Dear Sir/Madam,

Sub: Proposed transfer of equity shares to the Investor Education and Protection Fund Authority

Pursuant to Regulation 47(3) of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, we enclose a copy of the Notice published on 1st December 2024, in the newspapers [Financial Express (English) & Vijaya Karnataka (Kannada)] in connection with the proposed transfer of equity shares to the Investor Education and Protection Fund (IEPF) Authority pursuant to the provisions of 124(6) of the Companies Act, 2013 and the rules referred thereunder.

Kindly take note of the same.

Thanking you.

Yours faithfully,
For **Wendt (India) Limited**

Arjun Raj P
Company Secretary

2025 to be the 'year of industry': MP CM

MADHYA PRADESH CHIEF minister Mohan Yadav has declared 2025 as the 'Year of Industry and Employment' to promote industrial development in the state. Under this initiative, the biennial flagship event, 'Invest Madhya Pradesh - Global Investors Summit 2025', will be organised in Bhopal in February 2025. The event will attract investors, interactive sessions on investment opportunities at national and international level. The minister was on a visit to the UK and Germany from November 24-30.

File tax returns till December 15

TAX AUTHORITIES HAVE extended the income tax return filing deadline by another 15 days to December 15 for the financial year 2023-24. The due date for furnishing the return of income under section 139(1) of the Income-tax Act, 1961 in the case of an assessee who is required to furnish a report referred to in section 92E, is November 30. The Central Board of Direct Taxes has extended the deadline to December 15, 2024, for the assessment year 2024-25, an official order said. The income tax return filing deadline has been extended for taxpayers who have international transactions and are required to furnish reports under Section 92E.

GDP AT SEVEN-QUARTER LOW

Analysts pare India forecast after Friday's growth shocker

BLOOMBERG November 30

ECONOMISTS LOWERED THEIR India growth forecast after data released Friday showed a sharp deceleration of the country's economic expansion. The economy slumped to a seven-quarter low of 5.4% in the July-Sept period, much lower than consensus estimates and below the RBI's 7% projection. The softer expansion has prompted economists from Goldman Sachs group to Barclays to lower their full-year growth estimates. Goldman's economists Santanu Gengupta and Arjun Varma have revised their projection to 6% for the year through March 2025, down from 6.4%. Other analysts also lowered their forecasts aggressively for the year.

The "growth shock" was due to "much lower manufacturing growth than assumed," said Madhavi Arora, lead economist at Emkay Global Financial Services,

REVISED PROJECTIONS

Goldman Sachs revises projection to 6%, down from 6.4%
Barclays, Standard Chartered also lower growth estimates
IDFC First Bank says higher chance of rate cut cycle from Dec

Emkay Global Financial Services lowers growth forecast to 6% from 6.5%

who lowered her growth forecast to 6% from 6.5% earlier. "We see urban consumption staying pale ahead owing to weaker incomes, even as we believe that the pick-up in rural consumption is only cyclical," she said. Falling wages, slumping company profits and high inflation have hurt economic activity in the last few quarters, prompting several Union ministers to call for interest rate cuts. Governor Shak-

tikanta Das has steadfastly refused to ease borrowing costs, calling it "very risky" as inflation remains high. The central bank will hold its next scheduled monetary policy meeting on Dec. 6. The disappointing GDP print is "likely to create more pressure to fast-track government capital expenditure," Standard Chartered economist Anubhuti Sahay and Saurav Anand wrote. "However, the sharp manufacturing slow-

down in the second quarter is unlikely to reverse quickly."

There is now a "higher chance of the rate cut cycle starting from December," wrote IDFC First Bank economist Gaura Sen Gupta in a note. Even if a rate cut is not a certainty, policymakers may have to lower banks' cash reservation, or the share of deposits lenders must set aside, or activate some other kinds of liquidity measures to help increase lending capacity of banks, said a few economists, including those at Standard Chartered.

RBI will have to change its projections for both inflation and GDP in the policy as price pressures have been higher so far than the RBI forecast of an average 4.5% for the financial year, and GDP growth for the quarter has come much below expectations, said Madan Sabnavis, chief economist, Bank of Baroda. "It would be of interest to see what the projections this time are," he said.

Trai rule to trace SMS applicable from Dec 11

FE BUREAU New Delhi, November 30

THE TELECOM REGULATORY Authority of India (Trai) on Saturday extended the deadline on the SMS traceability guidelines for telecom operators to December 10 from November 30.

