Sub: Commencement of Commercial Operations – Sovereign AI Service Line (WinnnyIQ) - Intimation under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Pursuant to Regulation 30 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015, as amended (“**SEBI LODR**”), and in accordance with the Company’s disclosure policy, Winnny Immigration & Education Services Limited (“**the Company**”) hereby intimates the commencement of commercial operations under its Sovereign AI Service Line, branded as **WinnnyIQ (“the Platform”)**.

WinnnyIQ is a proprietary product of Winnny Immigration & Education Services Limited and is not a separate legal entity. The Company wishes to place the following factual information on record for the benefit of its shareholders and the investing public.

1. Background and Basis for Commercial Launch

The Company, drawing on over 25 years of operational experience in India’s regulated global mobility and compliance environment, has developed a proprietary AI-powered platform through internal deployment within its own operations (referred to as “Client Zero” validation). Following iterative refinement against live compliance workflows, the Platform is now being made available commercially to external enterprise and government clients.

This intimation is being made as the launch of a new service vertical constitutes a material development in the Company’s business operations.

2. Technology Capabilities

The Platform currently encompasses the following functional capabilities, which may be deployed individually or in combination:

- **AI-Powered Voice & Communication Analytics:** Automated analysis of recorded voice interactions for compliance monitoring, quality assurance, and pattern detection. The capability is architecturally designed to support adherence to applicable regulatory frameworks governing voice channel surveillance in financial services.
- **Intelligent Document Processing (IDP) & Structured Data Extraction:** AI-driven extraction, classification, and structuring of financial instruments and unstructured records to reduce manual processing effort in verification, underwriting, and reporting workflows.
- **Government & Administrative Workflow Automation:** Support for government departments in processing citizen applications and administrative files, with standardised, auditable review workflows and preserved human decision-making authority at every stage.
- **Multilingual & Multi-Format Record Reconstruction:** AI-driven interpretation and chronological structuring of information from multilingual, mixed-format source documents, producing standardised outputs suitable for regulatory submissions.

3. Target Markets

The Platform is being positioned for the following sectors, subject to market adoption and client-specific implementation requirements:

- SEBI-registered brokers, NBFCs, life and general insurers, and wealth managers (for voice analytics and document processing capabilities).
- Banks (retail and wholesale lending) requiring document processing automation.
- Government departments and agencies requiring citizen application workflow support.
- Enterprise BPO quality assurance functions.

4. Infrastructure & Data Architecture

The following are factual descriptions of the Platform's current technical architecture:

- **Cloud Infrastructure:** The Platform is hosted exclusively on Google Cloud's Vertex AI infrastructure, deployed within the Mumbai region (GCP region: asia-south1). All AI model inference, data processing, and storage are confined to this region.
- **Data Residency:** By design and configuration, all operational data processed through the Platform remains within the Google Cloud Mumbai region and does not transit to or reside in infrastructure outside the territory of India. The Company maintains documentation to this effect. Investors are advised that this architecture is subject to the terms and service agreements of Google Cloud Platform.
- **MeitY-Empanelled Infrastructure:** Google Cloud's Mumbai region is empanelled under the Ministry of Electronics and Information Technology (MeitY) framework. The Company relies on Google Cloud's empanelment status; the Company itself is not separately empanelled.
- **PII & PCI Redaction:** The Platform incorporates automated identification and redaction of Personally Identifiable Information (PII) and Payment Card Industry (PCI) data prior to processing or output presentation.
- **Closed-Loop Processing:** The Platform is architected such that client operational data processed through the Platform is not used to train, fine-tune, or improve any external or publicly available AI model. Data isolation is maintained within the Company's proprietary environment on Google Cloud.

5. Regulatory Design Alignment – Clarifications

The Company wishes to provide the following clarifications to avoid any misunderstanding:

- The Platform's architecture has been designed with reference to applicable regulatory frameworks, including SEBI's Cyber Security and Cyber Resilience Framework (CSCRF), RBI data localisation guidelines, and the Digital Personal Data Protection Act, 2023 (DPDP Act). This represents an architectural design intent and does not constitute a representation that the Platform has been formally certified, audited, or approved by any regulatory authority.

- Rules and obligations under the DPDP Act, 2023 continue to be notified progressively by the Data Protection Board of India. The Company's compliance posture will be updated as the regulatory framework is finalised.
- The Company does not represent that use of the Platform by any client will automatically ensure such client's compliance with any applicable regulation. Regulatory compliance obligations remain with each client organisation.

6. Current Commercial Status & Product Portal

As of the date of this intimation, the Platform is commercially launched under the brand name WinnyIQ. Further information regarding the Platform's capabilities, target sectors, and security architecture is available at the Company's dedicated product portal: **www.winnyiq.com**

The said portal is operated by and on behalf of Winny Immigration & Education Services Limited. Its content is subject to the same forward-looking statement qualifications set out in Section 7 of this intimation. The Company draws investors' attention to the fact that product portal content may be updated from time to time and may not be identical to the descriptions in this intimation; in the event of any inconsistency, this regulatory intimation shall prevail.

The Company will make further disclosures in accordance with SEBI LODR as and when material developments occur, including the onboarding of significant clients or the achievement of material revenue milestones from this service vertical.

7. Forward-Looking Statements – Safe Harbour

This intimation contains certain forward-looking statements relating to the Company's technology capabilities, strategic initiatives, and business prospects, identifiable by words such as "designed to", "intends to", "positioned for", and similar expressions. These statements are based on the Company's current expectations and are subject to risks, uncertainties, and assumptions, including but not limited to: market adoption rates; government procurement cycles and budgetary constraints; technological changes; regulatory developments; competitive pressures; and the ability to implement and scale the Platform across diverse client environments. Actual results, performance, or outcomes may differ materially from those expressed or implied in such statements. The Company does not undertake any obligation to update or revise forward-looking statements to reflect subsequent events or changed circumstances, except as may be required under applicable law.

Kindly take the above on record.

Thanking You.
