# **Planet on course for 2.7°C rise** in temperature: Report

#### Agencies BAKU

A report by the Climate Action Tracker project has found that current policies adopted by countries have put the temperature rise on track for 2.7C. This is despite the pledge world leaders have taken as part of the United Nations Climate Change Conference, commonly known as COP, with its 29th session currently underway in Azerbaijan's capital city of Baku.

The expected level of global heating by the end of the century has not changed since 2021, with "minimal progress" made this year, according to the Guardian which cited the Climate Action Tracker project report. The consortium's estimate has not shifted since the Cop26 climate summit in Glasgow three years ago "We have clearly failed to

bend the curve," said the lead author of the analysis, Sofia Gonzales-Zuñiga, from Climate Analysis.

Changes in average global temperatures that sound small can lead to massive human suffering. Last month. a study found half of the 68,000 heat deaths in Europe

in 2022 were the result of the 1.3C of global heating the world has seen so far. At the higher temperatures that are projected for the end of the century, the risk of irreversible and catastrophic extremes is also set to soar.

Meanwhile, at COP 29, according to Reuters, economists told countries that developing nations need at least \$1 trillion per year by the end of the decade to cope with climate change.

Setting the tone at the start of Thursday, a report from the Independent High-Level Expert Group on Climate Finance said the target annual figure would need to rise to at least \$1.3 trillion a year by

2035 if nations fail to act now. pressure on the years that fol-"Any shortfall in investment low, creating a steeper and before 2030 will place added potentially more costly path

to climate stability," the report said. Behind the scenes, negotiators are working on draft texts, but so far early-stage documents published reflect the huge range of views around the table.
