supplied to Tata Power Mumbai Distribution and will help contribute towards its Renewable Purchase Obligation targets, supporting its transition to a more sustainable and environmentally responsible Utility.

The project underscores TPREL's strong execution capabilities and commitment to delivering large-scale renewable energy projects. The milestone further strengthens the TPREL's growing renewable energy portfolio and reinforces its leadership in India's clean energy transition.

The project comprises **28 SG 3.6-145 Wind Turbine Generators**, based on advanced horizontal-axis wind turbine technology. The facility is expected to generate approximately **299 million units (kWh)** of clean electricity annually

The project is expected to offset nearly **245 million kg of CO₂ emissions every year**, based on an estimated emissions reduction of **0.82 kg of CO₂ per unit of electricity generated**, making a significant contribution towards decarbonisation and enhancing Tata Power's clean energy portfolio.

With this commissioning, TPREL's wind energy portfolio now exceeds **3.9 GW**, including more than **1.3 GW of operational capacity**, with the balance under various stages of development across Rajasthan, Gujarat, Maharashtra, Andhra Pradesh, Karnataka, and Tamil Nadu.

The project also advances Tata Power's long-term vision of achieving 100% clean energy generation by 2045 and complements its expanding renewable energy portfolio.

With the addition of the Jewali Wind Project, TPREL's total renewable utility capacity has reached 11.6 GW. Of this, 6.7 GW is operational, including 5.4 GW of solar and 1.3 GW of wind capacity, while 4.9 GW is under various stages of implementation. The under-construction portfolio comprises approximately 2.1 GW of solar, 2.6 GW of wind projects and 0.2 GW of BESS, which are expected to be commissioned in phases over the next 6-24 months.

About Tata Power

The Tata Power Company Limited, a vertically integrated power company and part of the Tata Group, India's largest multinational business conglomerate, has built a diversified portfolio across the entire power value chain, with its total operational and pipeline capacity surpassing 26 GW. This includes approximately 17.5 GW of clean and green energy capacity (including projects under construction) and around 8.9 GW of thermal generation capacity, ensuring a balanced and resilient energy mix. The Company also has a strong transmission and distribution footprint, with over 7,400 circuit kilometres of transmission lines, including pipeline projects, and serves nearly 13 million customers across its distribution businesses, making it one of India's largest private power distribution companies.

Further strengthening its leadership in future-ready energy solutions, Tata Power has established 4.9 GW of integrated solar cell and module manufacturing capacity, signed 2.8 GW of pumped hydro storage projects, and expanded its EV charging network to over 7,000 public charging points across 706 cities and towns in India.

As a pioneer in India's clean energy transition, Tata Power remains committed to achieving Net Zero by 2045 and continues to partner with public and private stakeholders to deliver reliable, sustainable, and technology-led energy solutions across the country.