The new system requires certain technical tweaks from telemarketers that involves defining principal entity (PE)-Telemarketers (TMs) chain, based on which the telecom operators will be able to trace the messages. In absence of the same, the telemarketers will be blocked from sending the messages.

The new system is being introduced to curb the menace of spam messages and directly tracing the defaulters who are responsible for such unsolicited communication. Trai has extended the deadline after assessing the progress of PE-TM chain declaration and on request from telecom operators. Earlier, Trai extended the deadline to November 30 from November 1.

In a communication to Trai, telecom operators earlier said that while they are technically ready for implementation of the traceability of messages, there could be challenges which may be faced at the end of the principal entities and the telemarketers to register their complete chain on the DLT (distributed ledger technology) platform. The same could also lead to disruption of critical messages. Trai, however, said that more than 27,000 PEs have

already registered their chains with the respective Access Providers and further registration is in progress at a rapid pace. Lately, Trai also clarified that the rules won't cause any disruption in OTP messages.

"Access Providers have sent and are continuing to send warning notices to all PEs and TMs who have not yet implemented necessary changes," Trai said in a release. The regulator said with effect from December 11, any traffic (messages) where the chain of telemarketers is not defined or does not match with a pre-defined chain shall be rejected. "PEs and TMs are again advised to expedite the declaration of chains on priority as any message that fails to adhere to the traceability regulation will be rejected with effect from 11th of December 2024," it added. "All the Principal Entities (PE) and Telemarketers (TM) shall complete the PE-TM chain binding at the earliest to avoid disruption in the transmission of messages," Trai said in a notification.

FROM THE FRONT PAGE

In smog-hit north, it's the time to Zumba

"THESE ARE MOSTLY the middle-aged, who are unable to exercise outdoors. When their activity is restricted, they switch to a safe, hygienic controlled gym environment," said Marya. Ozone sees 100-150 walk-ins in Delhi and 70-80 walk-ins in tier 2 cities like Ludhiana on a daily basis. Group activities like dance, Zumba and yoga are particularly popular.

"This is another reason why people switch to gyms to enjoy working out in a group and in a healthy environment," added Marya, whose gym membership starts at ₹70,000 and goes up to ₹2.5 lakh per annum.

Similarly, health and fitness app FITPASS, where members have access to workout across 8,100 locations in 75+ cities in India for yoga, pilates, Zumba, kickboxing, spinning, aerobics and more, has seen revenue growth 1.75x higher in Novem-

ber than last year.

"In November, we see a demand for resistance training (strength workouts) and aerobic activities like yoga, Zumba, pilates, low-intensity cardio, etc, and decline in high-intensity training," said Akshay Verma, co-founder, FITPASS, adding, "Most of our partner gyms are equipped with HEPA filters and advanced air purification systems, ensuring cleaner and healthier air than outdoors or at home. Gyms offer a controlled environment with regular sanitisation protocols, making them a safer and more hygienic option for workouts."

E-commerce giants Amazon and Flipkart have seen a steady rise in demand for home workout equipment, reflecting significant shift toward at-home fitness solutions in the pollution months. "We have observed an over 25% YoY growth in equip-

ment needed for yoga, while demand for weights and dumbbells has surged by over 30% YTD," said KN Srikanth, director, home, kitchen and outdoors, Amazon India. Srikanth said this year they have seen an over 10% increase in the premium range in the home workout categories, with products like adjustable dumbbells and 8-10 mm TPE yoga mats emerging as

bestsellers. "The walking pad and under-desk treadmill category has grown by over 50% YoY," he added.

At Flipkart, categories such as home gym equipment and exercise bikes have seen a remarkable growth in recent months. The demand for home gym combos has surged by over 3X, and for treadmills, it has doubled by 2X. "This trend underscores evolving consumer behaviour toward at-home fitness," said a Flipkart spokesperson.

Fintech startup SaveIN, which deals in embedded finance and pay-later options for healthcare treatments like alternative medicine, gyms, physiotherapists and more, has noticed a significant 60% rise in the first 15 days in November this year when people opted for gym memberships and personal training sessions. "The

smog in north India has made outdoor activities hazardous, forcing people to take to indoor fitness," said Jitin Bhasin, CEO & founder, SaveIN, whose startup offers no-cost EMI payment plans across 1,000 gyms in India.

Live and virtual fitness sessions in the form of yoga and dance classes are also trending. Wellness platform Habuild has designed an online yoga community where over 2 lakh people have joined free yoga challenges. "Indoor exercises protect respiratory health and low-intensity activities like yoga or mobility exercises are excellent choices as they don't overwork the lungs. We advise our subscribers to use air purifiers or practice in a room with plants like snake plants or peace lilies to help improve air quality," said Saurabh Bothra, CEO & certified yoga instructor at Habuild.

financial strike; it was a double hit — targeting our financial stability and pulling us into a political controversy," Adani said. "After successfully raising ₹20,000 crore, we took the extraordinary decision to return the proceeds. We then further demonstrated our resilience by raising capital from several international sources and proactively reducing our Debt to EBITDA ratio to below 2.5 times, an unmatched metric in the global infrastructure space," he added. Adani also said following the group's financial results in the same year (FY23), no foreign credit rating agency downgraded the conglomerate. "Finally, the Supreme Court of India's affirmation of our actions validated our approach," he said.

Maruti in driver's seat, pushing Toyota sales 37% y-o-y

"More than 5,000 units of the Invicto have been sold, and the demand is steady at 300-350 units every month." The success of Toyota-badged models hasn't dented the demand for original Maruti Suzuki models. For instance, sales of the Fronx have shot up from 74,834 units to 130,602 units this year, of the Eriga from 104,136 units to 158,885 units, and of the Grand Vitara from 98,462 units to 105,506 units. Next year, this partnership with go electric, as Suzuki is developing a battery electric vehicle and will supply it to Toyota (in addition to selling it under the Maruti Suzuki badge). This model will be manufactured at the Suzuki Motor Gujarat plant in Hansalpur.

rupted benefits to EPF members. Also, the limit for auto claim settlement facility has been extended to ₹1 lakh from ₹50,000 earlier, including for those seeking advances for housing, marriage and education. The CBT also approved a proposal for simplification of the criteria for empanelling of banks for centralised collection of EPF contributions. It will now include all agency banks listed with RBI.

The CBT approved the empanelling of other scheduled commercial banks that are not RBI agency banks but have a minimum of 0.2% of total EPFO collection. This criterion has been relaxed from the earlier 0.5%, the

release said. The board also approved the full rollout of the centralised pension payment system (CPPS) from Jan. 1, 2025. The CPPS is set to be implemented as part of the EPFO's IT modernisation project, which will benefit more than 7.8 million EPS pensioners of EPFO, which includes streamlined pension disbursement across India, allowing pensioners to access their pension from any bank or branch nationwide, expediting claim processing and eliminating the need for bank visits for verifications or undertaking submissions. During FY24, EPFO settled 44.5 million claims for an amount of ₹1.82 lakh crore. In the current fiscal, 38.3 million

claims have already been settled for more than ₹1.57 lakh crore.

Religare warned for disclosure breach

However, the Burman family opposed Asthaana's appointment and wrote to the Sebi that mandatory shareholder approval was not taken within three months of the appointment. Burman family holds around 25% stake in Religare Enterprises. Religare's management, led by its chairperson Rashmi Saluja, and the Burman family-controlled firms, are locked in a battle to control the

financial services company.

Every attack makes you stronger: Adani

"The more bold your dreams, the more the world will scrutinise you. But it is precisely in that scrutiny that you must find the courage to rise, to challenge the status quo, and to build a path where none exists," he said.

Adani also gave two other examples of the resistance and challenges he has faced as a businessman. One was pertaining to the Carmichael coal mine in Australia, which faced years of protests and hold-ups from local groups between 2010 and 2019. Detailing how the group

bankrolled itself by funding the entire project of \$10 billion with its own equity, Adani said the resistance was intense and took away \$30 billion of debt financing from its other green energy projects. "We wanted to replace every two tons of poor-quality Indian coal with one ton of high-quality coal from Australia. But the resistance from NGOs was huge and lasted almost a decade. While we now have a world-class operating mine in Australia, it could be seen as a great sign of our resilience," he said. The second instance was the 2023 Hindenburg report on the group's financials, which came just as the group was getting ready to launch its ₹20,000-crore follow-on public issue. "We faced a short-selling attack initiated from abroad. This was not a typical
